(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

(U) H0485 This program develops ALFS and increases sonobuoy processing capability for the SH-60 helicopter to maintain and improve undersea warfare mission effectiveness against the quiet submarine threat in deep and shallow water environments. This project provides a dipping sonar with demonstrated capabilities typically 3 to 6 times (square miles of ocean searched per hour) the existing deep water capability. This improvement will significantly increase battle group and independent ship protection providing improved survivability and operating flexibility. ALFS provides longer detection ranges and a greater detection capability by using lower frequencies, less signal attenuation, longer pulse lengths, improved processing and increased transmission power. ALFS utilizes the Enhanced Modular Signal Processor, designated UYS-2A, for improved sonobuoy processing capability.

DATE: FEBRUARY 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604212N

PROGRAM ELEMENT TITLE: ASW & Other Helo Developments

- (U) H1109 - This program develops a Mid-Life Upgrade to provide for improvements to the safety, reliability and maintainability of the CH/MH-53. The upgrade will increase reliability and reduce the cost of ownership. Upgrade efforts include the helicopter drive system, tail rotor disconnect coupling engine air particle separators, and main rotor head.
- (U) H1378 - This project provides for development of the AH-1 Integrated Weapons System (IWS) Cockpit Upgrade effort emphasizing workload reduction to increase margin of safety in night, nap-of-the-earth adverse weather operations. The fire control station wiring is performed in conjunction with the development of the Stores Management System (SMS) providing the AH-1 with fire control and advance rocket delivery capability.
- (U) H1707 - The Block II Upgrade improves the capability of the LAMPS MK III Weapons System to provide battle group protection and to add significant capability in coastal littorals and regional conflicts. The Block II Upgrade represents a significant avionics modification to the SH-60 by enhancing primary mission areas of ASW and Anti-Surface Warfare (ASUW). ALFS will be added to enhance the existing acoustic suite. An added multi-mode radar includes an inverse synthetic aperture radar mode (permits stand-off classification of hostile threats). An improved electronics surveillance measures system (ESM) will enable passive detection and targeting of radar sources not currently detectable.
- (U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under Engineering & Manufacturing Development because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program develops Airborne Low Frequency Sonar (ALFS) and increases sonobuoy processing capability for the SH-60 helicopter to maintain and improve undersea warfare mission effectiveness against the quiet submarine threat in deep and shallow water environments. This project provides a dipping sonar with demonstrated capabilities typically 3 to 6 times (square miles of ocean searched per hour) the existing deep water capability. This improvement will significantly increase battle group and independent ship protection providing improved survivability and operating flexibility. ALFS provides longer detection ranges and a greater detection capability by using lower frequencies, less signal attenuation, longer pulse lengths, improved processing and increased transmission power. ALFS utilizes the Enhanced Modular Signal Processor, designated UYS-2A, for improved sonobuoy processing capability.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$13,367) Commenced manufacturing of ALFS pre-production (EMD) units. Completed initial Contractor in-water test period. Completed full ALFS system sub-component integration. Completed design verification testing. Commenced Factory acceptance testing of initial EDMs. Commenced software configuration item test preparations. Continue MSIII logistic support requirements. Provided Government Accounting Office (GAO) directed legal fees for competitors protest.
- (U) (\$6,496) Commenced ALFS integrated system design. Commenced requirements definition, interface requirements and display system software specification development. Continued contractor preparation of integrated logistics support requirements.

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: FEBRUARY 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604212N

PROGRAM ELEMENT TITLE: ASW & Other Helo Developments

PROJECT NUMBER: H0485  
PROJECT TITLE: ALFS

- (U) (\$4,882) Continued software development testing and systems engineering analysis. Completed design verification testing. Continued government MSIII logistics requirements. Continued program support.

- (U) (\$400) Completed ALFS UYS-2 non-recurring engineering.

## 2. (U) FY 1995 PLAN:

- (U) (\$16,370) Complete software configuration item preparation and testing. Conduct Reliability and Maintainability (R&M) testing. Conduct Environmental Qualification Test (EQT) and Functional Qualification Test (FQT) test periods. Deliver ALFS pre-production EMD units for developmental testing (DT-IIA). Conduct system Electro Magnetic Interference (EMI) testing. Prepare system for DT-IIA lake testing and follow-on flight testing. Continue MSIII logistic support requirements. Implement congressionally directed shallow water enhancements.
- (U) (\$7,730) Commence air vehicle installation equipment design. Develop system Interface Control Document (ICD) for the acoustic system. Deliver ALFS reeling machine pedestal and funnel to support developmental testing (DT-IIA). Write processing and display software. Conduct contractor system integration testing.
- (U) (\$5,647) Complete software configuration item testing. Complete R&M, EQT, FQT, and EMI testing. Continue government MSIII logistics requirements. Conduct system-level government acceptance of EDMs. Continue program support. Conduct shallow water enhancement support effort.

## 3. (U) FY 1996 PLAN:

- (U) (\$7,898) Conduct DT-IIA lake and flight testing. Conduct OT-IIA flight testing. Complete contractor preparation of MSIII logistics support requirements.
- (U) (\$6,626) Provide support for DT-IIA and OT-IIA flight testing. Conduct integrated system lab verification. Incorporate human factors lessons learned during flight test period. Commence system level SH-60R/ALFS integration.

FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: FEBRUARY 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604212N

PROJECT NUMBER: H0485

PROGRAM ELEMENT TITLE: ASW & Other Helo Developments

PROJECT TITLE: ALFS

- (U) (\$4,279) Continue government MSIII logistics requirements. Conduct DT-IIA lake and flight testing. Conduct OT-IIA flight testing. Continue program support.

## 4. (U) FY 1997 PLAN:

- (U) (\$501) Analyze test data and implement fixes identified during DT-IIA and OT-IIA in preparation for system TECHEVAL and OPEVAL.
- (U) (\$3,513) Complete SH-60R/ALFS system integration development. Complete government logistics requirements. Analyze test data and implement fixes identified during DT-IIA and OT-IIA in preparation for system TECHEVAL and OPEVAL. Complete program support.

## B. (U) PROGRAM CHANGE SUMMARY:

(U) FY 1995 President's Budget:

FY 1994	FY 1995	FY 1996	FY 1997
25,181	22,101	XXX	XXX

(U) FY 1995 Appropriated:

XXX	30,501	XXX	XXX
-----	--------	-----	-----

(U) Adjustments from Appropriated/ FY 1995 PRESBUDG:

-36	-754	XXX	XXX
-----	------	-----	-----

(U) FY 1996/97 PRESBUDG Submit:

25,145	29,747	18,803	4,014
--------	--------	--------	-------

## (U) CHANGE SUMMARY EXPLANATION:

- (U) Funding: The decrease in FY94 reflects end-of-year execution updates. The reduction in FY 95 reflects Department of the Navy's distribution of Congressional decreases for university research, CSS, FFRDCs, travel and SBIR.
- (U) Schedule: TECHEVAL and OPEVAL adjusted from 4/96 and 4/97 to 2/98 and 7/98 to coincide with Block II testing under project H1707.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project provides for FY-94 completion of the Main Gearbox Reliability Improvement Program (MGB) and the Global Positioning System (GPS). In FY-95 project initiates an H-53 Service Life Assessment Program (SLAP), a two year study, to develop usage and fatigue life profiles, complete with analytical evaluations of airframe dynamic interfaces leading to design and development recommendations. In FY-96 the program supports a White House requirement to competitively procure, install, test and evaluate an Integrated Mechanical Diagnostics (IMD) system on two Marine Corps CH-53E helicopters. In FY-97 a Service Life Extension Program (SLEP), phase I, begins development of reliability and maintainability improvement phases for aircraft components and systems, such as: engine air particle separators, main rotor head and external cargo handling system. FY-99, phase II, begins a Cockpit development phase to address avionics obsolescence and upgrade issues. Both FY-97 and FY-99 SLEP improvements will increase reliability, maintainability and safety while reducing the cost of ownership through 2025.

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

#### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$3,468) GPS - Completed System Integration Laboratory (SIL) testing, Apr 94; Mission Planning Station III (MPS), Feb 94.
- (U) (\$ 657) MGB - Completed Flight Testing Sep 94 with ECP submittal Oct 94 for attrition installs by Aviation Supply Office (ASO) funds.
- (U) (\$ 826) GPS - Commenced Developmental Testing (DT), Jun 94 with Operational Testing (OT) plan start Feb 95.

## 2. (U) FY 1995 PLAN:

- (U) (\$ 0) GPS - Complete Developmental Testing (DT), Feb 95; Commence Operational Test Readiness Reviews (OTRR), Feb 95; and Operational Testing (OT) Feb 95 with all testing completed by Mar 95.
- (U) (\$5,434) SLAP - Award a two-year developmental study contract March 95 to start redesign of selected components.
- (U) (\$ 765) Provide in-house travel and field activities funding to support SLAP.

## 3. (U) FY 1996 PLAN:

- (U) (\$7,154) SLAP - Final incremental contract payment for completion of SLAP study Nov 95.
- (U) (\$3,400) IMD - Award IMD system contract Nov 95. Conduct Preliminary Design Review (PDR) Mar 96; and Critical Design Review Aug 96.

## 4. (U) FY 1997 PLAN:

- (U) (\$8,061) SLEP - Award Service Life Extension Program (SLEP) contract, phase I, Dec 96.
- (U) (\$1,200) IMD - Award contract increment Oct 96 and commence Early Operational Assessment Testing (EOAT) Nov 96.

## FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604212N

PROJECT NUMBER: H1109

PROGRAM ELEMENT TITLE: ASW & OTHER HELO DEVELOPMENT

PROJECT TITLE: CH/MH-53

### B. (U) PROGRAM CHANGE SUMMARY:

(U) FY 1995 President's Budget:	FY 1994	FY 1995	FY 1996	FY 1997
	5,468	6,394	XXX	XXX
(U) FY 1995 Appropriated:	XXX	6,394	XXX	XXX
(U) Adjustments from Appropriated/FY 1995 PRESBUDG:	-517	-195	XXX	XXX
(U) FY 1996/97 PRESBUDG Submit:	4,951	6,199	10,554	9,261

### (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: The FY94 reduction of \$517K reflects a realignment of funds to pay cancelled "M" account bills. The FY95 reduction of \$195K reflects the allocation of undistributed adjustments.

(U) Schedule: A delay at contractor facility and deficiency problems found during Developmental Testing (DT) of the GPS integration software have slipped Operational Testing (OT) by two months. Operational Testing is now planned to start Feb 95 with completion Mar 95. FY-94 milestones have been adjusted to reflect schedule change. In FY-95, based on the results of the FY-92 Reliability and Maintainability (R&M) study, funded by the production program, the Midlife Upgrade Program was restructured to provide for the development of a SLEP kit, incorporation, USMC performance, survivability and cargo handling capabilities concurrently with R&M improvements. The restructured program schedule now shows the SLAP (a two year study) starting in FY-95, to define components and airframe changes required to be developed and incorporated in the SLEP kit under two phases.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The mission of the AH-1W attack helicopter is to provide close-in-fire support and fire support coordination in aerial ground escort operations during the ship-to-shore phase in amphibious operations and during subsequent operations ashore. AH-1 Integrated Weapons System (IWS) emphasizes cockpit workload reduction to increase margin of safety in night, nap-of-the-earth and adverse weather operations. Integration includes on-board mission planning, communications, digital fire control, self navigation, night targeting and weapons systems. As discrete systems have been added to the aircraft, pilot workload has progressively worsened. The Board of Inspection and Survey identified the lack of system integration as the most critical deficiency affecting mission completion. The fire control wiring is performed in conjunction with the development of the Stores Management System (SMS), providing the AH-1 with a simultaneous air-to-air missile, air-to-ground capability and advanced rocket delivery capability.

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

#### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$) 0) Obtained Night Targeting System (NTS) Milestone III approval for Full Rate Production.
- (U) (\$4,022) Completed engineering design effort and began Stores Management System (SMS)/fire control station wiring integration.

PROGRAM ELEMENT: 0604212N

PROJECT NUMBER: H1378

PROGRAM ELEMENT TITLE: ASW & OTHER HELO DEVELOPMENT

PROJECT TITLE: AH-1 AIRCRAFT

- (U) (\$1,462) Prepared and initiated technical review of Integrated Weapons System (IWS) proposals and prepared documentation in support of Milestone IV/II approval.

### 2. (U) FY 1995 PLAN:

- (U) (\$ 0) Obtain IWS MS IV/II approval for Engineering and Manufacturing Development (E&MD) and award competitive contract.
- (U) (\$8,885) Begin IWS engineering design effort.
- (U) (\$2,599) SMS/fire control wiring prototype incorporation.

### 3. (U) FY 1996 PLAN:

- (U) (\$11,628) Complete preliminary design, begin software coding and conduct preliminary design review (PDR).
- (U) (\$ 3,280) SMS field activity and test support.

### 4. (U) FY 1997 PLAN:

- (U) (\$39,889) Conduct critical design review (CDR); complete majority of software coding; and complete fabrication, installation and checkout of two Engineering Development Models (EDM's).
- (U) (\$2,009) SMS field activity and Developmental Test/Operational Test (DT/OT) test support.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Block II Upgrade improves the capability of the LAMPS MK III Weapons System to provide battle group protection and adds significant capability in coastal littoral and regional conflicts. The Block II Upgrade entered Engineering and Manufacturing Development (EMD) in FY93 and represents a significant avionics modification to the SH-60B greatly enhancing both primary mission areas of ASW and ASUW. The ALFS will be added to enhance the existing acoustic suite. ASUW effectiveness will be improved with the addition of a multi-mode radar which includes an inverse synthetic aperture radar mode to permit stand-off classification of hostile threats. An improved ESM system will enable passive detection and targeting of radar sources not detectable with the current system. Aircrew and aircraft survivability in hostile environments will be significantly improved through software integration of the self-defense equipments. Provisions for a tactical data transfer system to improve platform interoperability by rapid, secure transfer of mission information between multiple air and surface units is included in the upgrade.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$38,730) Continued EMD including system and subsystem design and development; continued subsystem hardware development procurement; conducted Technical Baseline Review and subsystem design reviews; continue airframe modification analysis for Block II avionics; began laboratory build and integration, began high level simulation/stimulation design; conducted Subsequent Application Review (SAR) of management control system.
- (U) (\$2,112) Incremental funding payment for ALFS Engineering Development Model (EDM).

PROJECT NUMBER: H1707

PROGRAM ELEMENT TITLE: ASW & Other Helo Developments

PROJECT TITLE: LAMPS III IMP

- (U) (\$3,669) Provided continued Navy engineering support, program management, hardware and software independent verification and validation (IV&V) and travel.

## 2. (U) FY 1995 PLAN:

- (U) (\$38,343) Continue EMD including continuation of system level design leading to a system Preliminary Design Review (PDR); continue laboratory simulation/stimulation; system software high level design begins, continue airframe modification design analysis; conduct System Software Review (SSR).
- (U) (\$1,993) Navy system engineering field support for system PDR, continue hardware and software IV&V; deliver ALFS EDMs and travel.
- (U) (\$530) Prepare for initial ASW/ALFS developmental testing (DTIIA).

## 3. (U) FY 1996 PLAN:

- (U) (\$42,410) Install and integrate prototype data handling equipment in lab, commence air vehicle modifications, prepare and submit documentation to support a system Critical Design Review (CDR), begin high level software coding and test, continue laboratory simulation/stimulation testing.
- (U) (\$4,128) Navy system engineering support in preparation for CDR, continue hardware and software V&V, program management and travel.
- (U) (\$1,000) Conduct support for ALFS/ASW developmental testing (DTIIA) and test planning and analysis support for DTIIB.

PROJECT TITLE: LAMPS III IMP

## 4. (U) FY 1997 PLAN:

- (U) (\$32,686) Conduct system CDR, complete system software coding and test, complete laboratory simulation/stimulation testing, commence system integration and test, conduct engineering development tests on prototype multi-mode radar, begin avionics installation on prototype aircraft, commence high level design of Post Low Rate Initial Production Test processing and Tactical Decision Aid software.
- (U) (\$3,687) Navy system engineering support during CDR, lab integration and testing, Integrated Test Team planning and support, continue IV&V effort, program management and travel.
- (U) (\$1,600) Test Readiness Review (TRR) in preparation for DTIIB.

## B. (U) PROGRAM CHANGE SUMMARY:

(U) FY 1995 President's Budget:

<u>FY 1994</u>	<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>
44,575	42,099	XXX	XXX

(U) FY 1995 Appropriated:

XXX	42,099	XXX	XXX
-----	--------	-----	-----

(U) Adjustments from Appropriated/FY 1995 PRESBUDG:

-64	-1,233	XXX	XXX
-----	--------	-----	-----

(U) FY 1996/97 PRESBUDG Submit:

44,511	40,866	47,538	37,973
--------	--------	--------	--------

## (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: The decrease in FY94 reflects end-of-year execution updates. The reduction in FY 95 reflects Department of the Navy's distribution of Congressional decreases for university research, CSS, FFRDCs, travel and SBIR.

# UNCLASSIFIED

# UNCLASSIFIED

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: FEBRUARY 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604212N

PROJECT NUMBER: H1707

PROGRAM ELEMENT TITLE: ASW & Other Helo Developments

PROJECT TITLE: LAMPS III IMP

(U) Schedule: The funding changes since Milestone II Navy Program Decision Meeting (NPDM) (7/21/93) have resulted in the following restructured program schedule from the approved MS II Baseline:

Schedule Event	MS II Baseline	FY 95 Budget Rebaseline
Preliminary Design Review	Objective	Objective
Critical Design Review	APR 1994	JUL 1995
LRIP Contract Award	MAY 1995	OCT 1996
LRIP First Delivery	DEC 1997	NOV 1998
Technical Evaluation	DEC 1999	JUL 2000
Start	MAY 1999	JAN 2000
Finish	NOV 1999	JUN 2000
Operational Evaluation	FEB 2000	SEP 2000
Start	JUL 2000	MAR 2001
Finish	NOV 2000	JUN 2001
Milestone III	MAR 2001	SEP 2001
Initial Operating Capability		

The following actions have resulted from the FY95 funding profile adjustments:

- Reduced Manpower necessary to support the System Level Critical Design Review.
- Delayed requirements analysis for Operator Assistance Software Programs; necessary to support entry to TECHEVAL and OPEVAL (to support Software Requirement Specification development in FY97).
- Delayed or no System Level Modeling which simulates System Level behavior/functionality prior to actual Hardware and Software System Integration.
- Delayed Integrated (Contractor/Government Team) Test Planning.
- Delayed HAZMAT and Environmental Impact Assessments necessary for MS III.
- Delayed Support Equipment Requirements Development.

(U) Technical: Not applicable.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604214N

PROJECT NUMBER: H0652

PROGRAM ELEMENT TITLE: AV-8B Aircraft

PROJECT NAME: AV-8B

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE PROGRAM	TOTAL
H0652 AV-8B	12,831	10,617	11,309	6,362	2,085	1,648	0	0	0	1,503,538

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The program provides AV-8B integration and testing of various weapons aircraft improvements including: installation of the AN/APG-65 multimode radar; incorporation F402-RR-408 engine improvements; flight test of modifications that improve aircraft flight performance; and limited evaluation of advance concepts and activities to coordinate with ongoing independent advance weapons developments, and incorporation of common integrated night attack/radar software (C-1). AN/APG-65 radar integration is a joint development effort among the Governments of the United States (USG), Italy and Spain to install, integrate and test the AN/APG-65 radar (currently in use on the F/A-18) which provides enhanced air-to-air weapons delivery capability. The F402-RR-408 is a derivative of the -406A engine presently in service; it provides increased thrust for improved performance, safety, and survivability. C-1 software is a combined Operational Flight Program (OFF) for the night attack and radar in the aircraft which establishes the baseline OFF for future weapons. Airframe improvements include expansion of the flight envelope and 100% Leading Edge Root Extension (LERX), a joint development with the United Kingdom that increases instantaneous turn rate and combat capability. Advanced weapons coordination includes requirements liaison with efforts such as the Advanced Rocket System, Joint Direct Attack munitions, Joint Standoff Weapon, and AIM-9X.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1996

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604214N

PROGRAM ELEMENT TITLE: AV-8B Aircraft

PROJECT NUMBER: H0652  
PROJECT NAME: AV-8B

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

#### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$328) Continued advanced studies/advanced weapons coordination.
- (U) (\$145) Released Block 1 (R1) Radar Software to United States Marine Corps (USMC).
- (U) (\$8,867) Released Block 2 (R2) Radar Software to the USMC and Government of Italy (GOI) to provide Air-to-Surface radar modes.
- (U) (\$725) Conducted flight performance testing of various modifications.
- (U) (\$614) Conducted ground and flight testing for F402-RR-408 engine improvement. Issued final fleet operating clearances.
- (U) (\$2,152) Development of common integrated night attack/radar software (C1.0)

#### 2. (U) FY 1995 PLAN:

- (U) (\$562) Continue advanced studies/advanced weapon projects.
- (U) (\$500) Complete DT/OT testing and release Block 3 (R3) Radar Software to the USMC and GOI to provide Initial Operational Capability (IOC) with full Air-to-Surface and Air-to-Air radar modes.
- (U) (\$6,374) Continue development and commence integration of common-configuration, integrated night attack/radar software (C1.0)
- (U) (\$1,675) Conduct aircraft handling investigations.
- (U) (\$1,506) Conduct Survivability and Vulnerability (S&V) studies to determine most cost effective approaches/alternatives.

PROJECT NAME: AV-8B

## 3. (U) FY 1996 PLAN:

- (U) (\$250) Continue advanced studies/advanced weapon projects.
- (U) (\$1,100) Conduct engine inlet guide vane controller studies.
- (U) (\$400) Conduct flight performance testing of various modifications, including engine modifications.
- (U) (\$300) Conduct preliminary airframe installation/integration design for joint Advanced Missile Warning System (AMWS).
- (U) (\$500) Determine airframe installation/integration requirements for the joint AMWS.
- (U) (\$5,725) Continue development and begin testing of common integrated night attack/radar software (C1.0).
- (U) (\$300) Commence second version of common integrated night attack radar software (C2.0). C2.0 addresses improved APG-65 radar software.
- (U) (\$1,275) Continue aircraft handling investigations.
- (U) (\$1,459) Continue S&V studies to determine most cost effective approaches/alternatives.

## 4. (U) FY 1997 PLAN:

- (U) (\$400) Continue advanced studies/advanced weapons projects.
- (U) (\$500) Continue preliminary airframe installation/integration designs for joint AMWS.
- (U) (\$325) Complete DT/OR testing and release first version common integrated night attack/radar software (C1.0).
- (U) (\$300) Continue development and begin testing of common integrated night attack/radar software (C2.0).

## B. (U) PROGRAM CHANGE SUMMARY:

(U) FY 1995 President's Budget:

FY 1994	FY 1995	FY 1996	FY 1997
18,179	10,203	XXX	XXX

(U) FY 1995 Appropriated:

XXX	11,203	XXX	XXX
-----	--------	-----	-----

(U) Adjustments from Appropriated/  
FY 1995 PRESBUDG

-5,348	-586	XXX	XXX
--------	------	-----	-----

(U) FY 1996/97 PRESBUDG Submit:

12,831	10,617	11,309	6,362
--------	--------	--------	-------

## (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: The reduction from PRESBUDG in Fiscal Year 1994 reflects both omnibus reprogramming of \$7.5M and an increase of \$2,152M to begin development of common integrated night attack/radar software (CI.O). The reduction in FY95 of -\$586 reflects the allocation of undistributed adjustments.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Project W0572, Joint Services/Navy Standard Avionics Components and Subsystems: This project addresses the proliferation in Naval Aviation of unique avionics equipment that increases with each new or modified aircraft. This proliferation of unique Contractor Furnished Equipment (CFE), due to non-availability of off-the-shelf Government Furnished Equipment (GFE), has resulted in a growing cost burden in the areas of development, procurement, logistics, and maintenance. This project addresses the issue by developing common avionics for new programs and retrofit programs. All acquisition approaches are followed for the least-cost solution to this need, including joint programs, GFE breakout of peculiar items for broad use, foreign and non-developed development item investigations (funded under those readings when appropriate) and, when practicable and cost effective, dedicated development efforts. These products have application to new architecture "integrated avionics" aircraft, and also older technology "black box" or federated aircraft with major new efforts directed at bridging the gap between these technologies. This forward and retrofit application of common avionics technology is required to maximize aircraft capabilities at a minimum procurement and support cost. The program will address in-service-out-of-production avionics with costly reliability and maintainability deficiencies and includes planning for the development of components/subsystems which have high reliability, are easily maintained and have low life cycle costs. An example of a past successful task under this project is the Standard Central Air Data Computer (SCADC) jointly developed with the Air Force and now in production as a common system on Navy and Air Force aircraft. Using an integrated common module approach, the reliability of SCADC is 10 to 50 times greater than the 13 types of air data computers it replaced. This project also funds Navy participation and activities involving the Joint Service Review Committee (JSRC) for Avionics Standardization.

(U) Project S1857, Calibration Standards: This project is a Navy-wide program to develop required calibration standards (hardware) in all major measurement technology areas. It funds Navy lead-service responsibilities in the DoD metrology RDT&E program.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Joint Service/Navy Standard Avionics Components and Subsystems project provides for the identification, design, development, test, evaluation and qualification of standard avionics for Navy use, and wherever practicable, use across all services. Standard avionics systems under development include the Ground Proximity Warning System (GPWS) for Tactical Aircraft (TACAIR); Compass/Attitude Heading Reference System (C/AHRS), a joint service program development with the Air Force; a joint service Solid State Barometric Reference System (SSBA), Low Probability of Intercept (LPI) Altimeter, a joint service Embedded Global Positioning System (GPS)/Inertial Navigation System (EGI), Tactical Aircraft Moving Map Capability (TAMMC), GPS Guidance Package (GGP), Flight Avionics Displays (FAD), and Common Tactical Mission Recorder (CTMR).

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$3,252) Continued qualification testing for C/AHRS and began Technical Evaluation (TECHEVAL).
- (U) (\$3,128) Continued Engineering & Manufacturing Development (E&MD) of GPWS Helo.
- (U) (\$1,476) Completed GPWS TACAIR algorithm development; transition capability to aircraft platforms.
- (U) (\$ 719) Conducted risk assessment for LPI Altimeter; released the Request for Information (RFI).
- (U) (\$ 190) Completed integration and testing of SSBA.
- (U) (\$1,261) Participated in JSRC tri-service coordination to promote commonality and joint programs.

2. (U) FY 1995 PLAN:

- (U) (\$2,098) Deliver four (4) E&MD units; complete C/AHRS program.
- (U) (\$2,414) Begin TECHEVAL for GPWS Helo.
- (U) (\$1,418) Release Request for Proposal (RFP); prepare milestone documentation; conduct source selection for LPI Altimeter contract.

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604215N

PROGRAM ELEMENT TITLE: Standards Development

PROJECT NUMBER: W0572

PROJECT TITLE: Joint Services/Navy Standard Avionics Components and Subsystems

- (U) (\$ 957) Plan GPWS TACAIR algorithm integration into multiple platforms.
- (U) (\$1,985) Participate in JSRC tri-service coordination to promote commonality and joint programs.
- (U) (\$1,388) Conduct risk assessment for TAMMC.
- (U) (\$ 290) Conduct risk assessment for GGP.
- (U) (\$ 210) Development oversight and system testing for EGI.

1. (U) FY 1996 PLAN:

- (U) (\$ 250) Continue risk assessment for GGP.
- (U) (\$ 810) Continue GPWS TACAIR missionization for AV-8B, T-45, and F-14 aircraft.
- (U) (\$3,086) Award E&MD contract; conduct Preliminary Design Review (PDR) for LPI Altimeter.
- (U) (\$ 913) Conduct risk assessment for FAD; release RFP.
- (U) (\$1,360) Release RFP; conduct source selection for TAMMC E&MD contract.
- (U) (\$1,095) Participate in JSRC tri-service coordination to promote commonality and joint programs.

1. (U) FY 1997 PLAN:

- (U) (\$ 800) Continue GPWS TACAIR missionization for AV-8B, T-45, and F-14A/C.
- (U) (\$3,930) Conduct Critical Design Review (CDR); begin TECHEVAL for LPI Altimeter.
- (U) (\$ 950) Release RFP for GGP.
- (U) (\$4,520) Achieve Milestone II and award E&MD contract for FAD.
- (U) (\$4,690) Achieve Milestone II and award E&MD contract for CTMR.
- (U) (\$4,145) Achieve Milestone II and award E&MD contract for TAMMC.
- (U) (\$1,530) Participate in JSRC tri-service coordination to promote commonality and joint programs.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project provides the engineering development of measurement reference/calibration standards (hardware) required to ensure measurement accuracy in support/maintenance of new advanced technology weapon systems and associated support equipment. These individual tasks have been assigned to the Navy as lead-service responsibilities as part of a Joint Service/DoD program.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$1,583) Completed development of 13 calibration standards (hardware) supporting fiber optic communication systems, fiber optic sensors, pilot air breathing systems, ships' boiler systems, laser target tracking systems, stealth technology, pressure vessels, and infrared target identification systems.
- (U) (\$1,431) Completed 66% of the development of 8 calibration standards (hardware) supporting fiber optic detectors, fiber optic hydrophones, laser transmitters, piston gauges, screw thread gauges, and low pressure gauges used in nuclear facilities.
- (U) (\$ 326) Completed 33% of the development of 2 calibration standards (hardware) supporting microwave power measurements and chemical and biological warfare sensors.

2. (U) FY 1995 PLAN:

- (U) (\$1,425) Complete development of 10 calibration standards (hardware) in support of fiber optic hydrophones, fiber optic detectors, screw thread gauges, fiber optic communication, radar systems, laser targeting systems, piston gauges, and low pressure gauges in nuclear facilities.
- (U) (\$1,182) Complete 66% of the development of 9 calibration standards (hardware) supporting missile hydraulic systems, fiber optic communication systems, long-line hydrophones, primary resistance measurements, stealth technology, radar systems, chemical and biological warfare sensors.
- (U) (\$1,965) Complete 33% of the development of 9 calibration standards in support of infrared dynamic scene generators, polarization based target identifiers/trackers, fiber optic communications, infrared target illuminators, radar systems, and aircraft altimeters.

3. (U) FY 1996 PLAN:

- (U) (\$1,207) Complete the development of 6 calibration standards (hardware) in support of missile hydraulic systems, fiber optic communication systems, long line hydrophones, primary resistance measurements, stealth technology, radar systems, chemical and biological warfare sensors.
- (U) (\$1,846) Complete 66% of the development of 9 calibration standards (hardware) in support of infrared dynamic scene generators, polarization based target identifiers/trackers, fiber optic communications, infrared target illuminators, radar systems, and aircraft altimeters.

4. (U) FY 1997 PLAN:

- (U) (\$1,846) Complete the development of 9 calibration standards (hardware) in support of infrared dynamic scene generators, optic communications, infrared target illuminators, radar systems, and aircraft altimeters.
- (U) (\$ 600) Initiate and complete 33% of 2 calibration standards (hardware) in support of physical/mechanical and electro-optical measurements.

TOTAL	4,087	13,586	12,872	5,404	4,019	14,365	50,070	59,340	CONT	CONT

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: H0489 S-3 WSIP - The current program provides continuation of a series of progressive modular improvements which began with the S-3 Weapon System Improvement Program (WSIP) Phase I (S-3A modified to S-3B configuration). Based upon the S-3 WSIP Operational Requirements Document, the full program achieves the required multi-mission operational capability through time-phased, selective mission avionics/processing upgrades that are required in priority order. Initial Nunn-funded development focused on the Co-Processor Memory Unit (CPMU) hardware, a joint U.S./Canadian industrial base development program which provides the core processing capability and open architecture required for future modular S-3B modification. This program will complete CPMU integration and test and rewrite existing Tactical Mission Program (TMP) code into Ada high order language.

(U) H2217 COMMON SUPPORT AIRCRAFT(CSA) - This project replaces the S-3B/ES-3A/E-2C aircraft. The CSA project will study and determine the optimum aircraft design to provide a multi-place, common airframe/engine/core-avionics aircraft having sufficient internal volume, internal and external carriage capability, and provisions for mission-specific avionics, sensors, stores and weapons. In addition to meeting the aircraft requirement of the S-3B/ES-3A/E-2C aircraft, the common support airframe will be a primary candidate for tanker and Carrier Onboard Delivery (COD) aircraft missions.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The current program provides continuation of a series of progressive modular improvements which began with the S-3 Weapon System Improvement Program (WSIP) Phase I (S-3A modified to S-3B configuration). Based upon the S-3 WSIP Operational Requirements Document, the full program achieves the required multi-mission operational capability through time-phased, selective mission avionics/processing upgrades that are pursued in priority order. Initial Nunn-funded development focused on the Co-Processor Memory Unit (CPMU) hardware, a joint U.S./Canadian industrial base development program which provides the core processing capability and open architecture required for future modular S-3B modification. This program will complete CPMU integration and test and rewrite existing Tactical Mission Program (TMP) code into Ada high order language.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$854) Continued translation of existing AN/AVK-10 CMS-2 software code for CPMU compatibility.
- (U) (\$300) Commenced TMP Ada software development.
- (U) (\$2,933) Continued CPMU hardware and software development and integration.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604217N

PROJECT NUMBER: H0489

PROGRAM ELEMENT TITLE: S-3 Weapon System Improvement

PROJECT TITLE: S-3 WSIP

### 2. (U) FY 1995 PLAN:

- (U) (\$1,112) Perform CPMU EDM Hardware developmental testing.
- (U) (\$9,000) Continue Ada software development for the CPMU.
- (U) (\$3,474) Continue hardware and software development and integration.

### 3. (U) FY 1996 PLAN:

- (U) (\$11,926) Continue Ada software development for the CPMU.
- (U) (\$796) Continue hardware and software development and integration.
- (U) (\$150) Perform Follow on Test and Evaluation (FOT&E) of CPMU.

### 4. (U) FY 1997 PLAN:

- (U) (\$4,191) Continue Ada software development for the CPMU.
- (U) (\$496) Continue hardware and software development and integration.
- (U) (\$717) Perform Navy developmental testing of CPMU.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This Program Element (PE) provides for the engineering development of sensors, communication interfaces, and processing and display equipment to measure, ingest, store, distribute and display atmospheric and oceanographic parameters essential to the optimum employment of Naval warfare systems. The PE also develops increased capabilities for the shipboard and shore based Tactical Environmental Support System - TESS(3). Engineering development of oceanographic survey sensors is also performed under this PE.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project provides for the development of Non-ACAT sensors, communication interfaces, and processing and display equipment to measure, ingest, store, distribute and display atmospheric and oceanographic parameters. Major emphasis areas include the Navy Integrated Tactical Environmental Subsystem (NITES), Automated Surface Observing System (ASOS), the Marine Corps Meteorological Mobile Facility (METMF), the AN/SMQ-11 satellite receiver/recorder and other satellite ground equipment, weather radars and the development of new sensors such as active and passive atmospheric profilers for incorporation into the Shipboard Meteorological and Oceanographic Observing System (SMOOS).

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$1,173) Continued development of NITES to comply with the Joint Maritime Command Information System.
- (U) (\$870) Continued development of ASOS to incorporate Navy-unique requirements. Continued system development of METMF and AN/SMQ-11.
- (U) (\$500) Began exploitation of Light Detection and Ranging (LIDAR) atmospheric profiler emerging technology to incorporate latest laser and optics technologies.

PROJECT TITLE: Fleet Air Ocean Equipment

## 2. (U) FY 1995 PLAN:

- (U) (\$519) Complete development of NITES to comply with the JMCIS command environment.
- (U) (\$587) Complete development of ASOS to incorporate Navy-unique requirements; continue system development of METMF and AN/SMQ-11.
- (U) (\$600) Continue development of LIDAR atmospheric profiler to incorporate latest laser and optics technologies.
- (U) (\$100) Begin system development for weather radar that will detect and monitor severe weather phenomena at airfields where Next Generation Radar (NEXRAD) is unavailable.

## 3. (U) FY 1996 PLAN:

- (U) (\$600) Begin test, evaluation and adaptation of non-developmental items (NDI) development in support of data connectivity, interfaces and C2 systems.
- (U) (\$663) Begin engineering development of the Navy Tactical Applications Computer Version 4 (TAC-4) NITES workstation.
- (U) (\$359) Complete development of existing METMF. Continue system engineering of AN/SMQ-11.
- (U) (\$600) Begin system engineering of METMF (Replacement).
- (U) (\$300) Continue development of LIDAR atmospheric profiler to incorporate latest laser and optics technologies.
- (U) (\$100) Continue system development for weather radar.

## 4. (U) FY 1997 PLAN:

- (U) (\$821) Continue test, evaluation and adaptation of NDI in support of data connectivity, interfaces and C2 systems.
- (U) (\$300) Complete engineering development of the TAC-4 NITES workstation.
- (U) (\$236) Begin engineering development of the TAC-5 NITES workstation.
- (U) (\$500) Continue system engineering of AN/SMQ-11.
- (U) (\$400) Complete system engineering of METMF (Replacement)
- (U) (\$300) Continue development of LIDAR atmospheric profiler to incorporate latest laser and optics technologies.
- (U) (\$100) Complete system development for supplemental weather radar.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: R1740, Air/Ocean Survey Engineering: The project engineering development for fleet transition of potential 6.3 sponsored projects of highly specialized ultra-high resolution instrumentation systems and measurement techniques in support of CNO endorsed requirements. The objectives are to ruggedize and package systems, sensors and instruments to survive the harsh and demanding requirements of fleet operational use. Engineering is accomplished in the Research, Development Test and Evaluation (RDT&E) phase to meet requirements for 1) air and safety certification for deployment from fleet aircraft or ships, and 2) proper data formats for integration into existing or planned communications and displays. The end products are ruggedized sensors and systems that will 1) provide the military near real-time, in-situ environmental assessment capability in littoral regions 2) field a capability to provide the regional commander with continuous environmental data for operational use, and 3) provide baseline data for predictive models in areas of potential interest. Real-time environmental data is needed because climatological forecasting does not work in the littoral. The major challenges include instrumentation for collection and dissemination of data in highly variable meteorological and oceanographic conditions under stressful environmental situations in denied or inaccessible areas over relatively long periods of time.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$849) Completed testing of Compact Meteorological and Oceanographic Drifter (CMOD) / Temperature Tail (TZ) / Ambient Noise Sensor (ANS) mini drifting data buoy (MDDB).
- (U) (\$82) Initiated 6.4 transition of expendable optical probe from PE 0603207N.
- (U) (\$250) Initiated 6.4 drifting buoy display software/PC card development for local user terminal upgrades.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

Date: Feb 1995

BUDGET ACTIVITY: 5      PROGRAM ELEMENT: 0604218N      PROJECT NUMBER: R1740  
PROGRAM ELEMENT TITLE: Air/Ocean Equipment Engineering      PROJECT TITLE: Air/Ocean Survey Engineering

### 2. (U) FY 1995 PLAN:

- (U) (\$1241) Continue development of combined 300 meter thermistor chain/ambient noise sensors for AN/WSQ-6 buoys (NAVY designator for MDDB). Begin transition of buoy procurement to NAVAIR PMA 264 for OT&E.

### 3. (U) FY 1996 PLAN:

- (U) (\$800) AN/WSQ-6 Buoy Sensors. Transition XAN2 ambient noise variant to PMA 264. Continue development of XAN-4 variant, combined thermistor chain/hydrophone option.
- (U) (\$229) Transition from 6.3 development new wind speed/direction sensor for AN/WSQ-6 buoy prototype.
- (U) (\$227) Initiate 6.4 development of wave/wind sensor package for AN/WSQ-6 buoys.

### 4. (U) FY 1997 PLAN:

- (U) (\$950) Continue sensor development on AN/WSQ-6 series buoys. Transition wave buoy variant to fleet.
- (U) (\$222) Autonomous Unmanned Vehicle / Remotely Operated Vehicle (AUV/ROV) meteorological and oceanographic (METOC) Sensors; transition AUV/ROV sensors from 6.3 Ocean Measurement Sensors (OMS) program to 6.4 development for AUV/ROV applications.
- (U) (\$184) Continue development of wave/wind sensor package for AN/WSQ-6 buoys.

## FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

Date: Feb 1995

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604218N

PROJECT NUMBER: R1740

PROGRAM ELEMENT TITLE: Air/Ocean Equipment Engineering

PROJECT TITLE: Air/Ocean Survey Engineering

### B. (U) PROGRAM CHANGE SUMMARY:

(U) FY 1995 President's Budget:	FY 1994	FY 1995	FY 1996	FY 1997
	1,169	1,249		
(U) FY 1995 Appropriated:		1,249		
(U) Adjustments from Appropriated/FY 1995 PRESBUDG:	12	-8		
(U) FY 1996/97 PRESBUDG Submit:	1,181	1,241	1,256	1,356

### (U) CHANGE SUMMARY EXPLANATION:

- (U) Funding: Funding available not adequate to transition more than one buoy variant per FY.  
FY 1994 - Increase of 12 for end-of-year execution.
- FY 1995 - Decrease of 5 to accommodate Small Business Innovation Research and 3 to reflect undistributed reductions for travel and University Research.
- (U) Schedule: Wind and wave sensors for buoys still in 6.3 and won't transition until FY96.
- (U) Technical: Per Sponsor direction transition to PMA 264 in FY96 will begin with ambient noise version (XAN-2) with one buoy variant per year transition through FY98.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project develops improvements to the Navy's computer-based tactical shipboard and shore capability used to predict and assess the impact of the atmospheric and oceanographic environment on the performance of platforms, weapons and sensor systems. Pre-Planned Product Improvement (P3I) provides for the testing of newly developed application software to meet the evolutionary requirements of the fleet and also enable TESS to maintain compatibility with common software standards and operating environments.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$368) Continued NRL Lead Laboratory tasks of software integration, assisting model developers and providing technical assistance to other activities.
- (U) (\$324) Completed Phase I software build integration. Began integration of Phase II software build in accordance with the TESS(3) Software Integration Plan (SIP).
- (U) (\$188) Continued software and hardware P3I. Complete engineering development of interim TESS(3) remote workstation.
- (U) (\$322) Began integrating X-Windows software implementation in Interim remote workstation.

### 2. (U) FY 1995 PLAN:

- (U) (\$631) Continue NRL Lead Laboratory tasks of software integration, assisting model developers and providing technical assistance to other activities.
- (U) (\$808) Complete Phase II software build integration. Begin integration of Phase III software build in accordance with the TESS(3) SIP.
- (U) (\$638) Continue software P3I. Begin engineering development of next generation TESS(3) hardware suite.
- (U) (\$250) Complete X-Windows implementation.

### 3. (U) FY 1996 PLAN:

- (U) (\$685) Continue NRL Lead Laboratory tasks of software integration, assisting model developers and providing technical assistance to other activities.
- (U) (\$436) Complete integration of Phase III software build in accordance with the TESS(3) SIP.
- (U) (\$633) Begin integration of Phase IV software build in accordance with the TESS(3) SIP.
- (U) (\$550) Begin convergence of TESS(3) and NITES software.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program provides upgrades to P-3C aircraft systems to enhance surface and subsurface tracking, classification, and attack capabilities. The P-3C Sensor Integration project develops software necessary to integrate advanced sensors into embedded P-3C Update III computer systems.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$1,951) Commenced coding and debugging of Tactical Mission Software (TMS) (software version A4.8).
- (U) (\$2,054) Commenced coding and debugging of Broadband (software version C4.8) capability.
- (U) (\$1,050) Exercised final option for OMNIBUS contract for systems engineering support.
- (U) (\$0) Released Request For Proposal (RFP) to compete OMNIBUS contract.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Tactical Command System (TCS) upgrades the Navy's Command Control, Computer and Intelligence (C3I) systems and processes C3I information for all warfare mission areas including planning, direction and reconstruction of missions for peacetime, wartime and times of crises. Included among these C3I systems are: the unified command centers of CINCPAC and CINCLANT, the Navy Command Center, the fleet command centers of CINCLANTFLT, CINCUSNAVEUR, the Submarine Operating Authority (SUBOPATH), command centers supporting the Ashore Sector Commander, the Fleet Ocean Surveillance Information Centers (FOSICS) and Fleet Ocean Surveillance Information Facilities (FOSIFS), Tactical Flag Command Center (TFCC) afloat and the command and control suites of various combatant ship classes. The TFCC and ship command and control suites have been consolidated in the Navy Tactical Command System - Afloat (NTCS-A)

PROGRAM ELEMENT TITLE: Tactical Command System

program. C3I of Naval aircraft operations afloat and shore are supported by the TCS. Mission planning capabilities will be implemented for air control and attack operations using TCS components in the TAMPS program. All these projects develop information processing and display systems for afloat and ashore commanders providing decision makers the ability to make rapid, informed tactical decisions. TCS develops systems which fuse tactical data between shipboard organic sensors and ashore and space-based non-organic sensors. TCS provides the ashore and afloat pillars of the Copernicus architecture, the interoperability tenants of "C'I for the warrior" and supports the Global Command and Control System (GCCS) architecture. Additionally, TCS supports the Joint Maritime Command Information System (JMCIS) acquisition and development strategy for providing a standard/common operating environment to standardize operational and logistical support. Further, data from the Joint Tactical Information Distribution System (JTIDS), Joint Defense Intelligence Support Services (JDISS) and systems employing the Department of Defense Intelligence Information System (DODIIS) standards are used for the exchange of data with joint and combined forces. The Tactical Aircraft Mission Planning System (TAMPS) is the Naval standard unit level aircraft mission planning system and provides data loading capabilities for all-aviation platforms and subsystems. TAMPS is interoperable with and uses TCS components for data feed.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: These programs are funded under ENGINEERING AND MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

MISSION PLANNING										

### A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

The Tactical Aircraft Mission Planning System (TAMPS) is the Naval standard unit level aircraft mission planning system. It loads data for the following aviation platforms and subsystems: F/A-18, F-14, E-2C, V-22, C-2, KC-130, EA-6B, AV-8B, AH-1, SH-60, MH-53, HH-60, CH-46, VH-1, E-6, ES-3A, P-3A/B, T-45, S-3B, P-3C, High-speed Anti Radiation Missile (HARM), Joint Stand-Off Weapon (JSOW), Joint Directed Attack Munitions (JDAM), Stand-off Land Attack Missile (SLAM), Stores Planning And Weaponizing Module (SPWM), Joint Tactical Information and Distribution System (JTIDS), Global Position System (GPS), ARC-210, ALE-47, ALE-45/50, ALE-67, ALE-39, ALQ-126B, Tactical Aircraft Moving Map System (TAMMS), Forward Area Minefield Planner (FAMP), Naval Special Warfare Mission Planning, and Coast Guard. TAMPS loads the F/A-18 Data Storage Unit (DSU) with route of flight data (way points, sequential steering files) air to air radar presets, Tactical Aircraft Navigation Aid (TACAN) and channel identification files. The DSU in turn provides this TAMPS information to the F/A-18 flight software. Without the TAMPS load of "independent overlays" for the aircraft software and bulk files for missile software, weapons such as SLAM, JSOW and JDAM will be unusable. TAMPS currently is the primary means of loading JTIDS data for the F-14D/E-2C. Future systems such as GPS are planned to use TAMPS for mission planning and data loads. In keeping with the Assistant Secretary of Defense C3I direction, TAMPS has been identified as a migration system. Various platform specific aircraft mission planning systems (e.g., Tactical EA-6B Mission Support System (TEAMS), Map Operator and Maintenance (MOMS), Common Helicopter Aviation Mission Planning System (CHAMPS), MOMS/AV-8B Maintenance Data System, ES-3 Mission Planning System, Tactical Electronic Reconnaissance Processing and Evaluation System (TERPES) are planned to neck down into TAMPS. TAMPS is interoperable with and uses the Joint Maritime Command Information System (JMCIS) for data feeds.

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: Feb 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604231N

PROJECT NUMBER: E2213

PROGRAM ELEMENT TITLE: TACTICAL COMMAND SYSTEMS

PROJECT TITLE: MISSION PLANNING

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS: N/A
2. (U) FY 1995 PLAN: N/A
3. (U) FY 1996 PLAN:

### Unit-Level Mission Planning

• (U) (\$2,635) Develop and integrate TAMPS software upgrade 6.1. Efforts to include: Capability to scan Mapping products; ability to process Intelligence Data Base in Standard Extract Format; study and develop the requirements to integrate with platforms (i.e., ARC-210, F-14, E-2C improvements, and ALE-47); computer based training; training scenarios; automatic route construction; and full duplex security. Continue TAMPS 7.0 architecture studies to integrate TAMPS into the Joint Maritime Command Information System (JMCIS) and Global Command and Control System common operating environment.

TAMPS has a software release strategy which accommodates major and minor releases. A minor release (i.e. TAMPS 6.1, 6.2) is defined as a set of software requirements that does not drive design changes to external Mission Planning Modules (MPMs), but is required to integrate new weapon system and stovepipe mission planning systems. TAMPS plans to conduct annual minor software releases.

A major release (i.e. TAMPS 7.0) is defined as a set of changes to the core TAMPS software architecture that further drive software design changes to external weapon system application modules. Although the basic mission planning functions of TAMPS still exist, a major release is required to implement emerging technology that exceed the existing TAMPS software capabilities but meet fleet requirements (i.e. B1/B2 security, dynamic MPM-MPM communication, etc.). Major software releases will occur approximately every three years.

### Unit-Level Mission Planning

• (\$2599) Develop and integrate TAMPS 6.2. Efforts to include the integration of: SPWM; TAMM functionality; Air-to-Air Warfare module; Electronic Warfare module; JDAM mission planning interface; system security; and ARC-210 full capability for satellite communication interface. Design TAMPS 7.0 software architecture to integrate TAMPS into the JMCIS and GCCS common operating environment, and to interface with the Digital Imagery Workstation to provide support for Precision Guided Munitions.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Tactical Support Centers are nodes of the Navy Command and Control System (NCCS) Ashore, with fixed sites and mobile components (Mobile Operations Control Center (MOCCs)) provide the Maritime Sector Commander (Ashore) with the capability to plan, direct and control the tactical operations of joint and Naval Expeditionary Forces and other assigned units within his respective area of responsibility. These operations include littoral and open ocean surveillance, anti-surface warfare, over-the-horizon targeting, counter-drug operations, power projection, antisubmarine warfare, mining, search and rescue, and special operations. TSCs consist of C'I systems (based on the Joint Maritime Command Information System (JMCIS) common architecture); air-ground, satellite and point-to-point communications systems; sensor analysis capabilities; avionics and weapons system interfaces and facilities equipment. MOCC is a rapidly-deployable, self-contained, take-what-you-need C'I system which can be transported in two fleet-configured p-3 aircraft for contingency operations. The ongoing TSC C' Modernization (TSM) program will: support expeditionary warfare requirements; replace a centralized computer system with Navy-standard desktop computers and a distributed data base on a local area network to provide a fused, all-source tactical data display with detailed source data and relevant tactical decision/planning aids; provide ELINT, imagery and ACINT sensor analysis capabilities; automate communications functions/interfaces and facilitate rapid data exchange with key Navy, joint, other service and allied forces ashore, afloat and airborne; and develop automated interfaces to evolving tactical weapons/sensor/ avionics systems and additional USN/USAF/allied aircraft. This program assures the existing TSC system remains interoperable with updated aircraft, sensors and weapons systems.

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

#### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$25) Continued United States Message Text Formats (USMTF) pre-certification interoperability testing.
- (U) (\$196) Completed DTIIA and update the TMS at TSC Brunswick to an operational test configuration.
- (U) (\$1,111) Integrated TMS 1.0 at all TSC sites with site-specific communications interfaces.
- (U) (\$241) Integrated selected TMS 1.0 software components into a modular configuration which can be used to support TSC forward basing requirements (MOCCs).
- (U) (\$29) Conducted T&E of TSC Components in a MOCC configuration.
- (U) (\$37) Completed the Defense Message System (DMS) Component Approval Process (CAP) for AUTODIN interface.
- (U) (\$45) Achieved interoperability certification for OTH-T/Gold and USMTF message processing.
- (U) (\$110) Complete a systems requirements review and systems design review Increment II (TMS 2.0).
- (U) (\$164) Developed common JMCIS software updates, in conjunction with other programs.
- (U) (\$282) Captured/integrated data server updates and anti-submarine warfare tactical decision aids.
- (U) (\$266) Continued automation of message processing to support AUTODIN, air-to-ground, point-to-point and SATCOM connectivity.
- (U) (\$324) Developed/integrated tactical planning, Preflight Insertion Data (PID), aircrew brief and mission replay interfaces and interoperability updates for improved aircraft support.
- (U) (\$246) Continued development of Sensor Analysis Stations (Inverse Synthetic Aperture Radar (ISAR), Electronic Warfare Support Measures (ESM), Imagery).

PROGRAM ELEMENT: 0604231N

PROJECT NUMBER: X0486

Date: Feb 1995

PROGRAM ELEMENT TITLE: Tactical Command System

BUDGET ACTIVITY: 5

- (U) (\$139) Completed integration of tactical computer-based Link 11 software module and obtain certification on TAC-3.
- (U) (\$972) Completed systems integration, testing, documentation of Incremental Release 1.0.5 to provide: message processing updates, tactical decision aids updates, aircraft interface updates, integrated Link 11 capability, automation of PID and generic mission replay development as applications of the JMCIS Unified Build.
- (U) (\$45) Began OTIIA at TSC Brunswick.
- (U) (\$58) Conducted security certification and support accreditation of Increment I, TMS Release 1.0.
- 2. (U) FY 1995 PLAN:
  - (U) (\$65) Complete OTIIA at TSC Brunswick leading to a Milestone IIIA (Q1 FY95) decision for Fleet Release of TMS 1.0 (1.0.5.x).
  - (U) (\$362) Install Incremental Release 1.X at TSC sites (as part of Milestone IIIA decision).
  - (U) (\$201) Develop common JMCIS software updates, in conjunction with other programs.
  - (U) (\$665) Upgrade data server to: operate on a TAC-3; include additional USMTF, Link 11 message data, technical data (ESM, acoustic, Naval Tactical Data Base (NWTDB)); capture and apply trusted software technology, if available.
  - (U) (\$244) Capture/integrate tactical decision aids updates.
  - (U) (\$376) Develop/integrate a TMS Local Area Network (LAN) interface to the Fast Time Analysis System (FTAS-- acoustic processor) for improved post mission data analysis and reconstruction.
  - (U) (\$264) Start to develop/integrate an ESM Analysis Workstation.
  - (U) (\$201) Start to develop/integrate Tactical Environmental Support System (TESS) interface.
  - (U) (\$93) Capture/integrate a Common User Data Information Exchange System (CUDIXS) interface capability.
  - (U) (\$269) Continue development/integration of communications automation to include an integrated technical

### control capability.

- (U) (\$1,197) Begin system integration, testing, documentation, training for Objective II (Incremental Fleet Release 1.1.2) to incorporate updated mission planning, communication, and post mission analysis capabilities, as well as interoperability among post-mission analysis, aircrew brief, PID, and tactical planning modules in both TSC and MOCC configurations.
  - (U) (\$390) Conduct DT IIB and update TSC Brunswick to an operational text configuration.
  - (U) (\$34) Provide security certification of Incremental Release 2.0.
3. (U) FY 1996 PLAN:
- (U) (\$130) Update common JMCIS software, in conjunction with other programs.
  - (U) (\$463) Continue to upgrade data server to operate on standard tactical computer workstations; include additional USMTF, Link 11 message data, and technical data (Electronic Warfare Support Measures (ESM), acoustic, NWTDB).
  - (U) (\$167) Capture/integrate tactical decision aids updates.
  - (U) (\$67) Capture and apply available trusted software technology and improvements.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Navy Tactical Command System-Afloat (NTCS-A) program consolidates the formerly identified Tactical Flag Command Center (TFCC), Afloat Correlation System (ACS), Electronic Warfare Coordination Module (EWCN), Prototype Ocean Surveillance Terminal (POST), Joint Operational Tactical System (JOTS), and Naval Intelligence Processing System (NIPS) programs and provides a tactical command, control, communications, computers and intelligence (C'I) system to U. S. Navy Ships under a single unifying architecture called JMCIS (Joint Maritime Command Information System). NTCS-A provides the TFCC pillar of the Copernicus Architecture to Joint Task Force Commanders (JTFC), Numbered Fleet Commanders (NFC), Officers in Tactical Command (OTC), Composite Warfare Commanders (CWC), Subordinate Warfare Commanders (SWC), Commander Amphibious Task Force (CAFF), Commander Landing Force (CLF), and Commanding Officers/Tactical Action Officers (CO/TAO). It also integrates both joint and service-unique command and control projects in order to support joint task force and Navy afloat requirements. Efforts include design, integration, and test of Tactical Decision Aids (TDAs) and Tactical Intelligence Analytical Aids (TIAAs), in a multi-level secure mode to provide the Battle Group/Force Commanders with warfighting Command and Control capabilities. The Theatre Ballistic Missile Defense (TBMD) Program is being developed to support USACOM's Joint Task Force 95 exercise onboard USS EISENHOWER, USS MT WHITNEY, USS LASALLE, and at U.S. Army Command.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$1,320) Continued to support the tenets of the Copernicus Architecture, C'I for the Warrior and the Global Command and Control System by fully developing and implementing the open systems architecture support as consolidation of C' programs into NTCS-A. Investigated the architecture necessary to support distributed data base access to all fleet users to support the "Pull" tenet of the Architectures.
- (U) (\$200) Completed development of downsized JOTS. Tested downsized JOTS at sea and in the field.
- (U) (\$1,760) Developed integration and testing of the FY 1994 unitary software base (OPEVAL UB 2.0).
- (U) (\$640) Continued to develop C'I TDAs and conducted advanced integration testing.

DATE: Feb 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604231N

PROJECT NUMBER: X0709

PROGRAM ELEMENT TITLE: TACTICAL COMMAND SYSTEM

PROJECT TITLE: NTCS-A

- (U) (\$538) Continued to integrate additional video source information into NTCS-A. Initiated integration of all digital imagery products such as TAMPS, DS, JDISS and PIES into an Imagery LAN based on NTCS-A Imagery Exploration Workstation (NIEWS) architecture. Initiated software development to incorporate multi-media (i.e., imagery, audio and cable grade video) capability into workstation.
  - (U) (\$1,100) Continued development of (C'WC) Command, Control Warfare Commander and Cryptologic support and analysis.
  - (U) (\$150) Continued the incorporation of necessary aspects of multi-level security in the NTCS-A system.
  - (U) (\$500) Continued NTCS-A/Joint Maritime Command Information System (JMCIS) development to include full SCI JOTS/NIPS. Merged functionality and video distribution capabilities of closed circuit TV into NTCS-A. Test NTCS-A/JMCIS at sea and complete the integration of CCTV.
  - (U) (\$640) Integrated functionality of Cryptologic Combat Work Station (CCWS) into NTCS-A.
  - (U) (\$120) Initiated integration of USMC Extended Position Location Reporting System (EXPLRS) into NTCS-A/JMCIS.
  - (U) (\$490) Initiated development of advanced TDAs in Anti-Air Warfare (AAW).
  - (U) (\$1000) Provided theater ballistic Missile early indications and warning in the projected impact area.
2. (U) FY 1995 PLANS:
- (U) (\$1,605) Develop, integrate and test the FY 1995 software release.
  - (U) (\$1,000) Initiate development of Artificial Intelligence (AI) analysis tools for incorporation into GENSER and SCI software for analyst workstations.
  - (U) (\$1,290) Complete development and integration of Cryptologic Combat Support software tools.
  - (U) (\$200) Incorporate advanced mapping and geodesy capabilities into NTCS-A.
  - (U) (\$1,838) Continue the incorporation of necessary aspects of multi-level security within the NTCS-A system.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: Feb 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604231N

PROGRAM ELEMENT TITLE: TACTICAL COMMAND SYSTEM

PROJECT NUMBER: X0709

PROJECT TITLE: NTCS-A

- (U) (\$1,500) Continue development of the architecture necessary to support distributed world-wide database access to all fleet users to support the "PULL" tenet of the Copernicus Architecture.
- (U) (\$4,050) Initiate integration of Marine Corps, USAF and other joint intelligence systems into NTCS-A/JMCIS to meet DOD standardization requirements.
- 3. (U) FY 1996 PLAN:
  - (U) (\$1,233) Develop, integrate and test FY 1996 software release.
  - (U) (\$726) Continue development of Artificial Intelligence (AI) analysis tools for incorporation into GENSER and SCI software for analyst workstations.
  - (U) (\$2,172) Develop and implement segment applications software in an open systems architecture to include integration of joint C'I requirements working toward a common/consistent joint tactical picture consistent with JCS mandated GCCS standards.
  - (U) (\$454) Refine the Joint Force Air Component Command (JFACC) interfaces to JMCIS.
  - (U) (\$998) Continue integration and test of multi-level security capabilities in the NTCS-A system.
  - (U) (\$1,089) Continue development of the architecture to support world wide data base access to all fleet users to support the "PULL" tenet of the Copernicus Architecture and joint C'I for the warfighter.
  - (U) (\$907) Continue investigation and development of Marine Corps, Coast Guard, USAF and other Joint Command Control, Intelligence and Imagery systems interfaces with NTCS-A/JMCIS to meet DOD standardization requirements.
  - (U) (\$635) Procure development hardware to support hardware evaluation and software development.
  - (U) (\$727) Develop and test computer based training (CBT) modules for newly developed segment applications software.
- 4. (U) FY 1997 PLAN:
  - (U) (\$1,065) Develop integrate and test FY 1997 software release.

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: Feb 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604231N

PROGRAM ELEMENT TITLE: TACTICAL COMMAND SYSTEM

PROJECT NUMBER: X0709  
PROJECT TITLE: NTCS-A

- (U) (\$437) Continue development of Artificial Intelligence (AI) analyses tools for incorporation into GENSER and SCI software for analyst workstations.
- (U) (\$1,890) Continue development and implementation of segment applications software in a GCCS compliant open system architecture to include integration of joint C'I requirements working toward a common/consistent joint tactical picture.
- (U) (\$509) Implement and test Joint Force Air Component Commander (JFACC) hardware and software interfaces with NTCS-A/JMCIS.
- (U) (\$800) Continue integration and test of multi-level security capability in the NTCS-A/JMCIS system.
- (U) (\$873) Continue to develop the architecture to support world wide data base access to all fleet users to support the full tenet of the Copernicus Architecture.
- (U) (\$727) Continue investigation and development of Marine Corps, Coast Guard and other Joint Command, Control, Intelligence and Imagery systems interface with NTCS-A/JMCIS to meet DOD standardization requirements.
- (U) (\$437) Procure development hardware to support hardware evaluation and software development.
- (U) (\$509) Develop and test Computer Based Training (CBT) modules for newly developed segment applications.

## B. (U) PROGRAM CHANGE SUMMARY:

(U) FY 1995 President's Budget:	<u>FY 1994</u>	<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>
	7,458	11,798		
(U) FY 1995 Appropriated:		11,798		
(U) Adjustments from Appropriated/FY95 President's Budget	1,000	-315		
(U) FY 1996/97 PRESBU DG Submit:	8,458	11,483	8,941	7,247

## (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: The FY94 funding increase in FY 1994 (\$1,000K) to allow for the development and demonstration of a JMCIS Theater Ballistic Missile Defense (TBMD) segment and wide-area network using SHF Satellite Communications. The funding reductions in FY 1995 to accommodate SBIR (\$-178) Travel, (\$-16), CSS Reduction (\$-102) and a University Research reduction of (\$-19).

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Ocean Surveillance Information System (OSIS) Baseline Upgrade (OBU) development is a subsystem of the Navy Command and Control System (NCCS) Ashore. OBU provides for the analysis of intelligence information from multiple sources to produce a comprehensive report of foreign forces and potential hostile activity. The system is required to be able to generate multiple, automated near-real-time event-by-event (NRT EBE) data streams at various classification/releasability levels, tailorable to unique customer requirements and capable of being transmitted over multiple communications paths (including DSNET) simultaneously. In addition, it is required to provide near-real-time (NRT) all-source fusion, correlation and analysis tools (including robust graphics presentation and geospatial analysis capabilities), directly feeding automated reporting capabilities. OSIS provides positional data and operational intelligence to commanders at all levels. It consists of two Joint Intelligence Centers, one Joint Intelligence Center Detachment, and one Fleet Ocean Surveillance Information Facility (FOSIF), a software support activity, and a training site. OBU functions encompass establishing and maintaining characteristics and performance data on hostile weapons platforms systems, collecting non-organic data from ashore and afloat sensors, developing an all-source tactical picture, and analyzing intelligence information. The data derived from this process is disseminated as an Operation Intelligence (OPINTEL) product to the operating forces for tactical threat warnings, decision making support, and support of Over-the-Horizon-Targeting.

(U) OBU uses the Joint Logistics Commander's Guidance of March 1987 on Evolutionary Acquisition (EA) as the strategy for future software development which includes a plan for incremental achievement of desired capability building on the core system provided by OBU Phases I and II. The OBU Phase III EA strategy will provide a mechanism for adding future capabilities including the incorporation of proven fleet initiated prototypes.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$50) Conducted DT-IID for major OBU upgrades.
- (U) (\$100) Conducted OT-IID for major OBU upgrades.
- (U) (\$500) Continued to develop prototype and update baseline.
- (U) (\$300) Continued evaluation of prototype functional enhancements.
- (U) (\$400) Completed workstation upgrade.
- (U) (\$292) Continued Phase III software development.
- (U) (\$500) Commence transition to file server architecture.

### 2. (U) FY 1995 PLAN:

- (U) (\$400) Continue to develop prototype and update baseline.
- (U) (\$355) Continue evaluation of prototype functional enhancements.
- (U) (\$300) Continue Phase III software development.
- (U) (\$650) Continue transition to file server architecture.
- (U) (\$300) Address OT-IID discrepancies.
- (U) (\$635) Begin software development to meet Joint interoperability standards.

### 3. (U) FY 1996 PLAN:

- (U) (\$350) Conduct DT-IIE and OT-IIE for major OBU upgrades.
- (U) (\$1,438) Continue to develop and prototype software to evolve baseline to a secure UNIX environment.

## FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: Feb 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604231N

PROJECT NUMBER: X2041

PROGRAM ELEMENT TITLE: Tactical Command System

PROJECT TITLE: OSS

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM Cont.
X2041 OSS	11,215	11,392	7,365	6,864	7,492	7,875	8,041	8,510	Cont.	Cont.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Chief of Naval Operations (CNO), Fleet Commanders in Chief (CINCs) and Unified Commanders (USCINCLANT and USCINCPAC) require a single, integrated command and control system at the Navy Command Center (NCC), Fleet Command Centers (FCC), and the Unified Command Centers, respectively, to receive, process, display and assess the readiness and disposition of own, neutral, and potentially hostile forces. The OSS Program uses the Joint Logistics Commanders Guidance of March 1987 on Evolutionary Acquisition (EA) as the strategy for development. The EA concept includes a plan for incremental achievement of desired capability, early fielding of initial incremental operational capability and continual feedback from the users. OSS Increment I integrates existing prototype command center support systems on a Local Area Network (LAN) and provides a baseline command center support capability to designated OSS sites. Increment II will develop an integrated, logistically supportable, and cost effective single system, which includes Ocean Surveillance Information System (OSIS) Baseline Upgrade (OBU) interface, Navy Worldwide Military Command and Control System (WWMCCS) Software Standardization (CASREP), Movement Reporting (MOVREP), and Employment Scheduling (EMPSKD) current system (SORTS), Casualty Reporting (CASREP), Movement Reporting (MOVREP), and Employment Scheduling (EMPSKD) current system remote users. Increment III will transition Shore Targeting Terminal (STT) and Force High Level Terminal (FHLT) functionality to OSS and will incorporate Employment Scheduling System (ESS) and Information Presentation and Distribution System (IPDS) capabilities. Increment IV (FY 96-99) will continue the evolutionary development of OSS in response to emergent Joint and Navy C'I requirements, the changing threat and new technology. Multi-Level Security (MLS) features will be incorporated as they become commercially available. International, as well as intra and inter-service Command, Control, Communication and Computer integration, will be established and achieved through the implementation of OSS at selected NATO and U.S. Navy sites and Unified Commands. OSS is being developed and implemented in conjunction with the open system C'I For The Warrior (C'I FTW), Global Command and Control System (GCCS) and Joint Maritime Command Information System (JMCIS) architectures.

PROJECT TITLE: OSS

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

#### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$1,750) Incrementally tested and fielded Release 93-1 containing CASREP, MOVREP, SORTS and EMPKSD features as well as priority NCRs from previous releases.
- (U) (\$400) Completed design documents and implementation plans for completing the transition of NWSS to OSS.
- (U) (\$250) Performed system engineering and software design and conducted Critical Design Reviews (CDRs) on remaining Increment II components to be included in future OSS/JMCIS releases.
- (U) (\$1,454) Developed, tested and fielded incremental FHLT and STT capabilities at Shore ASW Command Centers (SACCS) and Submarine Operational Command Centers (SOCCs), respectively.
- (U) (\$625) Developed and implemented a comprehensive scheduling capability as part of ESS for use by Fleet schedulers at the Type, Group and Unit Commander Level.
- (U) (\$775) Performed system engineering and analysis to upgrade and extend the OSS LANs to a Government Open Systems Interconnect Profile (GOSIP) compliant architecture in conjunction with IPDS.
- (U) (\$1,650) Continued enhancing Unified Build software to satisfy OSS requirements; integrated successive UB versions into OSS baseline.
- (U) (\$300) Integrated Tactical Decision Aids (TDAs) and Artificial Intelligence (AI) applications developed through other programs.
- (U) (\$425) Continued IPDS development for other OSS sites.
- (U) (\$275) Continued database integration and standardization efforts including architecture coordination, internal data content and format consolidation.
- (U) (\$500) Participated in Global Command and Control System (GCCS) prototyping efforts.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: Feb 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT:

0604231N

PROGRAM ELEMENT TITLE: Tactical Command System

PROJECT NUMBER: X2041

PROJECT TITLE: OSS

- (U) (\$450) Began design for complete OSS site inter-connectivity for Diagnostics, Software Code Transfer and other Data exchange.
  - (U) (\$335) Continued integrating TAC-3 products and state-of-the-art large screen displays, video switches and briefing technology into the OSS architecture.
  - (U) (\$1,221) Continued evolution of OSS into GCCS, C'IFTW and JMCIS architectures.
  - (U) (\$575) Conducted Navy and Joint Interoperability Certification Tests.
  - (U) (\$105) Explored requirements for expanding the scope of OSS to include additional Joint, Allied (NATO and other), Foreign (through FMS cases) and Navy users. Continued execution of Cooperative Development MOA with SACLANT.
  - (U) (\$125) Developed and implemented Joint requirements in support of the USCINCPAC Command Center Improvement Program (CCIP), Joint Crisis Management System (JCMS)/Joint Crisis Analysis Tools (JCAT) and Theater Command and Control System (TCCS).
2. (U) FY 1995 PLAN:
- (U) (\$460) Conduct Developmental Testing, Interoperability testing and Operational Testing (OT-IIB) on OSS increment II (NWSS transition to OSS complete) and resolve outstanding deficiencies.
  - (U) (\$1,950) Complete development and testing of any remaining Increment II functionality required to satisfy outstanding Navy Command and Control Systems Change Requests (NCRs) and emergent user requirements. Release 95-1 will be the final Increment II release.
  - (U) (\$1,500) Continue developing, testing and fielding incremental FHLT, STT (OSS replacements) and ESS upgrades.
  - (U) (\$210) Explore requirements for expanding the scope of OSS to include additional Joint, Allied (NATO and other), Foreign (through FMS cases) and Navy users. Continue execution of Cooperative Development with SACLANT.

## FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: Feb 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT:

0604231N

PROGRAM ELEMENT TITLE: Tactical Command System

PROJECT NUMBER: X2041

PROJECT TITLE: OSS

- (U) (\$650) Continue to integrate/analyze OSS sites in conjunction with TAC-3/TAC-4 hardware upgrades, and state-of-the-art displays, video distribution systems and briefing aids (including multimedia, 3-D visualization and very high resolution images). Continue security engineering efforts.
  - (U) (\$1,250) Continue enhancing UB software to satisfy OSS requirements; integrate successive UB releases into OSS baseline.
  - (U) (\$2,488) Continue integrating OSS into the GCCS, C'IFTW, and JMCIS architectures.
  - (U) (\$750) Continue efforts to improve distribution of data between OSS sites, provide seamless access of disparate and separate databases, and improve the depth, quality and type of data available to OSS users.
  - (U) (\$685) Continue efforts to improve and extend OSS network throughout command center/headquarters at all OSS sites. Continue development of network prototypes, and perform modelling and analysis of LANs, Wide Area Networks (WANs) and Metropolitan Area Networks (MANs).
  - (U) (\$150) Commence efforts to incorporate super computer and/or parallel processor solutions into OSS to improve system performance.
  - (U) (\$150) Continue systems engineering and prototype development on AI/Expert System driven decision aids to provide real time decision making support to operational commanders.
  - (U) (\$724) Perform Navy and Joint Interoperability Certification Tests and resolve technical deficiencies.
  - (U) (\$175) Develop and upgrade joint requirements in support of the CCIP, JCMS/JCAT and TCSS.
  - (U) (\$250) Perform system engineering and analysis to upgrade the OSS LAN to a GOSIP compliant architecture in conjunction with IPDS.
3. (U) FY 1996 PLAN:
- (U) (\$250) Conduct Developmental Testing and Beta Testing on OSS software releases.

- (U) (\$585) Continue developing, testing and fielding incremental FHLT, STT and ESS prototype upgrades to reach full functional baseline.
- (U) (\$150) Develop integrated interface using a common architecture for OSS users to existing DOD Databases.
- (U) (\$200) Continue to explore requirements for expanding the scope of OSS to include additional Joint, Allied NATO and other), Foreign (through FMS cases) and Navy users. Continue execution of Cooperative Development with SACLANT.
- (U) (\$200) Continue implementation of appropriate MLS features.
- (U) (\$300) Continue to integrate/analyze OSS sites in conjunction with COTS hardware upgrades, and state-of-the-art displays, video distribution systems and briefing aids (including multimedia, 3-D visualization and very high resolution images). Continue security engineering efforts.
- (U) (\$950) Continue enhancing Unified Build (UB) software to satisfy OSS requirements; integrate successive OSS releases into JMCIS baseline.
- (U) (\$1,530) Maintain OSS/JMCIS architectural compatibility with GCCS, C'I For the Warrior (C'IFTW) and JMCIS.
- (U) (\$150) Continue to develop and upgrade joint requirements in support of the CCIP, JCMS/JCAT and Theater Command Control System (TCCS).
- (U) (\$50) Participate in GCCS prototyping efforts.
- (U) (\$1,100) Complete testing of any remaining Increment III functionality required to satisfy outstanding Navy Command and Control Systems Change Requests (NCRs) and emergent user requirements.
- (U) (\$300) Continue to address emergent Navy and Joint C'I requirements for Ashore Command Centers.
- (U) (\$250) Continue to incorporate state-of-the-art technologies such as distributed databases, virtual reality and interactive video.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: Feb 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT:

0604231N

PROGRAM ELEMENT TITLE: Tactical Command System

PROJECT NUMBER: X2041

PROJECT TITLE: OSS

- (U) (\$250) Begin interfacing and integration with readiness data from other Navy sources.
- (U) (\$350) Implement detailed PC EMPSKD message capability to assist units to create error free CASREP, SORTS and MOVREP messages.
- (U) (\$200) Study USN message and data flow. Recommend changes as necessary.
- (U) (\$150) Continue efforts to incorporate super computer and/or parallel processor solutions into OSS to improve system performance.
- (U) (\$150) Continue systems engineering and prototype development on AI/Expert System driven decision aids to provide real time decision making support to operational commanders.
- (U) (\$250) Perform Navy and Joint Interoperability Certification Tests and resolve technical deficiencies.

### 4. (U) FY 1997 PLAN:

- (U) (\$450) Conduct Developmental Testing and Beta Testing on OSS software release.
- (U) (\$200) Complete testing and fielding of FHLT, STT and ESS prototype upgrades to reach full functional baseline.
- (U) (\$200) Continue to explore requirements for expanding the scope of OSS to include additional Joint, Allied (NATO and other), Foreign (through FMS cases) and Navy users. Continue execution of Cooperative Development with SACLANT.
- (U) (\$200) Develop integrated interface using a common architecture for OSS users to existing DOD Databases.
- (U) (\$200) Continue implementation of appropriate MLS features.
- (U) (\$300) Continue to integrate/analyze OSS sites in conjunction with COTS hardware upgrades, and state-of-the art displays, video distribution systems and briefing aids (including multimedia, 3-D visualization and very high resolution images). Continue security engineering efforts.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Shipboard Tactical Intelligence Processing System (STIP) is an integrated tactical intelligence shipboard processing system which is the central database for the Tactical Flag Command Center (TFCC), Space and Electronic Warfare Commander (SEWC) and tactical mission planning systems. Development of this integrated database server provides for data distribution (dynamic update of Naval Warfare Tactical Database NWTDB) and military integration with digital map and imagery systems. STIP began interface development with the Joint Services Imagery Processing - Navy (JSIPS) in FY 1990.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$2,075) Completed development of CDBS/AMH and intelligence applications for NTCS-A 2.1.
- (U) (\$481) Commenced development of CDBS/AMH and applications for NTCS-A 3.0.
- (U) (\$240) Completed NIPS/DIWS integration and test.
- (U) (\$337) Commenced integration and testing of Marine Corps systems.
- (U) (\$567) Completed integration and testing of advanced digital imagery processing capabilities into NTCS-A 2.1.
- (U) (\$385) Commenced development of real time updates to CDBS/AMH.
- (U) (\$150) Commenced integration of CD ROM scanner multimedia devices into NTCS-A.
- (U) (\$150) Commenced integration of compartmented mode workstation functionality into NIPS/NTCS-A.
- (U) (\$335) Commenced integration and testing of mission planning systems requirements.

PROJECT TITLE: STIP

## 2. (U) FY 1995 PLAN:

- (U) (\$350) Continue developments and integration of multimedia capabilities into NTCS-A.
- (U) (\$828) Continue development of database support for TDAs in the CDBS.
- (U) (\$830) Complete integration of mission planning requirements into the CDBS.
- (U) (\$586) Complete integration of Marine Corps requirements into NTCS-A.
- (U) (\$585) Develop, integrate and test advanced digital image processing capabilities into FY 95 software release.
- (U) (\$1,483) Develop, integrate and test CDBS/AMH and intelligence applications into FY 95 software release.
- (U) (\$150) Continue integration of compartmented workstation functionality.

## 3. (U) FY 1996 PLAN:

- (U) (\$768) Develop, integrate and test CDBS/AMH and intelligence applications for FY96 software release.
- (U) (\$644) Develop, integrate and test advanced digital imagery applications for FY96 software release.
- (U) (\$332) Continue to develop and integrate multimedia display technology into Video Display System.
- (U) (\$166) Complete integration and test of compartmented mode workstation.
- (U) (\$375) Continue development of data base support for TDAs on the CDBS.
- (U) (\$332) Commence development of object oriented data base.
- (U) (\$166) Commence investigation and development of CIO, USMC, USCG, USAF, USA and other joint intelligence and imagery systems interfaces with NTCS-A to meet DOD standardization requirements.

## 4. (U) FY 1997 PLAN:

- (U) (\$1,433) Develop, integrate and test CDBS/AMH and intelligence applications for FY97 software release.

### (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

(U) (H0480) - This project provides improved air Anti-Submarine Warfare (ASW) mission effectiveness through engineering development of hardware and software associated with acoustic systems, sensors, processing, post-processing, data recording and displays for air ASW platforms. Key objectives: improved detection, classification, localization and tracking; and increased capacity and flexibility to handle multi-sensor data. Programs being funded during the period identified are the Acoustic Intercept System (AIS) which is a full spectrum acoustic processor and the Generic Acoustic Stimulator System (GASS) which is an ocean, sensor and target-modeling combination that will couple with all ASW trainers. Future programs planned for this project include the Shallow Water ASW Localization and Attack System (SWALAS) to provide improved localization and attack in regional conflict environments and the Advanced Extended Echo Ranging (AEER) system to provide an improved bistatic acoustic source for harsh water environments. Acoustic Intercept System (AIS) terminated in FY94.

(U) (H2000) - The Air Deployed Active Receiver (ADAR) sonobuoy is an expendable air-launched acoustic receiver utilized by ASW aircraft. The ADAR sonobuoy functions as the acoustic receiver for the Improved Extended Echo Ranging (IEER) system. IEER is a mono/multistatic acoustic sensor system that utilizes an ASW aircraft, supporting acoustic source, and acoustic receiver in a coordinated ASW search and surveillance mission against conventionally powered submarines operating in shallow water environments as well as all submarines capable of operating in deep water. The ADAR Sonobuoy will also be capable of functioning in a passive mode to track high speed targets.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project provides improved air Anti-Submarine Warfare (ASW) mission effectiveness through engineering development of hardware and software associated with acoustic systems, sensors, processing, post-processing, data recording and displays for air ASW platforms. Key objectives: improved detection, classification, localization and tracking; and increased capacity and flexibility to handle multi-sensor data. Programs being funded during the period identified are the Acoustic Intercept System (AIS) which is a full spectrum acoustic processor and all ASW trainers. Future programs planned for this project include the Shallow Water ASW Localization and Attack System (SWALAS) to provide improved localization and attack in regional conflict environments and the Advanced Echo Ranging (AEER) system to provide an improved bistatic acoustic source for harsh water environments. The Acoustic Intercept System (AIS) was terminated in FY94 because of affordability.

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

#### 1. (U) FY 1994 ACCOMPLISHMENTS:

(U) AIS

- (U) (\$2,091) Cost incurred at termination.
- (U) (\$1,100) Fully fund the ongoing Environmental Models (GFE/GFI) development for GASS.
- (U) (\$1,900) Transfer to the Air Deployed Active Receiver (ADAR), Project H2000, to fully fund software integration contracts to complete the detail design and coding of the S-3B/ADAR system.
- (U) (\$2,099) Reprogrammed internally within program element.

## 1. (U) FY 1994 ACCOMPLISHMENTS: (continued)

(U) GASS

- (U) (\$3,015) Initiated prototype lab demonstration.
- (U) (\$956) Commence development of Government Furnished Equipment (GFE) environmental software modifications.
- (U) (\$2,148) Prepared Engineering & Manufacturing Development (EMD) solicitation for pre-production units.
- (U) (\$1,631) Other engineering and contract support services.

## 2. (U) FY 1995 PLAN:

(U) GASS

- (U) (\$1,285) Complete prototype lab demonstration and analysis.
- (U) (\$667) Prototype transition to support government labs.
- (U) (\$1,078) Continue development of GFE environmental software.
- (U) (\$1,490) Other engineering support and contract support services.

## 3. (U) FY 1996 PLAN:

(U) GASS

- (U) (\$379) Continue development of GFE environmental software.
- (U) (\$400) Complete EMD contract source selection.
- (U) (\$100) Complete prototype transition.

PROJECT NUMBER: H0480

PROGRAM ELEMENT TITLE: Acoustic Search Sensors

PROJECT TITLE: ASW Sensors & Processing

## (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: The FY 1994 budget was decreased \$1,924K for end-of-year execution update. The FY 1995 decrease of \$8K reflects the allocation of undistributed adjustments.

(U) Schedule: GASS Prototype demonstration has been extended to complete in 3Q/95 vice 4Q/94. MS II slipped from 2Q/95 to 1Q/97 and EMD contract award from 3Q/95 to 1Q/97. Program has been restructured due to funding reductions and technical problems, i.e., design changes, integration of the ADAR, and testing of the GASS prototype.

(U) Technical: Not applicable.

C. (U) OTHER PROGRAM FUNDING SUMMARY: (Dollars in thousands) - Not applicable.

BUDGET ACTIVITY: 05

PROGRAM ELEMENT: 0604261N

PROJECT NUMBER: H2000

PROGRAM ELEMENT TITLE: Acoustic Search Sensors

PROJECT TITLE: Air Deployed Active Receiver

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
H2000 Air Deployed Active Receiver (ADAR)	13,975	13,896	8,477	6,387	452	10	0	0	0	79,522

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Air Deployed Active Receiver (ADAR) sonobuoy is an expendable air-launched acoustic receiver utilized by ASW aircraft. The ADAR sonobuoy functions as the acoustic receiver for the Improved Extended Echo Ranging (IEER) system. IEER is a mono/multistatic acoustic sensor system that utilizes an ASW aircraft, supporting acoustic source, and acoustic receiver in a coordinated ASW search and surveillance mission against conventionally powered submarines operating in shallow water environments as well as all submarines capable of operating in deep water. The ADAR sonobuoy will also be capable of functioning in a passive mode to track high speed targets.

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

#### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$6,025) Completed EMD contractor subassembly design and 90% of subassembly Contractor Engineering Tests (CETs).
- (U) (\$1,884) Completed ADAR/ACAP Critical Design Review (CDR). Completed performance enhancement redesign for detection algorithms and classifier. Initiated code and test.
- (U) (\$2,256) Completed S-3B/ADAR System Design Review (SDR). Completed requirements for display man-machine-interface improvements. Updated requirements documentation.
- (U) (\$3,810) Continued other engineering support and contractor support services.

### BUDGET ACTIVITY:

PROGRAM ELEMENT: 06040261N

PROJECT NUMBER: H2000

PROGRAM ELEMENT TITLE: Acoustic Search Sensors

PROJECT TITLE: Air Deployed Active Receiver

### 2. (U) FY 1995 PLAN:

- (U) (\$6,537) Complete EMD contractor subassembly and full-up airdrop CETs and PDR. Initiate airdrop Contractor Development Tests (CDTs).
- (U) (\$1,432) Complete ADAR/ACAP code, unit and module test. Initiate Independent Verification and Validation (IV&V) test.
- (U) (\$2,669) Complete S-3B/ADAR high level and detail design. Initiate code and unit test.
- (U) (\$3,258) Continue other engineering support and contractor support services.

### 3. (U) FY 1996 PLAN:

- (U) (\$4,380) Complete airdrop CDTs. Complete EMD Contractor CDR and initiate build and delivery of TECHEVAL/OPEVAL test units.
- (U) (\$2,769) Complete ACAP and S-3B subsystems and integrate ADAR/ACAP into the S-3B/ADAR system. Initiate S-3B/ADAR system test and flight test.
- (U) (\$1,328) Provide other engineering support and contract support services.

### 4. (U) FY 1997 PLAN:

- (U) (\$900) Complete build and delivery of TECHEVAL and OPEVAL test units.
- (U) (\$1,115) Complete S-3B/ADAR integration test and flight test.
- (U) (\$1,965) Conduct TECHEVAL.
- (U) (\$2,407) Provide other engineering support and contract support services.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program element funds the development of a replacement aircraft to meet the medium lift needs of the United States Marine Corps (USMC) and the special operations needs of the United States Special Operations Command (USSOCOM). Project W2088, the Medium Lift Replacement (MLR) program funded (FY94 and prior) trade studies to define alternate designs to meet the MLR operational requirement.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT (EMD) because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The V-22 program is designed to provide an aircraft to meet the medium lift amphibious/vertical assault needs of the USMC and the special operations needs of the USSOCOM. The aircraft will be capable of operations from aviation and air capable ships, as well as from unimproved landing sites throughout the world. The tiltrotor aircraft combines the speed, range and fuel efficiency normally associated with turboprop aircraft with the vertical take-off/landing and hover capabilities of helicopters. The special operations aircraft (CV-22) will consist of the baseline V-22 aircraft (MV-22) configuration plus a terrain following radar, additional fuel tanks, radios and flare/chaff dispensers, radar jammer and warning receiver, and infrared counter measures. The CV-22 will be approximately 90% common with the MV-22. Beginning in FY 1996, Project H1425 funds both the MV-22 and CV-22 research, development, test and evaluation efforts.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) Predominance of FY 1994 efforts were financed with FY 1993 funds.
- (U) (\$650,437 of FY 1993 funds) The basic MV-22 EMD contract was definitized on 3 May 1994 at a total price of \$2,650 million.
- (U) (\$64,119 of FY 1993 funds & \$5,473 of FY 1994 funds) Funds used to support in-house planning, management, engineering, test and evaluation efforts, and contracted engineering technical services and logistics support services. Developed an integrated Navy/USSOCOM program plan and cost estimate. Conducted a Cost and Operational

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604262N

PROJECT NUMBER: H1425

PROGRAM ELEMENT TITLE: V-22

PROJECT TITLE: V-22

Effectiveness Analysis (COEA), a cost reduction study, and an independent technical and schedule risk assessment. Completed preliminary design review (PDR) in April 1994. FY 1994 testing included OTIIA, flight envelope expansion tests and artificial icing trials utilizing two modified FSD aircraft. Completed inlet and rotor anti-icing testing at -5 and -10 degrees centigrade.

- (U) (\$4,990 of FY 1994 USSOCOM funding) Issued a study contract to begin CV-22 configuration development and design risk assessment.
  - (U) (\$0) MS II+ Defense Acquisition Board (DAB) review held on 13 September 1994.
2. (U) FY 1995 PLAN:
- (U) (\$407,854) Continue contract efforts related to the EMD program, including the fabrication/assembly of E&MD aircraft. Begin Fatigue Test Article (FTA) effort. MV-22 Critical Design Review (CDR) successfully completed on 14 December 1994.
  - (U) (\$44,867) Support in-house/Navy flight test activities, integrated test teams (ITTs), integrated product teams (IPTs), support equipment development, logistics and training activities, the manned flight simulator and numerous other development and test efforts at the government's in-house activities.
  - (U) (\$3,691 of FY 1994 funding) Fund engine testing and development of support material list. Fund procurement of Government Furnished Equipment (GFE).
  - (U) (\$9,310 of FY 1994 USSOCOM funding) Modify EMD contract to include CV-22 requirements related to preliminary design and fund in-house planning efforts.
3. (U) FY 1996 PLAN:
- (U) (\$709,845) Continue contract efforts related to the EMD program, including the fabrication/assembly and ground testing of EMD aircraft and GFE integration. Begin Navy funding of CV-22 efforts, including the ordering of a fifth EMD aircraft.

(U) Adjustments from Appropriated/FY 1995 PRESBUDG:	+3,999	-14,209	XXX	XXX
(U) FY 1996/97 PRESBUDG Submit:	9,164	452,721	762,548	580,929

### (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: The FY 1994 increase of \$3,999K was primarily used to conduct a COEA, cost reduction study, and an independent program assessment. The FY 1995 decrease of \$14,209K reflects Congressional undistributed reductions (University Research, Consulting Services, travel, and Small Business Innovation Research).

(U) Schedule: Schedule changed to include CV-22 milestones.

(U) Technical: Not applicable.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Aircrew Systems Development program provides engineering and manufacturing development (EMD) of Aviation Life Support Systems to protect aircrews from current known and future threats including: directed energy weapons, chemical/biological/radiological agents/fallout, ballistic projectiles, temperature extremes, heat/fire, low concentration oxygen environments, high dynamic forces during emergency egress, and high "G" forces. The program also provides development for the following capabilities: head protection, inflight restraint, emergency egress and descent, escape and evasion, survival and rescue, and anthropometric sizing for female aircrew. Acquisition initiatives include competition, the application of streamlining, use of nondevelopment items (NDI), joint and tri-service developments, and the pursuit of NATO/allied cooperative ventures to expedite introduction into Navy and Marine Corp fixed and rotary wing aircraft, reduce costs, and promote commonality.

## (U) SUBPROJECTS:

- (U) ESCAPE AND CRASH SAFETY: Naval Aircrew Common Ejection Seat Pre-Planned Product Improvement (NACES P'I), Advanced Crashworthy Aircrew Seat System (ACASS), Joint Inflatable Body and Head Restraint System (IBAHRS), and AIR BAGS NDI.
- (U) LIFE SUPPORT: Passenger Anti-Exposure Survival Systems (PAESS), Extreme Cold Weather Improvement Program (ECWIP), and Aircrew Modified Equipment Leading to Increased Accommodation (AMELIA).
- (U) THREAT PROTECTION: Joint Laser Eye Protection (LEP), Chemical Biological (CB), On Board Oxygen Generating System (OBOGS), Navy Combat Edge (NCE), Advanced Technology Crew Station (ATCS), Advanced Integrated Life Support Systems (AILSS), Advanced Oxygen Delivery System (AODS), and Advanced Oxygen Mask (AOM).
- (U) HELMET VISION AND DISPLAYS: Aircrew Integrated Survival Armor Protection (AISAP), Cats-Eyes Emergency Detachment System (CEEDS), Joint Night Vision System (NVS), Night Vision NDI, and Helmet Mounted Cueing System (HMCS).

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604264N

PROJECT NUMBER: W0606

PROGRAM ELEMENT TITLE: Aircrew Systems Development PROJECT TITLE: Aircrew Systems Development

- (U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING AND MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$4,527) OBOGS: Completed Development Testing (DT) and approved Engineering Change Proposal (ECP). NCE: Continued DT and commenced Technical Assessment. ATCS: Completed joint efforts. AISAP: Completed DT.
- (U) (\$3,491) NACES P'I: Continued accommodation of a wider range of aircrew anthropometry. ACASS: Completed detailed and assessment of rotary wing crashworthy improvements and continued developing improved emergency egress. IBAHRS: Completed joint DT and ECP's.
- (U) (\$2,260) PAESS: Revised design and initiated ECP revision. ECWIP: Continued DT and initiated/completed initial operational assessment for cold weather gloves. HEEDS P'I: Evaluated NDI candidates. AMELIA: Continued DT for female aviator equipment problems and completed equipment survey of female aircrew.
- (U) (\$1,583) Navy CB: Completed draft Request for Proposal (RFP) and initiated evaluation of NDI proposals. LEP: Updated Operational Requirement and issued Request for Information.
- (U) (\$2,651) Joint NVS: Monitored Preliminary Design Review/Critical Design Review and USAF down selection. Night Vision NDI: Commenced test/evaluation. CEEDS: Approved helmet/airframe ECP's and completed flight testing HMCS: Began hardware/software (HW/SW) development, test/evaluation planning.

### 2. (U) FY 1995 PLAN:

- (U) (\$1,300) NCE: Start and complete Technical Evaluation (TECHEVAL) and commence Operational Evaluation (OPEVAL).
- (U) (\$3,324) NACES P'I: Complete final assessment for wider range of aircrew accommodation and initiate modification of ECPs to the ejection seat. ACASS: Conduct DT on crashworthy improvements. IBAHRS: Obtain Milestone (MS) III and approve ECP's.

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604264N

PROJECT NUMBER: W0606

PROGRAM ELEMENT TITLE: Aircrew Systems Development

PROJECT TITLE: Aircrew Systems Development

- (U) (\$2,427) ECWIP: Submit ECP for cold weather gloves and continue DT for cold weather clothing survival items. HEEDS P'I: Complete fleet assessment of NDI candidates. AMELIA: Continue DT and complete anthropometric database.
  - (U) (\$3,424) Navy CB: Complete RFP rewrite and release to industry. Initiate fleet-wide survey. LEP: Initiate source selection and initiate DT.
  - (U) (\$3,519) Night Vision NDI: Continue DT. HMCS: Continue HW/SW development; Test and Evaluation planning.
3. (U) FY 1996 PLAN:
- (U) (\$800) NCE: Complete OPEVAL and obtain combined MS II and III.
  - (U) (\$2,792) NACES P'I: Continue modification verification and initiate ECP's for ejection seat. ACASS: Continue DT.
  - (U) (\$1,100) ECWIP: Continue DT for cold weather clothing survival items. HEEDS P'I: Prepare ECP. AMELIA: Continue DT for identified accommodation problems for female and small aviators. Continue fleet-wide Aviation Life Support Systems (ALSS) survey.
  - (U) (\$300) LEP: Continue DT.
  - (U) (\$4,796) Night Vision NDI: Continue DT. HMCS: Award platform integration contract, begin Operational Flight Program (OFF) S/W development. Obtain MS II.
4. (U) FY 1997 PLAN:
- (U) (\$3,825) AILSS: Initiate EMD for rotary wing. AOM: Initiate EMD DT. AODS: Initiate EMD DT.
  - (U) (\$2,320) ACASS: Continue DT. AIR BAGS NDI: Initiate RDT&E effort for rotary wing air bag system. Evaluate current technology and begin DT.
  - (U) (\$515) ECWIP: Continue DT for cold weather clothing and survival items and prepare ECP's. HEEDS P'I: Approve ECP. AMELIA: Continue DT and OT.

C1961 Mobile Electronic Warfare Support System (MEWSS)	0	2,506	2,727	190	0	0	0	0	0	13,175

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: MEWSS is an electronic warfare suite of equipment configured in the highly mobile, survivable Light Armored Vehicle. This program develops a material change for the current, outdated Electronic Warfare (EW) suite. Threat tactical communications are rapidly advancing to complex, advanced modulations requiring computer-intensive, open architecture solutions. MEWSS fulfills the requirement to provide responsive EW support to maneuver commanders, which enhance the ability to defeat the enemy by isolating and suppressing the opposing fire control and command and control nets at a critical point of time in the battle. MEWSS will provide electronic over-watch of the entire electronic spectrum, freeze the enemy in place and help eliminate enemy counter-fire. MEWSS accomplishes this by detecting and locating threat sensors and advanced communications and also jamming advanced threat tactical communications. MEWSS incorporates Army Intelligence and Electronic Warfare Common Sensor (IEWCS) electronics including Tactical Jammer-Army (TACJAM-A) EW/Communications Intelligence subsystem, Communications High Accuracy Location System-Exploitable, and the Common Module Electronic Intelligence (ELINT) system.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS: Accomplishments are funded under Program Element (PE) 0305885G, National Security Agency Tactical Cryptologic Program.

- (U) Conducted Milestone II on restructured program.
- (U) Completed integration of IEWCS Engineering Development Model (EDM). MEWSS Developmental Test (DT) will emphasize only MEWSS unique-items; whereas, Army IEWCS DT results will be used to the maximum extent possible.

2. (U) FY 1995 PLAN:

- (U) (\$527) Integrate the objective Communications High Accuracy Locations System - Exploitable (CHALS-X) subsystem into the MEWSS EDM.
- (U) (\$229) Design and install the MEWSS Product Improvement Program (PIP) reporting data link hardware.
- (U) (\$100) Initiate Integrated Logistics Support (ILS) documentation.
- (U) (\$700) Design and install the MEWSS PIP power unit and power distribution system.
- (U) (\$750) Complete IEWCS equipment integration and factory testing.
- (U) (\$200) Participate in Army Limited User Testing of IEWCS systems.
- (U) The following accomplishments (\$110) are funded in PE 0605873M, Marine Corps Program Wide Support, Project C0033, Marine Corps Operational Test and Evaluation Activity.
- (U) (\$110) Conduct Initial Operational Test and Evaluation (IOT&E) and publish Independent Evaluation Report (IER) for MEWSS PIP.

3. (U) FY 1996 PLAN:

- (U) (\$250) Conduct multi-service DT and Operational Test (OT) on MEWSS EDM with other IEWCS platforms.
- (U) (\$107) Complete IEWCS equipment integration and factory testing.
- (U) (\$25) Complete initial integration design of TACJAM-ECM subsystem.
- (U) (\$320) Complete Environmental Control Unit and Auxiliary Power Unit design and installation.

PROGRAM ELEMENT: 0604270N

PROGRAM ELEMENT TITLE: Electronic Warfare Development

PROJECT NUMBER: C1961  
PROJECT TITLE: Mobile Electronic Warfare Support System (MEWSS)

- (U) (\$115) Complete all subsystem installation.
  - (U) (\$340) Complete all antenna, radio frequency, and power distribution installation.
  - (U) (\$185) Complete Interference Cancellation design and installation.
  - (U) (\$450) Complete ILS documentation.
  - (U) (\$210) Conduct operator training.
  - (U) (\$200) Complete software development.
  - (U) (\$525) Complete ECM integration design.
  - (U) The following accomplishments are funded under PE 0305885G, National Security Agency Tactical Cryptologic Program.
  - (U) Integrate the TACJAM-Electronic Countermeasure (TACJAM-ECM) subsystem.
  - (U) Conduct system Electro-Magnetic Interference/Electro-Magnetic Cancellation (EMI/EMC) testing.
  - (U) Conduct DT/OT on MEWSS PIP.
  - (U) Conduct Milestone IIA/Low Rate Initial Production (MS IIA/LRIP).
4. (U) FY 1997 PLAN:
- (U) (\$190) Design the MEWSS system modification to allow targeting of additional advanced communications threats.
  - (U) The following accomplishments are funded under PE 0305885G, National Security Agency Tactical Cryptologic Program.

B. (U) PROGRAM CHANGE SUMMARY:

(U) FY 1995 President's Budget:	FY 1994	FY 1995	FY 1996	FY 1997
	0	2,558	N/A	N/A
(U) FY 1995 Appropriated:	N/A	2,558	N/A	N/A
(U) Adjustments from Appropriated/ FY 1995 PRESBUDG:	0	-52	N/A	N/A
(U) FY 1996/97 PRESBUDG Submit:	0	2,506	2,727	190

(U) CHANGE SUMMARY EXPLANATION:

- (U) Funding: FY 1995 funding was decreased by a total of \$52 for the following undistributed Congressional reductions: Small Business Innovative Research, University Research, and Travel.
- (U) Schedule: The multi-service DT/OT was delayed one year, from the second/third quarter of FY 1995 to the second/third quarter FY 1996. This delay was caused by the non-availability of government furnished equipment to support test and software design delays at Electrospace Incorporated (ESI), Richardson, Texas, the prime contractor.
- (U) Technical: Not applicable.

									CONT

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The EA-6B Weapon system is designed for jamming and destruction of enemy landbased, shipborne and airborne command, control and communications (C3) and radars associated with early warning, target acquisition surveillance, anti-aircraft artillery, and air-to-surface, surface-to-surface and surface-to-air missiles. In this capacity, it will support carrier based tactical aircraft and battle group operations in dense radar controlled environments. The efforts under this PE provide for the electronic countermeasure response to these advanced threat weapon systems and C3 networks which are expanding in density and technical complexity. This PE funds the continuing development and integration of all EW systems for the EA-6B Electronic Support Aircraft.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

## 1. (U) FY 1994 ACCOMPLISHMENTS:

(U) (\$300 FY 1993 Funding) Completed wing fatigue study analysis.

- (U) (\$2,477 FY 1993 Funding) Commenced development and integration of Universal Exciter Upgrade (UEU) into Improved Capability (ICAP) II aircraft.

- (U) (\$8,193 FY 1993 Funding) Continued software and jammer techniques development and test support for ICAP-II development programs.

- (U) (\$5,000 FY 1994 Funding) Commenced Joint Tactical Air Electronic Warfare Study (JTAEMS).

- (U) (\$5,845 FY 1994 Funding) Commenced integration studies of ALQ-149 into EA-6B ICAP-II.

- (U) Completed delivery of Band 2/3 Engineering Development Models (EDM) 1 through 5.

- (U) ADVCAP terminated.

PROJECT TITLE: EW COUNTER RESPONSE

2. (U) FY 1995 PLAN:

• (U) (\$3,483 FY 1994 Funding & 2,556 FY 1995 Funding) Continue software and techniques development and test support for ICAP-II development programs.

• (U) Accept delivery of seven (7) UEU EDMs.

• (U) Complete ICAP-II UEU follow on test and evaluation (FOT&E) (OT-III/SEP 95).

• (U) (\$16,400 FY 1994 Funding) Complete the UEU development program and integration on ICAP-II.

• (U) (\$1,000 FY 1994 Funding) Complete JTAWS.

• (U) (\$2,000 FY 1995 Funding) Commence low band transmitter development program.

• (U) (\$3,000 FY 1995 Funding) Develop enhanced joint C3W capabilities associated with EF-111A termination.

• (U) Continue Coherent Countermeasures (COCH) and Proforma Countermeasures (PCM) programs for the EA-6B. Level of effort commensurate with available funds.

3. (U) FY 1996 PLAN:

• (U) (\$2,929 FY 1995 Funding and \$3,314 FY 1996 Funding) Continue software and techniques development, and test support for ICAP-II development programs.

• (U) (\$12,000 FY 1995 Funding) Award low band transmitter development contract.

• (U) (\$2,000 FY 1995 Funding) Conduct EA-6B follow-on system Cost and Operational Effectiveness Analysis (COEA) and risk reduction.

• (U) Continue COCM and PCM programs for the EA-6B. Level of effort commensurate with available funds.

4. (U) FY 1997 PLAN:

• (U) (\$2,693) Continue software and techniques development and test support for ICAP-II development programs.

• (U) Continue COCM and PCM programs for the EA-6B. Level of effort commensurate with available funds.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: INTEGRATED DEFENSIVE ELECTRONIC COUNTERMEASURES (IDECM): This subproject integrates a Radar Warning Receiver (RWR), a countermeasures dispenser system, a decoy, a new techniques generator, a Missile Approach Warning System (MAWS), and advanced expendables with associated cockpit displays to provide the lead aircraft (F/A-18E/F) with increased survivability against Infrared/Radio Frequency (IR/RF) threats.

(U) AN/ALR-67(V)3 RADAR WARNING RECEIVER: This subproject will develop the system which provides enhanced situational awareness by providing accurate azimuth display of all programmed threats, independent of aircraft attitude, and a new Electronic Warfare (EW) Bus Controller.

(U) DOA AN/ALR-67 Direction of Arrival (DOA): This subproject will develop a method to achieve Navy Tactical Air's (TACAIR's) requirements for passive precision ranging/targeting. The DOA will contribute to multi-sensor integration targeting solutions by providing air-to-ground passive emitter location and air-to-air precision direction finding.

(U) AN/ALE-50 ADVANCED AIRBORNE EXPENDABLE DECOY (AAED): This subproject will develop the system which will decoy enemy radio frequency homing missiles away from friendly aircraft.

(U) FLEET ELECTRONIC WARFARE SUPPORT GROUP (FEWSG): This subproject develops new EW equipment and technology which is used to provide realistic hostile EW threat environment, and support the evaluation and development of tactics and training.

(U) EW SOFTWARE SUPPORT ACTIVITY (EWSSA): This subproject provides upgrade to lab facilities which provide software support to EW systems.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$60,230) ALR-67(V)3: Completed Operational Assessment and Acquisition Review Board for test asset procurement to support OPEVAL. Commenced Development Test/Operational Test (DT/OT) flight testing. Continued EMD.
- (U) (\$6,552) AAED: Conducted DT/OT Live Fire on Decoy. Began development. IDAP: Closed out program with live fires as risk reduction for IDECM program.
- (U) (\$5,060) IDECM: Tasked and funded field support to initiate program related documentation including Statements of Work (SOW), specifications. Participated in Cost and Operational Effectiveness Analysis (COEA) efforts. Conducted F-18 EW COEA; awarded a McDonnell Douglas (MCAIR) A-Kit study contract for first look at integration into F/A-18E/F.
- (U) (\$1,892) FEWSG: Continued AN/ALQ-170 dual mode development. Initiated FEWSG Airborne Electronic Warfare Systems (FAEWS) Electronic Support Measures (ESM) upgrades. Initiated Adaptive Cross Polarization development for AN/ALQ-167. Completed airborne intercept development. Initiated pre-launch lock-on development. Initiated dual mode transmit development for AN/AST-6.
- (U) (\$200) EWSSA: Continued software development and development of EWSSA Lab facilities. Automated the user data file (threat file).
- (U) (\$500) APR-39 (XE-2): Completed DT and began OT.

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604270N

PROJECT NUMBER: E2175

PROGRAM ELEMENT TITLE: Electronic Warfare Development

PROJECT TITLE: TACAIR EW

- (U) (\$480) AN/ALE-47: Conducted engineering and development of AN/ALE-47 extended dispenser assemblies and component item breakout and completed development and testing of the interface hardware and software for the AN/ALE-47 to program GEN-X.
- (U) (\$1,272) Included travel and Management/Professional Support Services.
- 2. (U) FY 1995 PLAN:
  - (U) (\$22,645) ALR-67(V)3: Complete DT/OT flight testing. Develop Consolidated Automated Support System Test Program Sets (CASS TPS) (2nd increment). Update contractor system to support OPEVAL. Develop Software Support Activity (SSA). Continue Logistics Development.
  - (U) (\$4,000) DOA ALR-67: Begin development of a Direction of Arrival (DOA) Improvement Program.
  - (U) (\$16,531) AAED: Complete OT on decoy; begin integration efforts on F-18 E/F.
  - (U) (\$24,944) IDECM: Award contract for Engineering and Manufacturing Development of the IDECM RF subsystem. Conduct risk reduction studies and testing on the RF subsystem. Conduct MCAIR A-Kit study contract efforts for RF integration into the AV-8B/F/A-18, and support for MAWS/Advanced Strategic Tactical Expendable (ASTE) source selection and initial integration.
  - (U) (\$2,829) FEWSG: Complete AN/ALQ-170 dual mode development. Continue FAEWS/ALT-40 upgrades. Complete ALQ-167 adaptive Cross Polarization development. Continue dual mode transmit development for AN/AST-6. Complete pre-launch lock-on development for AN/AST-6. Initiate AN/ALQ-167 E/F-Band deception technique development. Continue equipment exploitation. Initiate AN/ALQ-167 I-Band digital RF memory development.
  - (U) (\$200) EWSSA: Continue software development and development of EWSSA Lab facilities.
  - (U) (\$250) AN/ALE-47: Complete all training of AN/ALE-47 SSA personnel and certify organic capability. Complete development and test of AN/ALE-47 extended dispensers for kinematic expendables.

3. (U) FY 1996 PLAN:

- (U) (\$51,042) IDECM: Continue funding contract for Engineering and Manufacturing Development of the IDECM RF subsystem. Continue MCAIR A-Kit design contract efforts for integration into the AV-8B/F/A-18 and MAWS/ASTE integration efforts.
- (U) (\$14,800) ALR-67(V)3: Conduct OPEVAL, fix any deficiencies, set up software support facility and complete design changes necessary for F-18E/F installation.
- (U) (\$3,000) DOA ALR-67: Continue development of DOA program.
- (U) (\$6,732) AAED: Continue developmental test, TECHEVAL and OT for F-18E/F installation.
- (U) (\$2,536) FEWSG: Complete FAWS/ALT-40 system upgrades. Complete AST-6 dual mode transmit development. Complete AST-6 pre-launch lock-on development. Complete AN/ALQ-167E/F Band Deception Technique Development. Continue AN/ALQ-167 I-Band Digital RF Memory Development. Initiate AN/ALQ-167 Pulse-to-Pulse Frequency Set-on Development. Continue equipment exploitation. Initiate AN/ALQ-170 performance enhancement effort.
- (U) (\$200) EWSSA: Continue software development and development of EWSSA lab facilities.

4. (U) FY 1997 PLAN:

- (U) (\$68,221) IDECM: Continue funding contract(s) for Engineering and Manufacturing Development of the IDECM RF subsystem. Continue MCAIR A-Kit design contract efforts for integration into the F/A-18 and MAWS/ASTE integration efforts.
- (U) (\$15,256) DOA ALR-67: Continue development of DOA program via contract and field support.

- (U) (\$20,567) AAED: Completion of OT for F-18E/F. Commence FOT&E for F-18. Logistics development of CASS, Depot, and I-Level.
- (U) (\$2,511) FEWSG: Complete AN/ALQ-167 I-Band Digital RF Memory Development. Continue AN/ALQ-167 Pulse-to-Pulse Frequency Set-on Development. Continue AN/ALQ-170 performance enhanced effort. Continue equipment exploitation.
- (U) (\$200) EWSSA: Continue software development and development of EWSSA lab facilities.

### B. (U) PROGRAM CHANGE SUMMARY:

	FY 1994	FY 1995	FY 1996	FY 1997
(U) FY 1995 President's Budget:	76,186	75,355	xxx	xxx
(U) FY 1995 Appropriated:	xxx	75,355	xxx	xxx
(U) Adjustments from		(2,281)		
Appropriated/FY 1995 PRESBUDG:	76,186	73,074	78,310	106,755
(U) FY 1996/97 PRESBUDG Submit:				

### (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: Decreases reflect Department of the Navy rebalancing, pricing, and DBOF rate adjustments.

(U) Schedule: IDECM MS III changed from 3Q/01 (President's Budget) to 3Q/02 due to acquisition strategy realignment. LRIP planned for 2Q/01. ALR-67(V)3 MS IIA changed from 4Q 1995 to 2Q 1996. OPEVAL start changed from 4Q 1995 to 2Q 1996. MS III changed from 3Q 1996 to 2Q 1997. Changes to schedule are to reflect revised acquisition program baseline agreement and additional testing requirements for the F/A-18.

(U) Technical: Not applicable.

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
R1742 EW Technical Development and Testing	832	844	755	736	742	909	914	940	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program, referred to as "Skunkworks", establishes a standing research group for developing and testing low cost, high payoff electronic warfare (EW) systems to meet warfighting requirements during crisis situations. The program typically produces a new product at the end of each 12 month period. This unique characteristic ensures that the team continually functions in a quick reaction mode, and is therefore well trained in all aspects of rapid response systems engineering and fabrication. Each year, in the absence of a critical situation, the team develops, demonstrates and tests a prototype EW system which meets a specific Navy requirement.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:
  - (U) (\$500) Obtained developmental flight clearance for launchers for pod with testing.
  - (U) (\$332) Developed detailed test plan scenarios. For testing.
  - Coordinated plan with Technical Support Group (N3/5) and Air Force. Conducted test. Initial results show significant capabilities
2. (U) FY 1995 PLAN:
  - (U) (\$629) Develop a miniature capable of countering

R1882 Data Link Vulnerability Analysis (DVAL)	1,165	1,018	1,040	1,043	1,002	1,013	1,016	1,046	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: DVAL is an Office of the Secretary of Defense directed program with the Commander, Naval Security Group designated as Executive Agent. It is the only program in the Navy that evaluates anti-jam and low probability of intercept (LPI) capabilities in Navy systems using the electromagnetic spectrum. DVAL typically assesses systems during the developmental stages of the acquisition cycle. It identifies methods for reducing signal vulnerabilities to hostile exploitation. It is also employed after fleet introduction for use in developing countermeasure tactics. In FY 1994 it will incorporate another facet of vulnerability assessment, an Electronic Countermeasures (ECCH) Requirements and Assessment Manual (ERAM) which, when completed, will provide a tool for program sponsors and managers to clearly state ECCH requirements "up front" in the R&D process. ERAM consists of five manuals (increments) providing realistic engagement scenarios and measures of effectiveness to facilitate writing of contract specifications, defining of testing environments, and provision of tools for fleet training and tactics.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:
  - (U) (\$330) Completed pre-test analysis of Battle Group Cooperative Engagement Concept (BGCEC) and TACINTEL II/INSICOM. Initiated actions to perform susceptibility assessments of these systems.
  - (U) (\$360) Developed test plan and equipment necessary for the assessment of Navy Extremely High Frequency (EHF) Satellite Program (NESP) terminals. These terminals allow communications via the MILSTAR satellite system.
  - (U) (\$475) Published ERAM Increment V; produced draft of Joint Army/Navy developed ERAM Communications Annex; release revision 2, ERAM Increment III, released revision 3, ERAM Increment II.
2. (U) FY 1995 PLAN:
  - (U) (\$90) Complete susceptibility assessments of BGCEC and TACINTEL II/INSICOM.

PROJECT NUMBER: R1882

PROGRAM ELEMENT TITLE: Electronic Warfare Development

PROJECT TITLE: DVAL

- (U) (\$60) Complete test plan and procedures for vulnerability test of NESP terminals. Conduct interim tests in preparation for at-sea test in FY 1996.
  - (U) (\$100) Assess synchronization algorithm of SINGARS radio for susceptibility.
  - (U) (\$120) Perform susceptibility and interceptability pretest analysis of MILSTAR Medium Data Rate (MDR) waveform.
  - (U) (\$98) Assess radio developed in a special access program for utility in LPI communication for the Navy.
  - (U) (\$150) Test airplane LPI radio being developed by NAVAIRSYSCOM and NRAD for evaluation in an advanced technology demonstration program.
  - (U) (\$400) Publish ERAM Communications Annex; release revision 4, Eram Increment I; release revision 1, ERAM Increment IV.
3. (U) FY 1996 PLAN:
- (U) (\$125) Conduct vulnerability tests of Advanced Engineering Model (ADM) of BGCEC.
  - (U) (\$175) Conduct at-sea test of NESP terminals and complete test report.
  - (U) (\$100) Complete analysis of tests of LPI radios tested in FY 1995.
  - (U) (\$140) Continue analysis of MILSTAR MDR vulnerability.
  - (U) (\$100) Begin vulnerability analysis of submarine vulnerability using sub-high frequency (SHF) communications.
  - (U) (\$400) Release revision 1 of ERAM Increment V. Publish Annex to ERAM Increment II on Airborne Surveillance & C3 Systems.
4. (U) FY 1997 PLAN:
- (U) (\$150) Complete test and analysis of ADM of BGCEC.
  - (U) (\$150) Complete assessment of submarine vulnerability when using SHF communications.
  - (U) (\$243) Complete analysis of MILSTAR MDR susceptibility and interceptability. Begin test design phase.
  - (U) (\$100) Begin assessment of high frequency radio group.
  - (U) (\$400) Publish revision 1 to ERAM Increment V; revision 3 to ERAM Increment III and revision 2 to ERAM Increment IV.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This new start project is for systems for collection of specific emitter identification information from National Technical Means (NTM) and during choke point monitoring in order to track commercial ships over 500 GT world-wide. Research and development will cover classic and Unintentional Modulation of Pulse (UMOP) Electronic Intelligence (ELINT) technology. This will include improved/next generation Specific Emitter Identification (SEI) technology for: miniaturization and automation of hardware, national collection systems, signal processing and analysis, and de-interleaving of signals. Propagation loss and multi-path signal distortions will be assessed. Fundamental limits to ELINT applied to commercial shipping will be assessed and alternatives will be pursued if warranted, and as directed by ONI and NSA.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS: Not applicable.
2. (U) FY 1995 PLAN: Not applicable.
3. (U) FY 1996 PLAN:
  - (U) (\$1,294) Work will begin on the fundamental problem of automatically extracting SEI information from received signals and transmitting the necessary information to the reporting center. Signals must be received with sufficient time resolution and precision to allow extraction of high resolution classical parameters or precise UMOP characteristics. Various concepts will be assessed and the best approach will be chosen for further development by the end of the year. The effect on emitter signature of multipath and propagation and our ability to measure the signals with the required precision (signal to noise ratio) will be analyzed with an assessment of feasibility by the end of the year.

4. (U) FY 1997 PLAN:

- (U) (\$1,095) Brassboard realization of the concepts for automated signal preparation and processing chosen in FY 1996 will be developed and tested using data collected during choke point monitoring. A report on the performance of the brassboards will be released by the end of the year. The analysis of the effects of multi-path and propagation loss performed in FY 1996 will be tested in the field and a report extrapolating the test results to the orbits of the NTM will be written.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The AEGIS Combat System provides immediate and effective capability to counter the current and expected air, surface and sub-surface threats as articulated in Office of Naval Intelligence (ONI) System Threat Assessment Report, ONI TA #046-93 dated May 1993. Changes in the threat capability and advances in technology such as fiber optics, local area networks, and high performance computing require corresponding Weapon System and Combat System changes. This program provides the Combat System engineering and selected weapons development necessary for such a continued increase in the capability of the AEGIS Combat System in AEGIS cruisers and destroyers. In addition to developing and integrating improvements to the AEGIS Weapon System, it will integrate combat capabilities developed in other Navy R&D programs into the AEGIS Combat System. Modifications of AEGIS Weapon System computer programs must be made to integrate these capabilities into the AEGIS Combat System so that battle effectiveness will be retained against the evolving threat. Selected Weapon and Combat System upgrades will be backfitted into CG 47 Class and DDG 51 Class ships already in the Fleet, providing key warfighting capability while reducing life cycle maintenance costs.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING AND MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project provides AEGIS Cruiser and Destroyer Combat System upgrades to integrate new equipments and systems to maintain pace with the threat and to capture advances in technology such as fiber optics and distributed architecture. The ships are upgraded in blocks and the Combat System in baselines. Baseline 2 (CG 52-58) consisted of the Vertical Launching System, TOMAHAWK Weapon System, and Anti-Submarine Warfare upgrades. Baseline 3 (CG 59-64) included the AN/SPY-1B radar and AN/UYQ-21 consoles. Baseline 4 (CG 65-73) integrated the AN/UYK-43/44 computers with superset computer programs developed for the DDG 51. Baseline 4 is the base Combat System for DDG 51-67. Baseline 5 was introduced in FY 1992 ships and included the Joint Tactical Information Distribution System (JTIDS)/Command and Control Processor, Tactical Data Information Link J, Combat Direction Finding, Tactical Data Information Exchange System, AN/SLQ-32(V)3 Active Electronic Countermeasures and AEGIS Extended Range (ER) Missile. Baseline 5 is being developed in three steps (phases): Phase I integrated AEGIS ER and supports the missile Initial Operational Capability; Phase II integrated system upgrades including Deceptive Electronic Countermeasures, Track Load Control algorithms, and Track Initiation Processor; and Phase III is integrating JTIDS and the OJ-663 color display Tactical Graphics capability into the AEGIS Combat System. Baseline 6 will also be developed in phases. Baseline 6 Phase I is planned for the last ship in FY 1994, and Phase II is planned for the last ship in FY 1996. Baseline 6 upgrades will include embarked helicopters, Fiber Optics as applied to Data Multiplexing System (DMS), implementation of affordability initiatives, the Radar Set Controller Environment Simulator (RSCS) and Battle Force Tactical Trainer (BFTT), Advanced Display System (Congressionally mandated but not funded), Display Simplification Initiative (DSI), Evolved SEASPARROW Missile (ESSM), Tactical Information Communications Analyzer (TICA), Identification (ID) upgrades Phase I, Advanced TOMAHAWK Weapon Control System (ATWCS) Phase II, and Fire Control System upgrades. AN/SPY-1D radar upgrades will be introduced for serial production in the last ship in FY 1998. Baseline 7 upgrades, planned for the last ship in FY 2000, include: integration of Cooperative Engagement Capability (CEC) and Tactical Ballistic Missile Defense (TBMD) capability (first forward fit implementation/funding will be provided from other sources), advanced computer architecture, ID upgrades Phase II, Cueing Sensor, STANDARD Missile-2 Block IIIB, Light Airborne Multipurpose System (LAMPS) helicopter Mark III Block II, and Mark 50 torpedo with Periscope Depth Attack.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$400) Resolved problems identified during Combat System Engineering Development (CSED) Site system demo of Baseline 5 Phase I.
- (U) (\$12,600) Completed Baseline 5 Phase II computer program coding, debugging and testing, and performed the Systems Qualification Test (SQT) at the CSED Site.
- (U) (\$12,235) Conducted Baseline 5 Phase III Critical Design Review (CDR) and commenced computer program coding, debugging and testing at the CSED Site to integrate Baseline 5 Phase III into the AEGIS Combat System.
- (U) (\$24,116) Conducted Baseline 6 Phase I System Design Review (SDR). Started reengineering of OJ-663 Tactical Graphics Console display equipment and single cable Local Area Network (LAN) into ruggedized commercial components and standards (Display Simplification). Commenced Baseline 6 Phase I design specifications.
- (U) (\$6,000) Provided the RDT&E share of operations and maintenance of the CSED Site, Program Generation Center, Computer Program Test Site, and Land Based Test Site.
- (U) (\$20,643) Provided for the participation of Navy laboratories and field activities to perform the engineering and scientific services necessary to monitor and direct the baseline efforts.

### 2. (U) FY 1995 PLAN:

- (U) (\$15,800) Design and integrate ID Upgrade Phase I and Battle Force Tactical Trainer (BFTT) ACTS rehost, for Baseline 6 Phase I; engineer Adjunct Processor for Baseline 6 Phase II; and engineer and develop an Advanced Computing Engineering Development Model to support implementation of an open system networked architecture.
- (U) (\$20,000) Complete computer program coding, debugging and testing to integrate Baseline 5 Phase III into the AEGIS Combat System. Conduct integration of Baseline 5 Phase III at the CSED Site and conduct SQT.

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604307N

PROJECT NUMBER: K1447

PROGRAM ELEMENT TITLE: AEGIS Combat System Engineering PROJECT TITLE: Combat System Improvements

- (U) (\$9,200) Continue Baseline 6 Phase I design specifications and conduct Preliminary Design Review (PDR). Initiate rehosting of AEGIS Display System (ADS) and Command and Decision (C&D) display related computer programs into Display Simplification architecture.
  - (U) (\$3,600) Start system engineering and coding, debugging and testing of a new computer/console architecture (DSI) for Baseline 6 Phase II.
  - (U) (\$2,600) Start integration of SPY-1D radar upgrade (SPY-1D(V), formerly known as EDM-4B) into the AEGIS Weapon System.
  - (U) (\$1,300) Begin system engineering and development of an advanced computing Engineering Development Model (EDM) to support implementation of an open system networked architecture in Baseline 7.
  - (U) (\$7,200) Continue to provide the RDT&E share of operations and maintenance of the CSED Site, Program Generation Center, Computer Program Test Site, and Land Based Test Site.
  - (U) (\$16,617) Continue to provide for the participation of Navy laboratories and field activities to perform the engineering and scientific services necessary to monitor and direct the baseline efforts.
3. (U) FY 1996 PLAN:
- (U) (\$2,900) Complete Baseline 5 Phase III integration and resolve any problems identified during CSED Site demo.
  - (U) (\$26,800) Conduct Baseline 6 Phase I CDR-1 and CDR-2. Perform computer program coding, debugging and testing. Start rehosting of AEGIS Combat Training System (ACTS) computer programs for BFTT Phase I and initiate development of BFTT/ACTS interface. Complete reengineering and development of OJ-663 display equipment and LAN to ruggedized commercial components and standards including a dual fiber optics LAN. Start rehosting ADS and C&D display and ID related computer programs (Display Simplification). Start development of Baseline 5 Phase III computer program variant to support equipment acceptance for first Baseline 6 Phase I ship (DDG 79).
  - (U) (\$14,950) Conduct system definition for Baseline 6 Phase II. Continue ESSM integration efforts. Start system engineering.

- (U) (\$4,900) Begin rehost of SPY-1D radar upgrade computer program control loop into advanced processors.
- (U) (\$12,650) Continue system engineering and development of an advanced computing EDM to support implementation of an open system networked architecture in Baseline 7.
- (U) (\$7,200) Continue to provide the RDT&E share of operations and maintenance of the CSED Site, Program Generation Center, Computer Program Test Site, and Land Based Test Site.
- (U) (\$20,626) Continue to provide for the participation of Navy laboratories and field activities to perform the engineering and scientific services necessary to monitor and direct the baseline efforts.

#### 4. (U) FY 1997 PLAN:

- (U) (\$18,600) Complete Baseline 6 Phase I computer program coding, debugging and testing. Start integration into the AEGIS Combat System at the CSED Site. Continue rehosting of ACTS computer programs for BFTT Phase I C&D ID related computer programs. Complete development of Baseline 5 Phase III computer program variant for Baseline 6 Phase I equipment. Conduct Production Test Center testing with Baseline 5 Phase III variant and DDG 79 ship set.
- (U) (\$23,247) Conduct SDR and PDR for integration of Baseline 6 Phase II upgrades into the AEGIS Combat System. Continue system engineering. Continue ESSM integration. Complete development of advanced processor acceptance rack (CITADEL).
- (U) (\$10,600) Complete SPY-1D radar upgrade and interface simulation computer program rehost and begin system definition for SPY-1D radar upgrade computer program.
- (U) (\$8,000) Conduct system definition to integrate Baseline 7 upgrades into the AEGIS Combat System. Start system engineering.
- (U) (\$7,200) Continue to provide the RDT&E share of operations and maintenance of the CSED Site, Program Generation Center, Computer Program Test Site, and Land Based Test Site.
- (U) (\$21,123) Continue to provide for the participation of Navy laboratories and field activities to perform the engineering and scientific services necessary to monitor and direct the baseline efforts.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604307N  
PROJECT NUMBER: K1447

PROGRAM ELEMENT TITLE: AEGIS Combat System Engineering  
PROJECT TITLE: Combat System Improvements

### B. (U) PROGRAM CHANGE SUMMARY:

	FY 1994	FY 1995	FY 1996	FY 1997
(U) FY 1995 President's Budget:	75,994	79,044	XXX	XXX
(U) FY 1995 Appropriated:	XXX	79,044	XXX	XXX
(U) Adjustments from Appropriated/FY 1995 PRESBUDG:	0	-2,727	XXX	XXX
(U) FY 1996/97 OSD Budget Submit:	75,994	76,317	90,026	88,770

### (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: In FY 1995 \$15,800 has been withheld pending reprogramming. Funding is being decreased by \$2,727 in FY 1995 to accommodate cuts in university research, consulting services, and travel, and to support Small Business Innovative Research (SBIR).

(U) Schedule: Baseline 6 is now being developed in two phases. Milestones previously reported for Baseline 6 now apply to Baseline 6 Phase I. The Baseline 6 Phase I PDR has been rescheduled from September 1994 to the Second Quarter of FY 1995 and CDR from March 1995 to the First Quarter of FY 1996. To accommodate the \$15,800 OSD withholding in FY 1995, computer program design and integration to support the ID upgrade and BFTT functionality will be delayed one year. A second CDR will be scheduled in the Fourth Quarter of FY 1996 to validate the ID upgrade and BFTT designs, restarted in FY 1996 with the restoration of funds, and enable the start of coding. It is anticipated that internal milestones can be adjusted to enable the Baseline 6 Phase I computer program to support Combat System activation of DDG 79. Significant schedule risk, however, is introduced to successor baselines which depend upon the development of Baseline 6 Phase I in accordance with the initial schedule. Delayed completion of Baseline 6 Phase I causes concurrent development with two successor baseline efforts which may result in schedule slippage, resultant cost growth, and shipbuilding contract impact. Baseline 7, initially planned for an FY 1999 ship, will now be introduced in the last ship in FY 2000.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604307N

PROJECT NUMBER: K1447

PROGRAM ELEMENT TITLE: AEGIS Combat System Engineering

PROJECT TITLE: Combat System Improvements

(U) Technical: Baseline 6 Phase I has been defined to include embarked helicopters, Fiber Optics as applied to DMS, implementation of affordability items, BFTT, ID upgrades Phase I, and DSI. Baseline 6 Phase II includes TICA, Advanced Display System (Congressionally mandated but not funded), ATWCS Phase II, RSCS, ESSM, and upgrades to the Fire Control System. Baseline 7 includes advanced processing, integration of CEC and TBMD capability (first forward fit implementation/funding will be provided from other sources), ID upgrades Phase II, Cueing Sensor, STANDARD Missile-2 Block IIIB, LAMPS Mark III Block II, and Mark 50 torpedo with Periscope Depth Attack. To accommodate the pending OSD reduction of \$15,800 in FY 1995, the following changes have been made to Baseline 6 Phase I: (1) Rehosting of ACTS computer programs for BFTT Phase I and rehosting of ID upgrade related computer program into adjunct processors will be delayed one year. (2) A variant to the Baseline 5 Phase III computer program will be developed to permit Production Test Center acceptance of Baseline 6 Phase I equipment for DDGs 79 through 81. The result is cost growth to the total Baseline 6 Phase I effort. Delay of completion of Baseline 6 Phase I causes concurrent development with Baseline 6 Phase II, which could result in schedule slippage and possible shipbuilding contract impact. Adjunct processor engineering required to support the warfighting upgrades in Baseline 6 Phase II will be delayed by one year.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program provides for modifications to the AEGIS Weapon System MK-7 to counter the threat as articulated in ONI System Threat Assessment Report, ONI TA #046-93 dated May 1993. The modifications will be backfitted into CG 47 Class and DDG 51 Class ships already in the fleet.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$2,150) Completed Operational Readiness Test System (ORTS), Man-Machine Interface (MMI) upgrade equipment fabrication and computer program code, test, and debug.
- (U) (\$253) Conducted system testing in preparation for demonstration of ORTS MMI upgrade at the CSED Site in FY 1995.
- (U) (\$250) Provided AN/SPY-1 radar system analysis support for Cruiser and Destroyer baseline upgrades and AN/SPY-1B/D radar system upgrades.

### 2. (U) FY 1995 PLAN:

- (U) (\$334) Conduct ORTS MMI upgrade CSED Site demonstration.
- (U) (\$3,887) Develop ORTS MMI upgrade Ordnance Alteration proof-in kit for land-based integration and test.

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604307N

PROJECT NUMBER: K1776

PROGRAM ELEMENT TITLE: AEGIS Combat System Engineering

PROJECT TITLE: AEGIS Weapon System Mods

- (U) (\$234) Continue to develop computer program algorithms to improve Anti-Air Warfare system performance against various Deceptive Electronic Counter-Countermeasures (DECCM) threats.
- (U) (\$250) Continue AN/SPY-1 radar system analysis support for Cruiser and Destroyer baseline upgrades and AN/SPY-1B/D radar system upgrades.

### 3. (U) FY 1996 PLAN:

- (U) (\$300) Complete ORTS MMI upgrade implementation planning.
- (U) (\$300) Continue AN/SPY-1 radar system analysis support for Cruiser and Destroyer baseline upgrades and AN/SPY-1B/D radar system upgrades.
- (U) (\$4,113) Start AN/SPY-1B/B(V)/D DECCM Phase I full-scale design, development engineering, and testing.

### 4. (U) FY 1997 PLAN:

- (U) (\$300) Continue AN/SPY-1B/D upgrade analysis support.
- (U) (\$2,655) Continue AN/SPY-1B/B(V)/D DECCM Phase I design, development engineering, and testing.
- (U) (\$1,960) Start design and engineering to integrate ORTS upgrades into Baselines 4, 5 and 6.

A. (U) BRIEF DESCRIPTION AND BUDGET ITEM DESCRIPTION: This program is required to develop selected systems and subsystems for the ARLEIGH BURKE (DDG 51) class ships. This project funds development of equipment for the AEGIS Combat System, as opposed to the costs of integrating elements into the Combat System which is funded in Project K1447. Current funding completes the development of an upgrade to the current AN/SPY-1D radar, Engineering Development Model 4B (EDM-4B), to enhance its capability against seaskimming targets in increasingly more severe electronic countermeasures and in near-land clutter environments. The changes are in the transmitter, signal processor, and radar control computer program.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$6,700) Completed computer program code generation; completed debugging and testing.
- (U) (\$8,700) Completed EDM-4B fabrication and completed element integration and testing.
- (U) (\$8,585) Installed and performed system level integration at the CSED Site.

## 2. (U) FY 1995 PLAN:

- (U) (\$1,361) Complete system integration and test.
- (U) (\$2,524) Conduct Electronic Countermeasures test validation at the CSED Site.
- (U) (\$6,000) Start adjunct processor development and testing, including testing of microprocessors against AEGIS benchmark requirements, testing commercial operating systems, and computer architecture development.

## 3. (U) FY 1996 PLAN:

- (U) (\$5,000) Conduct Developmental Tests/Operational Tests (DT/OT-1 and DT/OT-2) at the CSED Site.
- (U) (\$5,944) Continue adjunct processor development and testing, including testing of microprocessors against AEGIS benchmark requirements, testing commercial operating systems, and computer architecture development.

## 4. (U) FY 1997 PLAN:

- (U) (\$4,675) Complete adjunct processor development, testing, and selection.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

(U) STANDARD MISSILE IMPROVEMENT (Project S0439): STANDARD Missile fuze and guidance performance degrades when the target is in close proximity to the sea surface. The low altitude improvement program will improve performance against low and very low altitude targets. It will be implemented in two phases: Phase I added a fuze altimeter and trajectory shaping enabling improved target detection and reducing the effect of multipath on radar returns on guidance performance. Phase II will add a moving target indicator (MTI), azimuth sensing fuze, and

The SM-2 Block III/IIIA/IIIB engagement envelope and will also improve lethality throughout the SM-2 Block IV. The SM-2 Block IIIB (MHIP) will add a dual mode (RF/IR) capability to engage existing threats in a severe RF countermeasures environment. This capability is currently being developed for AEGIS ships and will be expanded to TARTAR ships with development commencing in FY 1994. Additionally, a limited P3I effort will be started to improve performance against IR counter countermeasures. In addition, in FY 95 a development project to modify excess terrier missiles to meet Navy requirement for Supersonic Sea-Skimming Targets (SSST) and Tactical Ballistic Missile Targets will commence.

(U) AEGIS ER (SM-2 Block IV) (Project 1632): This project was moved from PE 0603318N. The AEGIS ER missile is the latest member of the STANDARD Missile family of area defense missiles, specifically designed to take maximum advantage of AEGIS and the vertical launching system (VLS). This missile, also known as the SM-2 Block IV, builds upon the SM-2 Block IIIA baseline with its improved low altitude performance and : Adding significant propulsion, guidance and control enhancements, AEGIS ER extends the STANDARD Missile engagement capability to very high altitudes, increases maneuverability and cross range capability and improves guidance homing accuracy in stringent environments.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: STANDARD MISSILE IMPROVEMENT (Project S0439): STANDARD Missile fuze and guidance performance degrades when the target is in close proximity to the sea surface. The low altitude improvement program will improve performance against low and very low altitude targets. It will be implemented in two phases: Phase I added a fuze altimeter and trajectory shaping enabling improved target detection to and reducing the effect of multipath on radar returns on guidance performance. Phase II will add a moving target indicator (MTI), azimuth sensing fuze, and

will improve lethality throughout the SM-2 Block III/IIIA/IIIB engagement envelope and will also improve lethality throughout the SM-2 Block IV. SM-2 will receive Phase I (Block III) and be upgraded by Phase II (Block IIIA), the importance of these improvements derive from the fact they address threats know to exist today. Additionally, the Missile Homing Improvement Program (MHIP) SM-2 Block IIIB will expand this effort by incorporating a dual mode (RF/IR) seeker to improve the missile's capability to resolve seeker ambiguities and engage targets in a severe RF countermeasures environment. These improvements are being developed in such a way that current systems in the fleet can be backfitted with this capability. Specific threats for SM-2 Block III/IIIA/IIIB are identified in Navy Decision Coordinating Paper (NDCP) and approved MNS and ORD Block IIIB. Future improvements may include additional very low altitude performance enhancements, two missiles per VLS canister (Dual Pack), insensitive munitions enhancements, and a common MR/ER missile, and improved IR counter countermeasures. In addition, in FY 95 a development project to modify excess terrier Missiles to meet Navy requirement for Supersonic Sea-Skimming Targets (SSST) and Tactical Ballistic Missile Targets will commence.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$3,500) Flight Tests commenced at White Sands Missile Range (WSMR), 5/94 (Block IIIB)
- (U) (\$6,022) Continued further enhancements of very low altitude performance enhancements versus low RCS targets 9/94 (Block IIIA)
- (U) (\$4,000) Initiated MHIP Pre-planned Improvements (P3I) Program.
- (U) (\$39,732) Continued MHIP EMD Program, including preparations for DT/OT.

2. (U) FY 1995 PLAN:

- (U) (\$2,500) Conduct At-Sea, OPEVAL 3/95.
  - (U) (\$3,514) System for Improved Low Altitude Performance: Finalize design of systems, Conduct Preliminary and Critical Design Review, Fabricate hardware for flight tests. Concept definitions/tradeoff studies for littoral engagement capability.
  - (U) (\$2,000) Continue P3I efforts.
  - (U) (\$2,000) Complete EDM Missile fabrication.
  - (U) (\$6,000) Begin SSST Project
3. (U) FY 1996 PLAN:
- (U) (\$5,302) Complete development and test Low Altitude Systems (LAS) prototype.
  - (U) (\$3,270) Preliminary design on littoral engagement capability.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604366N

PROJECT NUMBER: U0439

PROGRAM ELEMENT TITLE: Standard Missile Improvements

PROJECT TITLE: SM-2 Improvements

4. (U) FY 1997 PLAN:

- (U) (\$985) Transition LAS to production.
- (U) (\$995) Prototype development of littoral engagement capability.

B. (U) PROGRAM CHANGE SUMMARY:

(U) FY 1995 President's Budget:	<u>FY 1994</u> 53,514	<u>FY 1995</u> 10,751	<u>FY 1996</u> XXX	<u>FY 1997</u> XXX
(U) FY 1995 APPROPRIATED:	XXX	16,751	XXX	XXX
(U) Adjustments from APPROPRIATED/ FY 1995 PRESUDG:	-260	-737	XXX	XXX
(U) FY 1996/97 PRESUDG Submit:	53,254	16,014	8,572	1,980

(U) CHANGE SUMMARY EXPLANATION:

(U) Funding: The decrease of \$260K in FY 1994 results in an End-Of-Year execution update. The FY 1995 decrease of \$737K resulted from a Small Business Innovative Research cut of \$244K and Undistributed Congressional reductions for Consulting Support Services, University Research and Travel totalling \$493K.

TOTAL	31,169	19,752	42,226	49,869	19,532	4,895	2,490	0	0	295,980

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program develops airborne mine countermeasures systems that are required to counter known and projected mine threats. Provides a rapidly deployable means; and a non-acoustic mine detection and classification capability against floating and tethered mines using Light Detection and Ranging (LIDAR) techniques.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

UNCLASSIFIED

PROGRAM ELEMENT TITLE: AIRBORNE MINE COUNTERMEASURES

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
Q0528 ADVANCED AIRBORNE MINE COUNTERMEASURES EQUIPMENT	5,448	1,357	3,415	1,490	0	0	0	0	0	42,651

A. (C) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: There is a requirement to expand helicopter mine countermeasures by developing a more effective capability to sweep (deep moored) mines. The A/N37U-1 Controlled Depth Moored Sweep is being developed to increase the sweeping depth. The magnetic cable improvement is being developed to provide higher current capacity, smaller diameter, and lower weight.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$1,000) A/N37U-1 (37U) - Conducted TECHEVAL.
- (U) (\$3,253) 37U - Conducted OPEVAL.
- (U) (\$1,011) Magnetic Cable Improvement (MCI) - Prepare draft specification and solicitation package.

2. (U) FY 1995 PLAN:

- (U) (\$184) MCI - Complete draft specification and solicitation package. (This effort is a FY95 effort funded with FY94 funds available from terminated Cluster Pretzel program.)
- (U) (\$1,165) MCI - Award EMD contract and initiate design of EMD models.
- (U) (\$96) MCI - Conduct Preliminary Design Review.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Airborne Laser Mine Detection System (ALMDS) is a light detection and ranging (LIDAR) system for rapid detection and localization of floating and near surface tethered mines.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$3,676) Completed ADM software integration.
- (U) (\$1,500) Completed Contractor Testing (CT-I).
- (U) (\$1,500) Completed CT-II.
- (U) (\$2,000) Complete DT-I/OA.
- (U) (\$521) Continue ALMDS MS-II Documentation.

2. (U) FY 1995 PLAN:

- (U) (\$2,000) Develop Electro Optical Model to support system engineering trade offs.
- (U) (\$1,000) Continue Technology analysis.
- (U) (\$1,400) Correct DT-I/Operational assessment critical deficiencies.

PROJECT TITLE: AIRBORNE LASER MINE  
DETECTION SYSTEM

- (U) (\$2,000) Retest DT-I/OA fixes.
- (U) (\$2,000) Conduct requirements analysis for SH-60 and state specifications in terms of performance.
- (U) (\$1,000) Obtain Milestone II approval and Release RFP.
- (U) (\$8,777) Award EDM contract.

3. (U) FY 1996 PLAN:

- (U) (\$2,000) Complete Critical Design Review.
- (U) (\$12,262) Initiate EMD parts procurement.
- (U) (\$11,758) Initiate EMD fabrication.

4. (U) FY 1997 PLAN:

- (U) (\$12,256) Conduct subsystem hardware and software module integration and test.
- (U) (\$12,000) Complete EMD fabrication and total system test and acceptance.
- (U) (\$500) Initiate Test Plan for DT-II.
- (U) (\$500) Initiate Test Plan for OT-II.
- (U) (\$3,000) Conduct contractor demonstration tests.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Submarine Support Equipment Program develops and improves submarine Electronic Warfare Support Measures (ESM) techniques and components, equipment, and systems that will increase submarine operational effectiveness in the increasingly dense and sophisticated electromagnetic environment caused by the proliferation of complex radar, communications, and navigation equipment of potential adversaries. Improvements are necessary for submarine ESM to be effective in conducting the following mission areas: Joint Littoral Warfare, Joint Surveillance, Space and Electronic Warfare, Intelligence Collection, Maritime Protection, and Joint Strike. The major efforts in this area are the Engineering and Manufacturing Development of the Integrated ESM Mast (IEM) and the Periscope Monopulse Direction Finding (DF) System for the Type 18 Periscope.

(U) The Submarine Sonar Improvement Program delivers block updates to Sonar Systems installed on SSN 688, 688I and TRIDENT Class Submarines. The goal is to maintain clear acoustic, tactical and operational superiority over submarine and surface combatants in all scenarios through detection, classification, localization and contact following. Current developments are focused on supporting Littoral Warfare, Regional Sea Denial, Battle Group Support, Diesel Submarine Detection, Surveillance, and Peacetime Engagement.

# UNCLASSIFIED

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604503N

PROGRAM ELEMENT TITLE: Submarine System Equipment Development

(U) The Submarine Integrated Antenna Systems (SIAS) project develops the antennas needed to communicate in networks such as Ultra High Frequency Satellite Communications, Extremely Low Frequency (ELF), Extremely High Frequency (EHP) and Global Positioning System. Hardware developments include: (a) mast-mounted systems; (b) buoyant cable systems; and (c) expendable buoy systems.

(U) The Submarine Tactical Communications Systems project provides attack submarines with an exterior communications system which: (a) minimizes the time required at communications depth; (b) enhances operability, reducing errors and manpower requirements; and (c) provides flexibility for low impact growth and change throughout the life of the submarine. Design efforts will provide increased antenna signal distribution and interconnection subsystems to accommodate ELF, EHP, and Mini-Demand Assigned Multiple Access and a message storage and processing subsystem.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to the production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program develops and improves techniques and components, equipment, and systems that will increase submarine operational effectiveness in the increasingly dense and sophisticated electromagnetic environment caused by the proliferation of complex radar, communications, and navigation equipment of potential adversaries. Improvements are necessary for Submarine ESM to be effective in conducting the following mission areas: Joint Littoral Warfare, Joint Surveillance, Space and Electronic Warfare, Intelligence Collection, Maritime Protection, and Joint Strike. Specific efforts include development of the: (1) IEM that replaces the AN/BRD-7 and AN/BLD-1 DF Systems on SSN 688 Class Submarines, SSN 21 Class Submarines and is required for the New Attack Submarine; and (2) the Periscope Monopulse DF System for the Type 18 Periscope. The Advanced Submarine Tactical ESM Combat System (ASTECS), previously funded here, is now supported under PE 0604558N, project

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:
  - (U) (\$3,177) Completed IEM System Design Review and Software Specification Review.
  - (U) (\$3,372) Completed IEM requirements analysis and system trade-off studies.
  - (U) (\$1,480) Initiated IEM/High Probability of Intercept (HPI) interface design.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604503N

PROGRAM ELEMENT TITLE: Submarine System Equipment Development

PROJECT NUMBER: F0775

PROJECT TITLE: Submarine Support Equipment Program

### 2. (U) FY 1995 PLAN:

- (U) (\$3,623) Complete the IEM Preliminary Design Review.
- (U) (\$800) Complete shock tests on a mechanical model of the IEM Above Deck Sensor Unit.
- (U) (\$2,500) Procure non-development and long lead items for the IEM radar subsystem.
- (U) (\$162) Completed HPI Interface System Requirements/System Design Review.

### 3. (U) FY 1996 PLAN:

- (U) (\$6,652) Complete Critical Design Review of the IEM System and HPI modification kit. Begin fabrication of IEM Engineering Design Models and HPI modification kits.
- (U) (\$9,632) Manufacture and test printed circuit boards and enclosures. Assemble drawers for IEM EDMs 1 and 2, and HPI modification kits.
- (U) (\$800) Initiate system level assembly and drawer level testing of IEM.

### 4. (U) FY 1997 PLAN:

- (U) (\$3,500) Design and manufacture shock test fixtures. Complete shock and environmental tests on IEM.
- (U) (\$4,000) Complete fabrication of IEM EDMs and conduct system performance tests.
- (U) (\$1,800) Perform IEM software integration tests.
- (U) (\$2,500) Complete system integration of IEM EDM 2 and conduct operator training for DT-IIA/OT-IIA.
- (U) (\$2,852) Integrate IEM with HPI and host ESM system. Complete technical documentation, perform reliability/maintainability tests and correct design deficiencies.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program delivers block updates to Sonar Systems installed on SSN 688, 688I and TRIDENT Class Submarines. The goal is to maintain clear acoustical, tactical and operational superiority over submarine and surface combatants in all scenarios through detection, classification, localization and contact following. Current developments, detailed below, are focused on supporting Littoral Warfare, Regional Sea Denial, Battle Group Support, Diesel Submarine Detection, Surveillance, and Peacetime Engagement. TECHEVAL and OPEVAL are completing for AN/BQQ-5E and the TB-29 Array; these will provide quantum improvements in long-range detection and localization for SSN 688 and TRIDENT Class Submarines. Engineering Change Proposal (ECP) 7001 to AN/BQQ-5E will provide Low Frequency Active Interference Rejection, Dual Towed Array Processing and Full Spectrum Processing to SSN 688 and TRIDENT Class Submarines. The Onboard Trainer is being developed to provide pier-side and at-sea operational and team training to improve operator efficiency. ECP 1000 to AN/BSY-1 will incorporate AN/BQQ-5E and TB-29 capabilities, including those of AN/BQQ-5E ECP 7001. An early break-out of software and the utilization of commercial-off-the-shelf hardware are being considered. Towed array development will focus on (a) tow cable improvements for shallow water towing; (b) reliability improvements for all module type couplings, connectors, strength members and hoses; and (c) hydrophone and telemetry cost reduction alternatives (fiber optics).

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$746) Developmental Testing (DT) IIM for AN/BQQ-5E and TB-29 Array.
- (U) (\$3,895) Awarded development contract and completed Critical Design Review (CDR) for Onboard Trainer.
- (U) (\$2,210) Conducted AN/BSY-1 ECP 1000 Cost and Operational Effectiveness Analysis (COEA), prepared for MS II approval.
- (U) (\$12,941) Continued development of AN/BQQ-5E ECP 7001.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604503N

PROJECT NUMBER: S0219

PROGRAM ELEMENT TITLE: Submarine System Equipment Development PROJECT TITLE: Sub Sonar Imp (Eng)

- (U) (\$8,898) Continued development of TB-29 Array.
- (U) (\$3,200) Continued development for Probe Alert, Desk Top Calculator (DTC) Improvements and the Acoustic Measurement Facility Improvement Program (AMFIP).
- 2. (U) FY 1995 PLAN:
  - (U) (\$5,433) Continue development of AN/BQQ-5E ECP 7001.
  - (U) (\$4,359) Continue development of Onboard Trainer.
  - (U) (\$7,500) Obtained MS II approval for AN/BSY-1 ECP 1000 (Dec 1994); Award development contract.
  - (U) (\$2,814) Complete development of TB-29 Array. Obtain MS III approval for TB-29 and AN/BQQ-5E.
  - (U) (\$3,200) Continue development for Probe Alert and DTC Improvements. Complete development of the AMFIP.
  - (U) (\$4,000) Initiate design efforts for a High Frequency/Rapid Localization Towed Array, Handling System Hydraulic Components, and Advanced Shallow-water Tow Cables.

### 3. (U) FY 1996 PLAN:

- (U) (\$3,621) Complete development of AN/BQQ-5E ECP 7001.
- (U) (\$17,122) Continue development of AN/BSY-1 ECP 1000. Conduct CDR.
- (U) (\$6,800) Continue towed array development efforts to include initial at-sea testing and demonstrations of towed array/handling system improvements. Initiate technical demonstration efforts for designs prior to resuming TB-29 production.
- (U) (\$569) Complete development of Onboard Trainer.
- (U) (\$900) Continue development for Probe Alert and DTC Improvements.
- (U) (\$1,150) Initiate AN/BSY-1 HF Upgrade program and complete COEA.

4. (U) FY 1997 PLAN:

- (U) (\$25,428) Continue development of AN/BSY-1 ECP 1000.
- (U) (\$8,400) Continue towed array development efforts. Conduct at-sea testing of improved towed array hardware. Continue technical demonstration efforts.
- (U) (\$2,079) Transition 6.3 development efforts of Medium Frequency Active Improvements to 6.4.
- (U) (\$900) Continue development for Probe Alert and DTC Improvements.
- (U) (\$5,150) Obtain MS II approval and Award AN/BSY-1 HF Upgrade development contract.

B. (U) PROGRAM CHANGE SUMMARY:

	<u>FY 1994</u>	<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>
(U) FY 1995 President's Budget:	32,055	27,952	XXX	XXX
(U) FY 1995 Appropriated:	XXX	27,952	XXX	XXX
(U) Adjustments from Appropriated/ FY 95 PRESBUDG:	-165	-646	XXX	XXX
(U) FY 1996/97 PRESBUDG Submit:	31,890	27,306	30,162	41,957

(U) CHANGE SUMMARY EXPLANATION:

- (U) Funding: FY94 reduction, based on expenditure rates, reduced in-house engineering by 1.5 manyears. FY95 reduction, based on various undistributed Congressional adjustments, reduces in-house engineering by 5 manyears.
- (U) Schedule: Schedule changes resulted from delays in completing DT II M testing for AN/BQQ-5E and TB-29 and delays in obtaining MS II approval for AN/BSY-1 ECP 1000.
- (U) Technical: Not applicable.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Submarine Integrated Antenna System (SIAS) project provides submarines with antenna systems designed to: (a) permit greater operational flexibility through improved speed/depth performance; (b) improve reliability and availability; and (c) be compatible with existing and emerging communications systems. This project funds research and development for the communications Master Plan (Program Summary). It specifically funds the following developments: Improved AN/BRA-34, High Speed Buoyant Cable Antennas (HSBCAs), Extremely High Frequency (EHF) Non-Penetrating Masts (EHF NPMs), Antenna Distribution Systems (ADSS), High Data Rate Antennas (HDA), Super High Frequency (SHF), Conformal Array Antennas (CAAs).

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$100) Finalized Preparation for Milestone (MS) III for HSBCA.
- (U) (\$2,700) Continued engineering efforts and started Developmental Testing (DT) -II for the AN/BST-1 upgrade.
- (U) (\$2,100) Continued engineering efforts for the Improved AN/BRA-34.
- (U) (\$5,587) Continued preparation for MS II for EHF NPM antenna.
- (U) (\$2,286) Began systems engineering analysis efforts for the HDA.
- (U) (\$400) Began design efforts for the ADS.

PROGRAM ELEMENT TITLE: Submarine System Equipment Development      PROJECT TITLE: Submarine Integrated Antenna System

2. (U) FY 1995 PLAN:
  - (U) (\$10) Complete MS III for HSBGA 2nd Qtr.
  - (U) (\$2,462) Analyze the effects of Communications Support System/Tactical Data Information Exchange Subsystem (CSS/TADIXS) Radio Room (RR) on antennas and develop necessary changes to ensure compatibility.
  - (U) (\$666) Complete DT-II for AN/BST-1 Upgrade.
  - (U) (\$768) Conduct DT-IIA and continue engineering efforts for the Improved AN/BRA-34.
  - (U) (\$500) Deploy prototype ADS, conduct DT and prepare for MS III.
3. (U) FY 1996 PLAN:
  - (U) (\$25) Complete MS III for AN/BST-1 UPGRADE.
  - (U) (\$700) CSS Antenna Improvements - Develop changes resulting from analysis.
  - (U) (\$555) AN/BRA-34 - Conduct DT-IIB AND OT, Award Low-Rate Initial Production (LRIP) option and conduct MS III review.
  - (U) (\$4,746) HDA - Develop specifications and conduct analysis on SHF/Very High Frequency (VHF) Antenna System.
  - (U) (\$10,600) EHF NPM - Continue preparation for and complete MS II.
  - (U) (\$1,170) ADS - Conduct MS III review and continue with P'I upgrades in support of CSS/TADIXS improvements.
4. (U) FY 1997 PLAN:
  - (U) (\$7,493) EHF NPM - Award Engineering Model Development (EMD) contract for two EMD systems.
  - (U) (\$2,000) ADS - Test and field P'I upgrades for EHF and VHF antenna control/routing.
  - (U) (\$1,600) Analyze and prepare necessary changes from Antenna CSS/TADIXS Shipboard Automated Communications Control System (SACCS) compatibility.
  - (U) (\$4,592) HDA - Enter EMD phase and award contract for SHF Antenna development.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604503N

PROGRAM ELEMENT TITLE: Submarine System Equipment Development

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
X1411 Submarine Tactical Communications System	3,238	1,710	5,273	4,627	4,999	5,954	6,370	6,517	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Submarine Tactical Communications System project provides attack submarines with communications systems designed to: (a) enhance data throughput; (b) copy tactical data networks, such as Tactical Data Information Exchange System (TADIXS); (c) be interoperable with other U.S. and allied military networks; and (d) improve reliability, maintainability, and availability. This can be accomplished by providing the attack submarine with a properly integrated mix of Navy standard communication equipment covering a wide range of frequencies and modes. Included in this project is the Submarine Communications System Engineering Program (SCSEP) which provides a system engineering approach for the design and evaluation of new and existing submarine radio rooms. In addition, the project provides support for the Land-Based Submarine Radio Room (LBSRR) for new systems evaluation and integration. The project includes system engineering efforts associated with demonstration of new technology which will allow the submarine to be a participant in battle group and joint operations. The new technology will increase the submarine's communications, command, and control capability. This project funds research for equipment in communications Master Plan (Program Summary). It specifically funds the development of the improved Submarine Message Buffer (SMB) and Communications Support System (CSS). These two efforts will develop the computer controlled radio room for submarines. The CSS is envisioned to be the communications architecture of the Navy's future. Ships without CSS capability will be limited in their interoperability with the rest of the Navy. Lastly, this program provides funds to integrate Joint Tactical Information Distribution System (JTIDS) into the CSS.

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

#### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$2,541) Continued evaluation of radio room miniaturization, integration, and automation systems and candidate equipments for new radio rooms.
- (U) (\$471) Continued SMB P'I efforts.
- (U) (\$226) Continued SCSEP engineering development efforts.

PROJECT TITLE: Submarine Tactical Communications System

## 2. (U) FY 1995 PLAN:

- (U) (\$1,017) Continue evaluation of radio room miniaturization, integration, and automation systems and candidate equipments for new radio rooms.
- (U) (\$163) Continue SCSEP engineering development efforts.
- (U) (\$530) Continue SMB P'I efforts.

## 3. (U) FY 1996 PLAN:

- (U) (\$2,200) Continue improved SMB P'I development and begin testing.
- (U) (\$1,880) Continue development of the Phase I CSS implementation.
- (U) (\$600) Begin development of the component portion of the Hi Data Rate System.
- (U) (\$593) Start Link 16 JTIDS integration.

## 4. (U) FY 1997 PLAN:

- (U) (\$1,900) Complete DT/Operational Testing (OT) testing of ISMB.
- (U) (\$277) Continue development of the Hi Data Rate System.
- (U) (\$2,000) Complete CSS Phase I Integration.
- (U) (\$450) Continue Integration and developmental testing for JTIDS.

PROJECT NUMBER: X1411

PROJECT TITLE: Submarine System Equipment Development

PROJECT TITLE: Submarine Tactical Communications System

## B. (U) PROGRAM CHANGE SUMMARY:

- (U) FY 1995 President's Budget:
- (U) FY 1995 Appropriated:
- (U) Adjustments from Appropriated/FY95 PRESBUDG:
- (U) FY 1996/97 PRESBUDG Submit:

	FY 1994	FY 1995	FY 1996	FY 1997
	1,538	1,828		
		1,828		
		-118		
	+1,700			
	3,238	1,710	5,273	4,627

## (U) CHANGE SUMMARY EXPLANATION:

- (U) Funding: FY 94 increase reflects a \$1,700K reprogramming action from X0742 for the CSS radio room integration. FY 95 decreased \$118K, \$13K to accommodate Small Business Innovative Research and \$105K to reflect undistributed reductions for travel, consulting services, university research and Federally Funded Research Centers.

- (U) Schedule: Not applicable.

- (U) Technical: Implementation of CSS Phase I, which includes more automation of communication functions.

## C. (U) OTHER PROGRAM FUNDING SUMMARY: (Dollars in thousands)

TOTAL	9,809	7,845	7,815	8,859	8,565	4,828	4,770	6,448	CONT.	CONT.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program element provides for the development, integration, and testing of automated Air Traffic Control (ATC) hardware and software required to provide improved flight safety and more reliable all-weather ATC and landing capabilities ashore and afloat. Funded programs are required to upgrade or replace aging ATC and approach/landing equipment on aircraft, aircraft carriers, amphibious ships, Naval Air Stations, and Navy/Marine Corps tactical/expeditionary airfields and remote landing sites. Development of a Global Positioning System (GPS) data link is required to enable the transfer of precise positioning information between ships and aircraft.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

W0993 Carrier Air Traffic Control	2,721	2,080	4,195	6,470	7,108	2,082	1,979	2,028	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Shipboard Air Traffic Control Centers identify, marshal, and direct aircraft within 50 Nautical Miles (nm) to a ship's Automatic Carrier Landing System (ACLS) and Independent Landing Monitor (ILM). The ACLS and ILM then provide precise automatic control and verification of aircraft during their final approach and landing sequence. Due to the AN/SPN-46 radar's acquisition limitation in rain, a Moving Target Detection (MTD) capability is required. This technology is also being evaluated for use in the AN/SPN-43 search surveillance radar.

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

#### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$1,900) Continued MTD development for AN/SPN-46(V) to increase performance capability in rain.
- (U) (\$225) Began evaluation of MTD technology for use in AN/SPN-43 radar.
- (U) (\$596) Provided engineering, test and evaluation, and project management support efforts for AN/SPN-46(V) MTD and AN/SPN-43 MTD.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Provide for continued development, integration, and testing of hardware and software to meet requirements for all-weather operation and improved flight safety of Air Traffic Control and Automated Landing System (ALS) at Navy/Marine Corps expeditionary airfields.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$258) Completed certification and field software for MODE I ALS capability.
- (U) (\$565) Developed, tested and certified TADIL-B/C Version I Operational Software.
- (U) (\$22) Studied AN/TPN-22 Modulator design changes and Communications System Remote Landing Site Tower (RLST) compatibility issues.

### 2. (U) FY 1995 PLAN:

- (U) (\$508) Develop, test, and begin certification of Version M software for increased automation for MATCALs control of fleet air.
- (U) (\$53) Analyze and evaluate performance and safety improvements from applications of Differential Global Positioning Satellite data.
- (U) (\$968) Develop, test and certify improvements in TADIL-B/C software to obtain improved flight safety and control of aircraft in tactical operations and Version M of the MATCALs Operational Software.

DATE: February 1995

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604504N

PROJECT NUMBER: X0718

PROGRAM ELEMENT TITLE: Air Control PROJECT TITLE: Marine Air Traffic Control Automatic Landing System

### 3. (U) FY 1996 PLAN:

- (U) (\$1,293) Develop, test and begin certification of Version N software enhancements, as an eventual replacement for the previous version of software, required to accommodate control of new and/or modernized Fleet aircraft.
- (U) (\$124) Develop, test and begin certification of differential GPS approach and landing capability for Fleet aircraft using MATCALS.

### 4. (U) FY 1997 PLAN:

- (U) (\$950) Complete development, testing and certification of Version N software enhancements required to accommodate control of new and/or modernized Fleet aircraft.
- (U) (\$460) Complete development, testing and certification of Differential GPS approach and landing capability for Fleet aircraft using MATCALS.

### B. (U) PROGRAM CHANGE SUMMARY:

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This Navy unique program addresses the Engineering and Manufacturing Development (E&MD) of all systems required to launch and recover Navy/Marine Corps aircraft (fixed wing, rotary wing and Vertical/Short Take-Off and Landing (VSTOL)) operating aboard aircraft carriers (CV/CVN), amphibious assault ships (LHA/LHD) and aviation facility ships. This program includes E&MD of:

- (U) The Improved Carrier Optical Landing System (ICOLS), which includes the Improved Fresnel Optical Landing System (IFLOLS) and the Long Range Line-up System (LRLS), to provide longer range, higher accuracy visual landing aids (VLA) for pilots landing on aircraft carriers.
- (U) The Mark 7 Mod 4 (MK 7 MOD 4) arresting gear to increase the aircraft landing weight capability.
- (U) The Integrated Shipboard Information System (ISIS) to employ existing and emerging technology to enable rapid input, collection, processing and distribution of relevant air operations information and then display this information on electronic monitors in all air operations work centers throughout the ship.
- (U) The Aviation Data Management and Control System (ADMACS) as a real-time, configuration managed, tactical, local area network, for the specific support of the Air Department and the Aircraft Launch and Recovery Equipment (ALRE) data and C'I requirements on ships. It also provides connectivity among ALRE systems such as ICOLS, ISIS and ALRCS and links Air Operations with other onboard tactical and support networks.
- (U) The Advanced Launch and Recovery Control Systems (ALRCS) to introduce modern, modularized computer control systems to the catapults and arresting gear on aircraft carriers.

FY 1996 ROT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1991

BUDGET ACTIVITY: 5      PROGRAM ELEMENT: 0604512N      PROJECT NUMBER: W2232  
PROGRAM ELEMENT TITLE: Shipboard Aviation Systems      PROJECT TITLE: CV Launch & Recovery Sys

- (U) The Virtual Imaging System for Approach and Landing (VISUAL) to provide the ship's company and pilots with enhanced images of the aircraft and ship, respectively, in low visibility and night conditions.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING AND MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to a production approval decision.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) ( \$849) Completed design of the ICOLS LRLS Engineering Development Model (EDM) and initiated shipboard prototype demonstration.
- (U) ( \$539) Completed preliminary design of Mark 7 Mod 4 arresting gear EDM.

### 2. (U) FY 1995 PLAN:

- (U) (\$1,521) Complete shipboard prototype demonstration of ICOLS LRLS. Issue Request for Proposals (RFP) for contract to develop ICOLS LRLS EDM as a modified Non-Developmental Item (NDI).

### 3. (U) FY 1996 PLAN:

- (U) (\$4,370) Award contract for delivery of the ICOLS LRLS EDMs.
- (U) (\$1,659) Complete fabrication of ICOLS IFLOLS EDM and conduct Technical Evaluation (TECHEVAL) and start Operational Evaluation (OPEVAL).
- (U) (\$2,940) Initiate design of the ISIS EDM.
- (U) (\$2,364) Initiate design of the ADMACS EDM.
- (U) ( \$10) NAVAIRHQ CV Launch & Recovery Systems Program support travel.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program supports the full scale development of equipment/systems to enable continued, effective combat missions through protection from weapons effects due to hostile actions and peacetime accidents. This program also supports the engineering development of improved Damage Control/Fire Protection and Firefighting equipment, devices, and systems for rapid control/suppression of damage/fire with retention of ship mission.

(U) This program also develops chemical, biological, and radiological (CBR) defensive systems and concepts for surface ships, required to counter CBR threats in the near term (1990s) as identified in Defense Planning Guidance. Development addresses individual and collective protection, detection and monitoring, and decontamination equipment.

(U) PBD 250 directs, starting in FY 1996, that services for P.E. 0604516N/S0410 budgets for nuclear, biological, and chemical (NBC) defense programs be consolidated in OSD accounts. P.E. 0604384D/S041 applies to this project and budget activity.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project supports the full scale engineering development of systems and components to provide protection from weapons effects for continued combat missions. Includes development of armor system for defeating rocket and missile threats, electrical components which support uninterruptible combat capability, and blast tolerant magazine boundaries.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$472) Initiated development of blast tolerant missile and torpedo magazine boundaries (BTMB) designed to prevent impact of the boundary with stowed munitions. Initiated construction of full scale blast chamber.
- (U) (\$358) Conducted land-based demonstration of Navy Standard Electronic Power System (NSEPS) and prepared specification.
- (U) (\$300) Conducted test and evaluation (T&E) of prototype shock hardened combat system circuit breakers.
- (U) (\$100) Conducted fire vulnerability tests of Low-Intensity-Conflict (LIC) armor systems designed to defeat rocket and small missile threats.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604516N

PROGRAM ELEMENT TITLE: Ship Survivability

PROJECT NUMBER: S1828

PROJECT TITLE: Combat Readiness & Sustainability

### 2. (U) FY 1995 PLAN:

- (U) (\$700) Complete construction of blast chamber for BTMB effort and conduct testing; prepare standard drawing.
- (U) (\$310) Complete land-based testing of NSEPS and initiate ship-based testing.
- (U) (\$328) Complete T&E on shock hardened circuit breaker; prepare specification.
- (U) (\$40) Complete fire vulnerability tests of LIC armor systems. Develop performance specification.

### 3. (U) FY 1996 PLAN:

- (U) (\$275) Complete ship-based testing of NSEPS and finalize specification.
- (U) (\$730) Initiate engineering development of electrical device for rapidly clearing weapons-induced faults located on a main bus duct or feeders. (Transitioned from P.E. 0603514N, S0384, Ship Survivability (Adv)).

### 4. (U) FY 1997 PLAN:

- (U) (\$817) Complete development of electrical fault clearing device and conduct acceptance testing. Complete planning for full scale weapons effects tests to validate performance in a threat environment.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project supports the engineering development and fleet introduction of advanced, survivable damage control and information management (IM) systems which enables a rapid response to wartime and peacetime casualties for effective recovery/restoration. This project also develops total ship tactics and doctrine for effectively fighting major ship threatening conflagrations (fire, smoke, flooding) resulting from wartime threats and peacetime accidents.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$112) Modified quick acting watertight door (QAWT) and completed standard drawings.
- (U) (\$972) Completed multi-station at-sea evaluation of Integrated Survivability Management System (ISMS) on selected amphibious ships.
- (U) (\$538) Completed multi-station evaluation of ISMS in actual firefighting environment onboard ex-USS SHADWELL.
- (U) (\$474) Completed ISMS software documentation and configuration management plan.

# UNCLASSIFIED

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604516N

PROGRAM ELEMENT TITLE: Ship Survivability

PROJECT NUMBER: S2054

PROJECT TITLE: Integrated Fire Protection/Damage Control

- (U) (\$440) Initiated packaging optimization of the hand-held Repair Team Terminal (RTT) device which provides for communication with ISMS.
  - (U) (\$350) Assessed vulnerability of missile magazine fire suppression systems to weapons effects.
  - (U) (\$966) Initiated multi-compartment integrated firefighting experiments onboard ex-USS SHADWELL in support of developing improved tactics and doctrine for vertical entry into Class B fires, simultaneous firefighting and dewatering, and ventilation of compartments during active firefighting.
2. (U) FY 1995 PLAN:
- (U) (\$1,615) Conduct integrated firefighting experiments on board ex-USS SHADWELL in support of developing improved tactics and doctrine for attacking major machinery space fires. Upgrade the ex-USS SHADWELL to meet safety requirements and overall program objectives.
  - (U) (\$425) Initiate evaluation of state-of-the-art commercial fire and smoke sensor systems to provide location of primary damage zone and real-time damage tracking (RTDT). Procure commercial sensor systems and initiate land and ship based performance evaluations.
  - (U) (\$520) Initiate shipboard T&E on the computer-based Damage Control System (DCS) to assess performance under realistic shipboard conditions. DCS incorporates the functional capabilities of ISMS plus mobility status, actuator control, and combat system diagrams. Install DCS on board USS ANZIO (CG 68) and prepare for fleet evaluation during damage control exercises. Install DCS on board ex-USS SHADWELL in preparation for total ship evaluations under P.E. 0603514N, Project S1565, Fire Protection/Damage Control Systems.
  - (U) (\$300) Prepare Navy Training Plan for DCS and install at the Surface Warfare Officer School (SWOS).
  - (U) (\$1,591) Conduct various tasks; including, conduct technical and logistic support assessments for existing damage control/firefighting equipment and systems, and update fleet technical documentation.

Protection/Damage Control

## 3. (U) FY 1996 PLAN:

- (U) (\$700) Complete land and ship based RTDT system evaluations. Prepare preliminary performance specifications for ruggedized fire and smoke sensor system.
- (U) (\$1,200) Complete development of doctrine for major machinery space fires. Conduct firefighting experiments based on fleet identified issues. Complete ex-USS SHADWELL upgrade.
- (U) (\$362) Initiate DCS tactical guidance modules providing for on-screen call-up of key firefighting tactics and doctrine.
- (U) (\$350) Initiate development of DCS man-machine interface enhancements to provide for rapid assimilation of data at Damage Control Central and the overall battle organization. Enhancements include development of specific screen displays based on the responsibilities of each group (e.g., Repair Lockers, Engineering, and Combat Systems) within the battle organization.
- (U) (\$590) Initiate integration of casualty decision aides for real-time stability assessments, structural hull girder analysis, and vital systems reconfiguration into DCS.
- (U) (\$400) Prepare training package for DCS including detailed SWOS course curriculum and shipboard embedded training package.
- (U) (\$300) Complete fleet evaluation of DCS on board the USS ANZIO.

## 4. (U) FY 1997 PLAN:

- (U) (\$700) Procure ruggedized RTDT system. Begin land based and shipboard Test & Evaluation (T&E).
- (U) (\$900) Continue firefighting experiments onboard ex-USS SHADWELL in support of developing improved tactics and doctrine based on fleet identified issues.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The ACDS Block 1 program replaces the vintage Naval Tactical Data System (NTDS) operating systems and applications algorithms and implements advanced concepts for Tactical Data System upgrades for surface combatants in response to future threats, operational deficiencies and new and existing operational requirements. The increased emphasis on joint operations and littoral warfare has heightened the importance of ACDS Block 1's joint interoperability and increased track/range capabilities. The program's objective is to develop integrated, coherent ship's real time command support systems that will increase operational capabilities; promote standardization and introduce new shipboard tactical displays and support equipment; and provide integration between sensor/weapons systems which are organic to and outside the battle force. This program provides for significant Combat Direction System (CDS) improvements including implementation of the Joint Tactical Information Data System (JTIDS)/ Tactical Data Information Link (TADIL) J (LINK 16) message standard to support interoperability/joint operations with U.S. Navy/Air Force/Marine and NATO forces; implementation of the Aegis Tactical Executive System (ATES); and integration and interface with the Command and Control Processor (C'p), the Cooperative Engagement Capability (CEC), and Ship's Self Defense System (SSDS). This program will be an integral part of the LPD-17 and CVN-76 combat system, integrating battle management functions of all other sensor and weapon systems.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:
  - (U) (\$7,686) Completed coding, development, and contractor test of the ACDS Block 1 Level 1 lead ship program.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604518N

PROJECT NUMBER: U1604

PROGRAM ELEMENT TITLE: CIC CONVERSION/NTDS IMPROV.

PROJECT TITLE: NTDS SOFTWARE IMPROV.

- (U) (\$135) Completed test procedures for Level 1 Program Acceptance Test (PAT).
- (U) (\$100) Conducted Test Readiness Review (TRR) for PAT.
- (U) (\$1,488) Began PAT on Level 1 lead ship program.
- (U) (\$30) Conducted Combat System Integration Test (CSIT) Readiness Review.
- (U) (\$1,235) Conducted platform integration testing (DT IIA) on USS Constellation (11/93 -5/94).
- (U) (\$685) Began system engineering and design efforts for the ACDS Block 1 Level 2 Follow Ship which includes the Cooperative Engagement Capability (CEC) integration and conduct a Software Requirements Review (SRR) on the Level 2 computer program.
- 2. (U) FY 1995 PLAN:
  - (U) (\$4,494) Complete PAT and begin CSIT (DT IIB) on the Level 1 lead ship computer program.
  - (U) (\$390) Begin plans and procedures for TECHEVAL and OPEVAL.
  - (U) (\$835) Perform at-sea testing and demonstrations on USS CONSTELLATION (1/95 - 6/95).
  - (U) (\$1,681) Begin Lead ship installation preparations and develop training for crew.
  - (U) (\$200) Conduct a Preliminary Design Review (PDR) and a Critical Design Review (CDR) on the Level 3 computer program.
  - (U) (\$5,721) Begin coding and modification of existing code for the new Level 2 (CEC variant) functionalities.

DATE: February 1995

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604518N

PROJECT NUMBER: U1604

PROGRAM ELEMENT TITLE: CIC CONVERSION/NTDS IMPROV.

PROJECT TITLE: NTDS SOFTWARE IMPROV.

## 3. (U) FY 1996 PLAN:

- (U) (\$2,500) Complete CSIT and correct priority Trouble Reports (TRs) to the Level 1 computer program.
- (U) (\$1,927) Conduct System Integration Testing (SIT) of Level 1 on the lead ship.
- (U) (\$1,000) Complete curriculum and conduct training of the system to the lead ship crew.
- (U) (\$2,675) Begin TECHEVAL and OPEVAL testing of the Level 1 computer program aboard CV64.
- (U) (\$6,557) Conduct and complete CSIT of Level 2 making code modification to the program.
- (U) (\$1,200) Complete LHD-1 and CVN-69 installation preparations and participate in the Cooperative Engagement Capability (CEC) fleet introduction.

## 4. (U) FY 1997 PLAN:

- (U) (\$3,500) Complete TECHEVAL and OPEVAL making required changes to the Level 1 program.
- (U) (\$325) Prepare for ASN(RDA) Formal Review to achieve Milestone III.
- (U) (\$6,699) Complete Level 3 system engineering, computer program code modification, test procedures and plans, and begin PAT.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

PROGRAM ELEMENT: 0604524N  
PROGRAM ELEMENT TITLE: Submarine Combat System

BUDGET ACTIVITY: 5

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
F1941 AN/BSY-2	84,547	84,681	43,302	16,461	12,732	9,627	0	0	0	1,792,133

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Chief of Naval Operations established the SSN 21 SEAWOLF and the AN/BSY-2 Combat System Top Level Requirements in June 1986. The development objectives for AN/BSY-2 are: Meet the SEAWOLF combat system related TLR; develop an architecture which facilitates tactical improvements and future growth; and provide computer processes that improve response time from initial threat detection to weapon launch. AN/BSY-2 will provide new acoustic arrays which have improved self-noise characteristics and improved detection performance. It will provide computer aids to assist the operator in sensor, contact and weapon management, and will support employment of the most advanced submarine weapons from eight torpedo tubes. Software is now being developed for two incremental deliveries. The SDCT-1 delivery for initial sea-trials has almost completed certification. The SDCT-2 final delivery will complete in early 1996 and be installed after ship delivery in late 1996. The system architecture has been partitioned to facilitate tactical improvements, future growth, and high availability.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end items prior to production approval decision.

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:
  - (U) (\$7,481) Completed delivery of AN/BQG-5 to SSN 710.
  - (U) (\$50,000) Initiated System Design Certification Test (SDCT-I).
  - (U) (\$27,066) Completed AN/BQG-5 SDCT.

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604524N

PROJECT NUMBER: F1941

PROGRAM ELEMENT TITLE: Submarine Combat System

PROJECT TITLE: AN/BSY-2

### 2. (U) FY 1995 PLAN:

- (U) (\$50,000) Complete SDCT 1 integration.
- (U) (\$25,000) Complete AN/BSY-2 SDCT 1.
- (U) (\$ 9,681) Deliver AN/BSY-2 system to SSN 21.

### 3. (U) FY 1996 PLAN:

- (U) (\$8,000) Complete SDCT 2 integration.
- (U) (\$10,000) Complete AN/BSY-2 SDCT 2.
- (U) (\$13,000) Complete Combat System Installation Certification (CSIC).
- (U) (\$6,151) Deliver AN/BSY-2 to SSN 22.
- (U) (\$6,151) Deliver AN/BSY-2 system to SSN 23 (in FYDP FY96).

### 4. (U) FY 1997 PLAN:

- (U) (\$4,000) Complete Weapon System Accuracy Trials (WSAT).
- (U) (\$4,000) Initiate CSIC II.
- (U) (\$4,000) Initiate WSAT II.
- (U) (\$4,461) Initiate Post Shakedown Availability (PSA).

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: A principal challenge to the U.S. Navy is to maintain the submarine fleet essential to defend American interests. The New Attack Submarine (New SSN) is being designed to meet the potential threats of the next century in a multi-mission capable submarine that has the ability to provide covert, sustained presence in denied waters. The primary goal of the program will be to develop an affordable yet capable submarine by evaluating a broad range of system and technology alternatives, and examining cost reduction, producibility improvement, and technical risk reduction. This Program Element (PE) provides the technology, prototype components, and systems to design and construct the New SSN and build in its Command, Control, Communications, and Intelligence (C<sup>3</sup>I) System. This PE directly supports the following New SSN missions: (1) covert strike warfare; (2) anti-submarine warfare (3) covert intelligence collection/surveillance, indication and warning, and electronic warfare; (4) anti-surface ship warfare; (5) special warfare; (6) mine warfare; and (7) battle group support.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604558N

PROGRAM ELEMENT TITLE: New Design SSN Development

(U) COST (Dollars in Thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
F1947 New Design SSN HM&E	139,581	135,346	237,859	297,970	244,762	154,257	128,297	131,523	399,209	1,868,804

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project encompasses all the Hull, Mechanical and Electrical (HM&E) development efforts for the New SSN. The traditional distinct phasing of the design process has been replaced with a continuous concurrent engineering process called Integrated Product and Process Development (IPPD). This serves to maintain the focus of multi-discipline teams consisting of government, shipbuilder and suppliers. This process is essential to achieve the maximum cost reduction possible in a low rate production environment. The thrust of these efforts will be to develop and apply HM&E system technologies which enable design of an attack submarine system. This approach to technology innovation will carefully balance military capability, development and acquisition cost, impact on ship weight and volume, and technical risk. Leveraging and capitalizing on existing technologies and vendor bases for existing components from SSN 688I, TRIDENT, and SEAWOLF will minimize both cost and risk. Varying degrees of re-engineering of existing systems may be required to adapt them to the new submarine's requirements and minimize vendor risks of constructing a new ship with overlapping technology development. Newly developing technologies will be transitioned from ongoing industry and government research and development programs where doing so will offer substantial affordability payoffs, without sacrificing military capability. HM&E development will support a FY 1998 lead ship construction contract award.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$76,198) Initiated system verification testing and analysis to support pressure hull structure confirmation

PROJECT NUMBER: F1947  
PROJECT TITLE: New Design SSN HME

models, hydrodynamic modeling, and acoustic signature modeling and predictions. Initiated development of specifications for technologies such as high speed diesel, secondary propulsion motor, modular masts and electric power distribution components. Initiated studies to apply electromagnetic signature reduction to the New SSN. Continued transition from advanced development technologies and components such as ship control station, main propulsion unit, gas management system, hydraulic actuators, trim and drain pump, and the weapon stowage, handling, and launcher systems to support Milestone I decision.

- (U) (\$12,099) Initiated development of an IPPD plan, with emphasis on cost-reduction. Executed process improvements, including early vendor involvement in specifications, build strategy, concurrent engineering, and commonality of parts. Performed cost-based review of ship and design/construction process to integrate new and previously identified improvements. Continued initiatives to simplify system design and component design for affordability. Reviewed data base of cost-reduction ideas for continuing incorporation into the process. Initiated Environmental Compliance and Pollution Prevention efforts.
- (U) (\$10,050) Supported the design process with supportability trade-off analysis. Provided program and special studies support at Navy Labs, shipyards and in-house.
- (U) (\$41,234) Implemented the IPPD concurrent engineering development of the New SSN through design/build teams at the shipbuilder for all non-propulsion efforts. Established and staffed concurrent engineering project management teams and developed a comprehensive design and construction data base to provide information for arrangement and installation drawings, material ordering data, manufacturing plans, and integrated construction schedules. Established and maintained an electronic mock-up of the forward ship areas.

## 2. (U) FY 1995 PLAN:

- (U) (\$111,714) Continue system verification studies, tests and analysis in support of ship design. Continue development of components and technologies such as high speed diesel, secondary propulsion motor, modular masts and electric power distribution components. Continue development of components and technologies such as electromagnetic signature reduction, ship control station, gas management system, and main propulsion unit. Initiate transition of technologies such as propulsor, ship service turbine generator, reverse osmosis desalination, and main shaft seal from Advanced Development to support Milestone II decision. Conduct Cost and Operational Effectiveness Analysis (COEA), and Early Operational Assessment (EOA) of New SSN platform and report findings. Prepare test plans associated with Developmental Testing. Award Level of Effort (LOE) and Improved performance Machinery Program (IPMP) contracts.

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604558N

PROJECT NUMBER: F1947

PROGRAM ELEMENT TITLE: New Design SSN Development

PROJECT TITLE: New Design SSN HM&E

- (U) (\$9,745) Prepare refined ship cost estimate. Continue projects which improve producibility and reduce procurement and life cycle costs. Continue Environmental Compliance and Pollution Efforts.
- (U) (\$13,887) Continue the design process with supportability trade-off analysis. Continue to provide program and special support at Navy Labs, shipyards and in-house.
- 3. (U) FY 1996 PLAN:
  - (U) (\$202,162) Continue design and manufacturing of prototype technologies and components such as: high speed diesel, main propulsion unit, ship service turbine generator, weapons launch systems, propulsion shaft, thrust bearing, electric power distribution components, electromagnetic signature reduction, air conditioning and refrigeration units, gas management system, and ship control station. Complete at-sea evaluation of reverse osmosis desalination. Validate design and production processes for modular integrated decks with detailed finite element models and small scale testing of constituent items. Initiate design of prototype propulsor for Large Scale Vehicle (LSV) evaluation. Continue system verification studies, tests, and analyses in support of ship design.
  - (U) (\$11,691) Conduct analysis in support of force effectiveness assessment and component performance trade-offs. Develop and maintain cost reducing approach to New SSN construction through use of IPPD's concurrent engineering and design/build philosophy. Conduct coordination of New SSN specifications at the shipbuilder. Provide cost estimating and validation of cost reduction ideas for New SSN overall design development. Continue Environmental Compliance and Pollution Prevention efforts.
  - (U) (\$24,006) Development of a New SSN logistic support concept, Reliability, Maintainability, and Availability (RM&A) modeling analyses of New SSN systems, concept definition and development of an Onboard Team Trainer, development of HM&E trainers, operating and support (O & S) cost research, and prototyping of an Integrated Weapons System Data Base (IWSDB) environment that supports the Joint Continuous Acquisition Life Cycle Support (JCALS) concepts, evolving toward a "paperless ship".

## 4. (U) FY 1997 PLAN:

- (U) (\$253,718) Initiate fabrication of prototype forward deck modules and continue development evaluation of components on integrated deck modules. Continue design and manufacturing of prototype technologies and components such as: main propulsion unit, ship service turbine generator, weapons launch systems, propulsion shaft, thrust bearing, electromagnetic signature reduction, gas management system, and ship control station. Complete fabrication of prototype reverse osmosis desalination unit. Complete design and initiate testing of scaled prototype propulsor on LSV. Complete prototype testing of high speed diesel. Initiate shock qualification testing of various components. Continue system verification studies, tests, and analyses in support of ship design.
- (U) (\$12,523) Continue effectiveness analyses and evaluations relating to force effectiveness. Conduct analysis in support of force effectiveness assessment and component performance tradeoffs. Maintain cost reducing approach to New SSN construction through use of IPPD's concurrent engineering and design/build philosophy. Continue coordination of New SSN specification at the shipbuilder. Continue cost estimating and validation of cost reduction ideas for New SSN overall design development. Continue Environmental Compliance and Pollution Prevention efforts.
- (U) (\$24,584) Continue development of a New SSN logistic support concept through trade-off studies and analyses, RM&A modeling analyses of New SSN systems, concept definition and development of an Onboard Team Trainer, development of HM&E trainers, O & S cost research, and prototyping of an IWSDB environment that supports the JCALS concepts. Prepare test plans associated with Developmental Testing.
- (U) (\$7,145) Extension of Digital Data Exchange of all data between the Navy and shipbuilder. Provide program and support at Navy Labs, shipyards and in-house. Conduct feasibility studies and engineering evaluation of potential expanded mission capability and address the feasibility of incorporating late emergent technologies into later hulls of the New SSN. Conduct engineering review and analysis of shipyard and vendor proposed technology initiatives.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project encompasses the top level systems development and overall integration of the New SSN C'I System (formerly referred to as Combat Systems), which includes multiple subsystems, into the ship. The traditional distinct phasing of the ship design process has been replaced with a continuous concurrent engineering process called Integrated Product and Process Development (IPPD). This serves to maintain the focus of multi-discipline teams consisting of the government, shipbuilder and suppliers. This process, which includes the C'I System efforts, is essential to achieve the maximum cost reduction possible in a low rate production environment. The scope of the system is expanded from Sonar and Combat Control subsystems to include Electronics Support Measures, Exterior Communications, Submarine Defensive Warfare System, Navigation, Total Ship Monitoring, Interior Periscope/Imaging, Tactical Acoustic Communications, Radar, Navigation Sensor System Interface (NAVSSI), Interior Communications, Tactical Support Devices, Fiber Optic Backbone, and Special Purpose Subsystems, such as Battle Force Team Trainer and others. The Research, Development, Test and Evaluation funds identified encompass New SSN specific development efforts (not programmed in other program lines) and integration of these multiple subsystems at an Integration Test Site prior to ship delivery.

(U) New SSN plans to use an acquisition and implementation approach based on Open System, Commercial-Off-The-Shelf (COTS) Non-Developmental Items or subsystems; leveraging on-going subsystems developments; and developing new subsystems when needed to satisfy New SSN requirements. The recurring cost of future C'I Systems must be reduced to meet the program's affordability goals. Modifications to many subsystems must be developed to: (1) reduce the shipbuilding and construction recurring costs through the use of COTS components; (2) use proven computer technologies to evolve to an Open System design; (3) enhance capabilities to support expanded operational requirements, reduced manning, and reduced shipboard footprint.

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604558N

PROJECT NUMBER: F1950

PROGRAM ELEMENT TITLE: New Design SSN Development

PROJECT TITLE: New Design SSN Combat System Development

(U) To meet the combined threat, the submarine force must continue to operate as effectively in littoral regions as it traditionally has in open ocean. Close coordination with surface battle groups and airborne units is essential to mission accomplishment. To support the New SSN mission, the following functional capabilities are provided or supported by the New SSN C'I System: (1) Passive and Active detection of multiple contacts, including early warning threat determination through processing and analysis of sensor data; (2) classification of sensor data for the purpose of identifying contacts, (3) localization (tracking) of contacts through target motion analysis; (4) preset, launch, and control of weapons and countermeasures; (5) improved communication and connectivity with other battle group elements, airborne units, and special operations forces; (6) incorporation of Vertical Launch System to enhance strike warfare; and (7) more effective covert surveillance through video imaging with onboard digital enhancement capabilities and improved electronic warfare analysis and exploitation capabilities.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$19,479) Initiated top level system activities associated with C'I System requirements in the following areas: system level specifications development; interface control document preparation, and definition of the C'I System Integration effort. Conducted Phase 2 Open System Architecture Demonstrations.
- (U) (\$42,743) Began development and transition for Combat Control and Sonar subsystems which includes: the transition to COTS hardware and software; the transition of sonar advanced development efforts; and development and integration of a Computer Open System Module to support Milestone I decision.
- (U) (\$10,655) Started development efforts to support New SSN unique requirements for other subsystems such as Exterior Communications, Periscope/Imaging, and Navigation.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604558N

PROGRAM ELEMENT TITLE: New Design SSN Development

PROJECT NUMBER: F1950

PROJECT TITLE: New Design SSN Combat System Development

### 2. (U) FY 1995 PLAN:

- (U) (\$28,643) Award Level of Effort (LOE) contract. Continue system level development activities in the following areas: complete system level specifications and interface control documents; develop hardware configuration definition and functional allocation Government Furnished Information packages; conduct PHASE I Critical Item Tests; begin preparation of test and integration plans for the Integration Test Site; and begin C/I System Integration effort. Begin development of the Prime Item Development Specification (PIDS) for Simulation and Stimulation (SIM/STIM) equipment.
- (U) (\$48,338) Combat Control and Sonar subsystems development will continue COTS hardware and software development and the development and integration of a Computer Open System Module. Conduct Cost Operational Effectiveness Analysis (COEA), and Early Operational Assessment (EOA) of New SSN platform and report findings.
- (U) (\$16,512) Continue development efforts to support New SSN unique requirements for other subsystems. Begin Advanced Submarine Tactical Electronic Countermeasures System (ASTECS) Engineering and Manufacturing Development.

### 3. (U) FY 1996 PLAN:

- (U) (\$17,489) System level development activities continue in the following areas: development of test and integration plans for the Integration Test Site; identification of unique hardware and software requirements associated with the Integration Test Site; complete development of the PIDS for SIM/STIM equipment.
- (U) (\$61,884) Award Prime contract and initiate Combat Control and Sonar detailed hardware design, continue software transition and development, continue hardware development, and provide funding for test hardware.
- (U) (\$30,183) Continue development efforts to support unique requirements for other subsystems. Complete ASTECS Preliminary Design Review.

### 4. (U) FY 1997 PLAN:

- (U) (\$21,409) System level development activities continue in the following areas: development of test and integration plans for the Integration Test Site; begin procurement of unique hardware and develop or modify computer software in preparation for the testing and integration of New SSN C'I System; start Integration Test Site development; begin development and procurement of hardware and software for SIM/STIM equipment.
- (U) (\$65,842) Complete Combat Control and Sonar detailed hardware design; continue software transition and development, continue hardware development, prepare for system integration and test, and provide funding for test hardware.
- (U) (\$29,796) Continue development efforts to support unique requirements for other subsystems. Complete ASTECS Critical Design Review.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604561N

PROGRAM ELEMENT TITLE: SSN 21 Development

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE PROGRAM	TOTAL
F1946 SSN 21 Development	73,742	65,161	83,503	97,805	34,463	25,860	0	0	0	1,632,821

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The SSN 21 Class multi-mission submarine will be quiet, fast, heavily armed, survivable, and capable of contending with the projected enemy threat well into the 21st century. The program provides the advanced technology, prototype components and systems to design and construct the SSN 21 and SSN 22, using cost effective modular construction initiatives and technical risk reduction initiatives. Significant technical advances in areas such as silencing, survivability, depth, speed, and combat system integration are also included.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS: The following information is intended to highlight major Research and Development (R&D) efforts and does not include all SEAWOLF R&D efforts.

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$44,019) Continued planning for Live Fire Test (LFT), shock qualification testing of SSN 21 components, tests utilizing the Large Scale Vehicle (LSV), electromagnetic silencing testing, and qualification testing of various SSN 21 components. Completed FSS-8 Shock Test Series. Big Pond Shock test facility at Aberdeen Proving Ground (APG) nearly complete. Prototype Propulsor complete, and delivered to the shipbuilder for installation.
- (U) (\$16,610) Continued hardware/software interface testing of the Ship Control System (SCS), interface of the Data Distribution System (DDS), and system and component interface support during Off Hull Test and ship construction.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604561N

PROJECT NUMBER: F1946

PROGRAM ELEMENT TITLE: SSN 21 Development

PROJECT TITLE: SSN 21 Development

- (U) (\$8,212) Continued development of the Advanced Special Hull Treatment Mold In Place (ASHT MIP) installation technology, and ASHT (low volume) installation. ASHT at-sea test patch installed on SSN 762. Pre-delivery portion of lead ship installation in progress.
  - (U) (\$4,901) Continued Performance Trials preparations, including technical assessment of 155V DC power supply equipment and preparation for refurbishment following testing. Remaining prototypes delivered to the shipbuilder for installation.
2. (U) FY 1995 PLAN:
- (U) (\$32,763) Continue planning for LFT, shock qualification testing of SSN 21 components, testing utilizing the LSV, qualification testing of various components of the SSN 21. Complete the APG shock test facility. Conduct A/B-1 shock test and commence overhaul of A/B-1 test vehicle. Commence FSS-8 shock vehicle overhaul. Prototype propulsor installed on lead ship.
  - (U) (\$14,831) Continue hardware/software interface testing of the SCS, interface of the DDS, and system and component interface support during ship construction.
  - (U) (\$6,626) Complete the pre-delivery portion of ASHT lead ship installation. Continue development, installation, and evaluation of ASHT MIP installation technology, ASHT at-sea test patches, and ASHT (low volume) installation to support lead ship PSA installation.
  - (U) (\$10,941) Continue Performance Trials preparations, including technical assessment of 155V DC power supply equipment in preparation for refurbishment.
3. (U) FY 1996 PLAN:
- (U) (\$30,434) Commence and support acoustic, noise, and deep submergence trials planning and analyses.
  - (U) (\$24,799) Continue shock tests, overhaul test vehicles, support test facilities.

PROJECT TITLE: SSN 21 Development

- (U) (\$6,922) Continue development of ASHT MIP installation technology and at-sea test patches.
  - (U) (\$10,975) Complete integration of DDS, interface testing of the SCS, and system and component interface during ship construction.
  - (U) (\$10,373) Complete qualification and testing of various systems and components.
4. (U) FY 1997 PLAN:
- (U) (\$49,892) Commence LFT, Big Pond shock tests, and underwater explosion instrumentation and post-test inspection.
  - (U) (\$11,524) Commence Post Shakedown Availability (PSA) installation of ASHT, system qualification and inspection.
  - (U) (\$36,389) Complete pre-PSA trials, i.e., acoustic trials, hydroacoustic trials, electromagnetic silencing trials, sonar certification, torpedo trials, and weapons certification prior to PSA. Support resolution of LFT testing deficiencies. Commence certifications during PSA.

## FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604562N

PROGRAM ELEMENT TITLE: Submarine Tactical Warfare System

(U) COST: (Dollars in Thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
S0236 SSN Combat System Improvement										
	33,846	24,330	38,479	32,070	40,570	41,321	39,293	38,972	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program develops software upgrades to integrate improved weapons capabilities within submarine Combat Control System (CCS) MK1, MK2, and AN/BSY-1 (Combat Control) and, as a part of the Obsolete Equipment Replacement, the program develops improvements to hardware which has become increasingly difficult and not economical to maintain. In FY 1994 and beyond, the thrust of the CCS Improvement program is the fleet introduction of CCS MK2 Program D0, AN/BSY-1 Engineering Change Proposal (ECP) 134 and Navy Tactical Command System-Afloat (NTCS-A), and the development of CCS MK2 Program D0 Blocks 1 and 2. ECP 134 provides Tomahawk Blocks 1 and 3 capabilities to AN/BSY-1 equipped submarines. NTCS-A provides battlegroup interoperability and Over-the-Horizon correlation algorithm updates to AN/BSY-1 and CCS MK1 equipped submarines. CCS MK2 converged multiple submarine combat system developments into a single effort to minimize submarine life cycle costs, i.e., SSN 688, SSN 688I and SSBN 726 Classes. CCS MK2 Program D0 provides a modular software architecture, introduces Tomahawk Block 3 and Harpoon Block 1C capabilities, introduces Advanced Capability (ADCAP) on TRIDENT, and replaces obsolete equipment. CCS MK2 Program D0 Block 1 integrates CCS MK2 into AN/BSY-1 systems, replaces additional obsolete equipment, provides updates to the World Vector Shoreline data base and incorporates a direct interface to the Global Positioning System, incorporates NTCS-A into CCS MK2, and implements Tomahawk Block 3 Phase III (Tomahawk Strike Planning System) and ADCAP torpedo improvements. Navigation Sensor Interface (NAVSSI) provides real-time, accurate positional and velocity information for distribution to Combat Control and other shipboard subsystems. CCS MK2 Program D0 Block 2 incorporates anticipated upgrades to ADCAP, Tomahawk and Harpoon Submarine CCS.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604562N

PROJECT NUMBER: S0236

PROGRAM ELEMENT TITLE: Submarine Tactical Warfare System PROJECT TITLE: SSN Combat System Improvement

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$5,571) Completed Technical Evaluation (TECHEVAL)/Operational Evaluation (OPEVAL) for CCS MK2 Mods 0/1.
- (U) (\$3,800) Completed OPEVAL and released CCS MK1 Program C4.2 Rev 1 to the fleet.
- (U) (\$5,328) Conducted TECHEVAL/OPEVAL and released AN/BSY-1 ECP 134 to the fleet.
- (U) (\$1,303) Completed System Design Certification Test (SDCT) for CCS MK2 Program D0 (ECP 6).
- (U) (\$4,500) Obtained Milestone I/II approval and award contract for Ring Laser Gyroscope Navigation Program and procured Production Suitability Models.
- (U) (\$4,500) Modified Non-Developmental Item design to meet Common Ring Laser Gyroscope specification and qualify.
- (U) (\$3,025) Conducted Independent Software Nuclear Safety Analysis (ISNSA) for CCS MK2 Mod 0/1.
- (U) (\$5,354) Obtained Milestone II approval for CCS MK2 Program D0 Block 1 A/B contract.
- (U) (\$465) Certified NTCS-A for CCS MK1 and AN/BSY-1.

### 2. (U) FY 1995 PLAN:

- (U) (\$500) Obtain Milestone III approval for CCS MK2 Mod 0/1.
- (U) (\$21,418) Conduct Critical Design Review (CDR) and SDCT for CCS MK2 Program D0 Block 1 A/B.
- (U) (\$2,412) Continue ISNSA for CCS MK2 Mod 0/1.

## 3. (U) FY 1996 PLAN:

- (U) (\$1,785) Complete Nuclear Certification of CCS MK2 Program D0.
- (U) (\$18,481) Complete SDCT and Development Test (DT) for CCS MK2 Program D0 Block 1 A/B.
- (U) (\$16,713) Obtain Milestone II and award contract for CCS MK2 Program D0 Block 1 C development.
- (U) (\$1,500) Specify and begin development of NAVSSI for submarines.

## 4. (U) FY 1997 PLAN:

- (U) (\$1,325) Complete Operational Test (OT) for CCS MK2 Program D0 Block 1 A/B.
- (U) (\$27,621) Complete CDR for CCS MK2 Program D0 Block 1 C.
- (U) (\$3,124) Commence land-based testing of NAVSSI submarine variant.

## B. (U) PROGRAM CHANGE SUMMARY:

	<u>FY 1994</u>	<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604562N

PROJECT NUMBER: S0236

PROGRAM ELEMENT TITLE: Submarine Tactical Warfare System PROJECT TITLE: SSN Combat System Improvement

## (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: FY94 funds increased by \$165K due to an end-of-year execution update. FY95 funds decreased by \$931K due to undistributed reductions.

(U) Schedule: Milestone III for CCS MK2 Program D0 deferred in accordance with ASN (RD&A) memorandum of 19 December 1994 to support additional CCS MK2 weapon capabilities. Block 1A/B engineering and program milestones slipped due to delay in contract award. Addition of CCS MK2 Program D0 Block 2 schedule.

(U) Technical: Not applicable.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program element (PE) directly supports the Navy's Shipbuilding plan by providing for the development of all post Preliminary Design (through FY 1996) and all post Milestone (MS) I (FY 1997 and out) engineering, programmatic and acquisition documentation, including ship specifications and contractual documents, associated with the acquisition of Navy ships. Modern day ship design and acquisition processes do not separate Preliminary Design from Contract Design. These are seamless design actions and are both conducted between MS I and II. This line also supports the New Attack Submarine (New SSN) Contract Design.

(U) Contract Design is the engineering development of the technical and contractual definition of the ship design (including ship specifications and drawings) to a level of detail sufficient for prospective shipbuilders to make a sound estimate of the construction cost and schedule. Additionally, the contract design package developed under this PE provides the technical baseline from which the Navy selects the shipbuilder who then develops the detail design package required to support the construction and eventual delivery of the ship. This PE also supports the development of design methodologies which facilitate and optimize the transition from ship design documents to efficient production of new ships and ship conversions, and supports engineering planning and ship affordability studies.

(U) This PE also supports Live Fire Test and Evaluation (LFT&E) of new ship designs.

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604567N

PROGRAM ELEMENT TITLE: Ship Contract Design/Live Fire T&E

(U) For the New SSN, the traditional distinct phasing of the design process has been replaced with a continuous concurrent engineering process called Integrated Product and Process Development (IPPD). This serves to maintain the focus of multi-discipline teams consisting of the government, shipbuilder and suppliers. This process is essential to achieve the maximum cost reduction possible in a low rate production environment. The general thrust of these efforts will be to translate the early IPPD design efforts for the New SSN into a well-defined set of specifications and drawings suitable for a Request for Proposal (RFP) package that supports development and construction of an effective nuclear attack submarine.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program supports the development of all technical, programmatic, and contractual documentation required after Preliminary Design (through FY 1996) and after MS, I (FY 1997 and out) for the acquisition of the ships in the Navy's Shipbuilding Program. The major effort is the engineering development of the technical and contractual definition of the ship design (e.g., ship specifications and drawings), with sufficient details for the prospective shipbuilder to make a sound estimate of construction cost and schedule. It also serves as the contractual technical definition from which the selected builder develops the shipbuilding detail design and testing package required to build and deliver the ship.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$10,500) Continued CVN 76 Contract Design.
- (U) (\$19,400) Continued LPD 17 (L(X)) Contract Design.
- (U) (\$ 989) Completed MCS(CONV) Contract Design.
- (U) (\$ 846) Continued TAGOS 23 (TST).
- (U) (\$ 260) Completed TAGS 63 Contract Design.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604567N PROJECT NUMBER: S1803  
 PROGRAM ELEMENT TITLE: Ship Contract Design/Live Fire T&E PROJECT TITLE: Ship Contract Design

### B. (U) PROGRAM CHANGE SUMMARY:

	FY 1994	FY 1995	FY 1996	FY 1997
(U) FY 1995 President's Budget:	31,704	18,428	XXX	XXX
(U) FY 1995 Appropriated	XXX	18,428	XXX	XXX
(U) Adjustments from Appropriated/FY 1995 PRESBUDG:	+291	-3,907	XXX	XXX
(U) FY 1996/97 OSD/OMB Budget Submit:	31,995	14,521	5,519	11,581

### (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: The FY 94 increase of \$291K is due to an end-of-year execution update. FY 95 changes reflect ship award date modifications in the SCN Plan and various Congressional reductions as follows: \$277K for Small Business Innovative Research, \$21K for travel, \$152K for Consulting Services and \$29K for university research.

### (U) Schedule: The current SCN Plan is as follows:

TAGS 63, MCS(CONV)	FY 1994
CVN 76	FY 1995
LPD 17(L(X))	FY 1998
New Design SSN	FY 1998
TAGOS 25, AOE SLEP	FY 1999
TAGS 64	FY 1999
ADC(X)	FY 2000
LHD MOD REPEAT	FY 2001
CARRIER REPLACEMENT	FY 2002
SC 21	FY 2003
MCS(X), LHA/LH(X)	FY 2005

(U) Technical: Not applicable.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project funds development, improvement and update of NAVSEA cognizant acquisition specifications including Federal and Military Specifications, Handbooks and General Specifications for Ships of the U.S. Navy. NAVSEA is responsible for 4600 Military Specifications and Standards, 149 Federal Specifications and Standards, 3100 Standard/Type Drawings and Design Data Sheets, 362 Ship General Specification sections and 122 Non-Government Standards. These documents are required to reflect the latest technologies (i.e. fiber optics), manufacturing techniques, environmental requirements, hazardous material reduction, safety and legal/Congressional requirements. This project also funds the development and implementation of computer-aided design/computer-aided manufacturing (CAD/CAM) systems to improve the transition from the Navy's Contract Design to the shipbuilder's detail design and production. Additionally, this project funds the integration of the new fiber optic (FO) technology into the basic ship design process.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$ 600) Continued to update various outdated Federal/Military Specifications, Design Standards and Drawings. Continued to update portions of the General Specifications for Ships of the U.S. Navy. Continued development of Specification data base and Open Systems Architecture.
- (U) (\$ 967) Commenced development of CAD II analysis programs and program integration. Continued development of CAD II ship design systems and modeling techniques for application on CVN 76 and LPD 17.
- (U) (\$ 1,196) Continued development of FO Topology Systems. Continued development of optical cable and fiber connectors required specifications and standards, and optical waveguide measurements and standards. Integrated existing components and standards into LPD 17 and CVN 76 designs.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project specifically responds to the Congressionally mandated Live Fire Test and Evaluation (LFT&E) legislation which requires realistic survivability testing be conducted under all major acquisition programs before production approval is granted. Evaluations concerning the vulnerability and lethality of ships against known threat systems will be conducted using analytical prediction techniques and model testing.

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

#### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$ 7,060) Commenced evaluation of LPD 17 design for HM&E and weapon system vulnerability. Commenced full scale surrogate underwater and air explosion testing.

#### 2. (U) FY 1995 PLAN:

- (U) (\$ 1,001) Complete LPD 17 LFT&E testing and analysis.

#### 3. (U) FY 1996 PLAN: No work planned.

#### 4. (U) FY 1997 PLAN:

- (U) (\$ 911) Commence ADC(X) Live Fire Test and Evaluation.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project encompasses the design efforts for New SSN. The traditional distinct phasing of the design process has been replaced with a continuous concurrent engineering process called Integrated Product and Process Development (IPPD). This serves to maintain the focus of multi-discipline teams consisting of the government, shipbuilder and suppliers. This process is essential to achieve the maximum cost reduction possible in a low rate production environment. The general thrust of these efforts will be to translate the early IPPD design efforts for the New SSN into a well defined set of specifications and drawings suitable for a RFP package that supports development and construction of an effective nuclear attack submarine. Submarine systems will be specified with extreme sensitivity for vendor/manufacturing capability. Engineered systems will carefully balance military capability with the total life cycle cost and technical risk. This effort is necessary for a FY 98 lead ship construction contract award.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS: Not applicable.

Live Fire T&E

PROJECT NUMBER: F2199

PROJECT TITLE: New Design SSN

## 2. (U) FY 1995 PLAN:

- (U) (\$73,124) Begin IPPD effort to implement cost based methodology at all levels of the design. Develop drawings, commence examination and review of Contract Data Requirements List and develop design weight estimate. Analyze tradeoffs to improve and integrate systems for New SSN. Establish Government Furnished Equipment and Contractor Furnished Equipment vendor commitments with respect to cost, schedule and performance. Develop overall schedules integrating both government and contractor developments within overall ship design to support Milestone II decision. Work in close collaboration with the entire manufacturing industry throughout to ensure established requirements are clearly understood, achievable, reasonable, and biddable with minimum risk to industry.
- (U) (\$7,453) Examine the System Definition Documents to determine the most cost effective system approach for the New SSN design.
- (U) (\$10,932) Initiate review of specifications package to remove unnecessary and "how to" requirements, reduce cost and minimize risk to the government and industry. Establish specifications in detail to support the issue of a RFP for the design and construction of the lead ship.
- (U) (\$34,275) Initiate design and engineering studies for the Main Propulsion Unit, Ships Service Turbine Generators, and other propulsion plant components.
- (U) (\$7,795) Conduct supportability analyses and studies to support ship design specification and component development efforts. Establish critical ship and system logistic support guidance.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Standard Embedded Computer Resources include computers, display systems, peripherals, and associated software. These equipments are integral building blocks of larger weapons, sensor, and combat direction systems. This program provides the technical planning and engineering support for development and evolution of the Navy's high performance embedded computer resources for transition to an open system architecture. The program includes product improvement of current generation computers AN/AYK-14, AN/UYK-43 and AN/UYK-44; development of state-of-the-art mass memory storage devices (MMSD); and development of interconnects, interfaces, protocols, and standards (hardware and software) for the highly flexible architectures needed for the Navy's next generation of open systems, COTS/NDI shipboard computers.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING and MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

### A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

Planning and support for development and modification of the Navy's high performance embedded computer resources to meet Open Systems Architecture standards via the Computer Open Systems Implementation Program (COSIP), specifically, transitional improvements to the UYK-43 and UYK-44 computers, assessment of Open Architecture display components, the Mass Memory Storage Device (MMSD), other standard peripherals, and Navy Warfare Tactical Database (NWTDB).

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

#### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$500) For UYK-43, completed Open Systems Module (OSM) development and began assessment of initial Open Systems products.
- (U) (\$500) For UYK-44, began assessment of initial Open Systems products.
- (U) (\$3,180) For COSIP, completed engineering model Computer Resources Information Base (CRIB) and began to populate the CRIB with Non-Developmental Item (NDI) products.

## 2. (U) FY 1995 PLAN:

- (U) (\$250) For UYK-43, certify initial Open Systems products.
- (U) (\$250) For UYK-44, certify initial Open Systems products.
- (U) (\$3,342) For COSIP, complete production model of CRIB and continue to populate CRIB with NDI components; assess and certify candidate technologies, including optical medium, flat panel displays and local area network technology, for application to AEGIS, Ship Defense and NTDS Software Improvement programs.
- (U) (\$3,000) For MMSD, development of higher capacity magnetic commercial off-the-shelf drives and upgrade the Navy's four first article units.
- (U) (\$1,394) For NWTDB, continue development, test and evaluation.

## 3. (U) FY 1996 PLAN:

- (U) (\$60) Travel to monitor COSIP and MMSD efforts funded in FY-95 and to assure that COSIP activities are prepared to undertake the assessment and certification of candidate technologies scheduled to begin in FY-97.

## 4. (U) FY 1997 PLAN:

- (U) (\$2,953) Assess and certify candidate technologies, including distributed operating and network systems for AEGIS, Ship Defense, and other related activities.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The AN/AYK-14 project provides for airborne digital computer requirements with a standard design that has permitted state-of-the-art technology infusion through pre-planned product improvements. The focus of the Advanced AYK-14 (AAYK-14) development is to provide the bridge necessary to evolve new and existing platforms to an Open Systems Architecture (OSA). The AAYK-14 program includes: (1) the development of commercially based Reduced Instruction Set Computer (RISC) Processor Module (RPM) that will permit communications between existing AYK-14 16 bit Compiler Monitor System (CMS-2) modules and AAYK-14 32-bit Ada modules, (2) development of a backplane based on the commercial Institute of Electrical and Electronic Engineers (IEEE)/Next Generation Computer Resources (NGCR) OSA standard Futurebus+ interface, (3) support of the additional design, test and qualification necessary to meet multi-user requirements and bring other program's non-development item/commercial off-the-shelf (NDI/COTS) Futurebus+ OSA modules into the AAYK-14 family.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$1,368) Implemented commonality design/test into the SH-60 Integrated Mission Processor (IMP) AAYK-14 and conducted Preliminary Design Review (PDR)/Critical Design Review (CDR).
- (U) (\$180) Coordinated integration of AAYK-14 technology into V-22's Advanced Mission Computer (AMC) and conducted PDR and CDR.
- (U) (\$301) Investigated/supported new implementation of the AAYK-14 architecture.

PROJECT TITLE: AN/AYK-14

### 2. (U) FY 1995 PLAN:

- (U) (\$1,466) Continue SH-60 IMP/AAVK-14 and V-22 AMC/AAVK-14. Conduct qualification test, begin Reliability Development Test (RDT) for SH-60B IMP/AAVK-14. Complete Engineering & Manufacturing Development (E&MD) for V-22 AMC/AAVK-14.

- (U) (\$326) Continue militarization of OSA commercial product to AAVK-14 family. Begin AAVK-14 technology transfer to EA-6B mission processing upgrade.

### 3. (U) FY 1996 PLAN:

- (U) (\$1,000) Complete E&MD and integration of SH-60 IMP/AAVK-14.
- (U) (\$205) Complete AAVK-14 technology transfer for EA-6B mission processing upgrade.
- (U) (\$205) Continue militarization of OSA commercial product (NDI/COTS) to the AAVK-14 family.

### 4. (U) FY 1997 PLAN:

- (U) (\$526) Begin technology shrink of existing AAVK-14 module set to the smaller 6" by 6" SEM-E form factor for tactical aircraft (F/A-18 E/F) applications.
- (U) (\$447) Begin upgrading AAVK-14's OSA interface to support both 32-bit and 64-bit inter-module processing.
- (U) (\$450) Begin updating AAVK-14 core modules with next generation commercial technology multi-chip module (MCM) micro-processors and memories (MIPS 5000/6000 micro-processors and 16/32MB memory chips).

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Next Generation Computer Resources. The Next Generation Computer Resources (NGCR) program operating in conjunction with industry is incorporating Navy weapons system requirements into a set of commercial computer hardware and software interface standards. This will enable the Navy to apply commercial standards to a wide range of weapons systems designs, thereby leveraging commercial open system architecture and standardization trends. The program encompasses all future tactical computer resources for the full range of Navy warfighting shipboard, airborne and shore-based systems. NGCR influenced commercial standards will enable Navy tactical systems to transition to open systems architectures for interoperability and commonality of multi-vendor products, competition for system upgrades, and application of state-of-the-practice technologies.

### (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:
  - (U) (\$508) Published first update to Local Area Network (LAN) standards.
  - (U) (\$4,260) Continued industry/Navy working groups for Backplane (BP), Operating Systems (OS), High Speed Data Transfer Network (HSDTN), Data Base Management Systems (DBMS), Graphics, and High Performance Network interface standards to incorporate tactical weapons systems needs into commercial standards.
  - (U) (\$287) Continued Fault Tolerance/Real-Time requirements/analysis and user support.
  - (U) (\$1,050) Continued conformance test certification for Backplane; and complete finalization of certification methodology and procedures.
  - (U) (\$930) Continued Backplane and LAN systems integration support for users programs.
  - (U) (\$1,803) Continued OS evaluation model contracts.

## 2. (U) FY 1995 PLAN:

- (U) (\$480) Publish OS standards.
- (U) (\$3,672) Continue industry/Navy working groups for OS, HSDTN, and HPN interface standards to incorporate tactical weapons systems needs into commercial standards.
- (U) (\$1,247) Continue Backplane, OS, HSDTN, HPN and LAN systems integration support for users programs.
- (U) (\$800) Terminate industry/Navy working group for DBMS interface standards.
- (U) (\$719) Terminate industry/Navy working group for Graphics interface standards.
- (U) (\$318) Terminate Fault Tolerance/Real-Time requirements/analysis and user support.
- (U) (\$900) End OS evaluation model contracts.

## 3. (U) FY 1996 PLAN:

- (U) (\$1,469) Continue participation in standards organizations for OS, HSDTN, and HPN interface standards to incorporate tactical weapons systems needs into commercial standards.
- (U) (\$1,100) Continue Backplane, OS, HSDTN, HPN and LAN systems integration support for users programs.
- (U) (\$1,460) Commence restructure of Naval C3I data base architecture under auspices of Naval Tactical Data Base (NWTDB).

## 4. (U) FY 1997 PLAN:

- (U) (\$1,380) Continue participation in standards organizations for OS, HSDTN, and HPN interface standards to incorporate tactical weapons systems needs into commercial standards.
- (U) (\$1,100) Continue Backplane, OS, HSDTN, HPN and LAN systems integration support for users programs.
- (U) (\$1,400) Complete restructure of Naval C3I data base architecture under auspices of Naval Tactical Data Base (NWTDB).

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program provides for engineering and manufacturing development of mines and their support systems to counter current and projected enemy submarines, surface ships, and mine warfare tactics.

(U) The Mine Improvements project (Q0267) modifies or improves existing mine systems to maintain their effectiveness, quality, reliability, and readiness against evolving threat targets and tactics in major regional conflict and littoral warfare scenarios.

(U) The QUICKSTRIKE project (Q0272) developed major subsystems for QUICKSTRIKE MK 62, MK 63, and MK 65 bottom mines. The last development effort was the QUICKSTRIKE Mod 3 system, which included the MK71 Target Detecting Device (TDD) and the MK 75 Safety and Arming (SEA) device. No further funding for this project is identified.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

PROJECT NUMBER: Q0267

PROJECT TITLE: Mine Improvements

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
Q0267 Mine Improvements	2,592	3,161	3,045	2,762	3,091	3,904	3,929	4,037	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This non-acquisition project is the only R&D program for mine systems, and is the sole support for the capability to maintain the effectiveness of mines facing new threat targets and increasing emphasis on major regional conflicts and littoral warfare in shallow water. Project tasks are grouped into several areas: 1a) Threat Modeling/Analysis, which collects, analyzes, and develops digital models of data on current priority threat target characteristics to support computer simulations of the "one-on-one" encounter between a mine and its target; 1b) Target Detection and Response, which uses target models to develop optimal mine designs, settings, and firing algorithms; 1c) Mine Warfare Modeling/Analysis, which uses models of the targets and the mines to support computer simulation of the "many-on-many" encounter between a minefield and all the targets and mine countermeasures; 2a) Components/Subsystems, which develops upgrades of mine components to maintain effectiveness against current threat targets using proven state-of-the-art technology; and 2b) Advanced Power Sources, which develops improved batteries without hazardous heavy metals. Typical Mine Improvements efforts include: obtaining, analyzing, and modeling threat target radiated noise signatures and damage susceptibility data; determining optimal mine settings/algorithms; updating minefield planning models and the databases supporting them; and improving the performance of mine subsystems such as sensors or batteries.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$1,700) Developed signature and damage models of fast patrol boat threat targets and updated the database at Commander Mine Warfare Command (COMINELWARCOM) at Corpus Christi, TX. Began development of an upgrade to the MK 57 Target-Detecting Device (TDD) to optimize its performance against fast patrol boats. Updated and improved the Uncountered Minefield Planned Model (UMPM) at COMINELWARCOM.

- (U) (\$992) Completed FOT&E and obtained approval for Fleet use and Full-Rate Production of the MK 164 Flight Gear Kit. Continued the development of standard lithium cells for use in mine warfare system power supplies. Monitored the Joint Direct Attack Munition (JDAM) program to maximize compatibility with QUICKSTRIKE mine TDDs.

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604601N

PROGRAM ELEMENT TITLE: Mine Development

PROJECT NUMBER: Q0267

PROJECT TITLE: Mine Improvements

## 2. (U) FY 1995 PLAN:

- (U) (\$1,850) Continue to develop signature and damage models of fast patrol boats; begin development of models of modern diesel-electric submarines. Continue development of the upgrade to the MK 57 TDD to accommodate fast patrol boats. Continue improvements to the Uncountered Minefield Planning Model and upgrades to its database at COMINELWARCOM.
- (U) (\$1,311) Complete the development of an AA-size standard non-magnetic lithium cell for use in mine warfare system power supplies. Begin development of improved pressure and magnetic sensors. Complete the technical data package for the new, programmable MK 71 TDD. Conduct system concept analyses to response of the Improved Submarine-Launched Mobile Mine (SLMM) and Littoral Sea Mine Mission Need Statements. Continue to monitor the JDAM program and other programs permitting launching of mines from stand-off distances. Analyze options for using QUICKSTRIKE mines as depth bombs.

## 3. (U) FY 1996 PLAN:

- (U) (\$2,200) Continue to develop signature and damage models of diesel-electric submarines; begin development of models of mini-submarines and surface-effect craft. Continue to determine optimal mine settings to accommodate priority threat targets. Begin development of minefield behavior evaluation model for COMINELWARCOM use in mine warfare planning.
- (U) (\$845) Begin the development of a larger lithium cell for use in standard mine warfare system power supplies. Complete development of improved magnetic sensor. Begin development of improved TDD test set. Continue development of improved pressure sensor. Continue to conduct system concept analyses in response of the Littoral Sea Mine Mission Need Statements. Continue to monitor standoff weapon programs for compatibility with mines.

## 4. (U) FY 1997 PLAN:

- (U) (\$1,950) Continue to develop signature and damage models of diesel-electric submarines, mini-submarines, surface-effect craft; begin development of models of additional priority targets identified by COMINELWARCOM. Continue to determine optimal mine settings to accommodate threat. Begin development of countered minefield models to be used to assist in planning mine countermeasures operations. Continue development of minefield behavior evaluation model.
- (U) (\$812) Continue development of larger lithium cell for use in standard mine warfare system power supplies; evaluate the improved safety and performance potential of new power supply technologies. Continue the development of improved pressure sensor and TDD test set. Continue to conduct system concept analyses in response of the Littoral Sea Mine Mission Need Statement. Continue to monitor standoff weapon programs for compatibility with mines.

## (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

(U) A2183/STANDOFF LAND ATTACK MISSILE - EXPANDED RESPONSE Description: This program funds the development of SLAM Expanded Response (ER) designed to maintain baseline SLAM capability while improving performance in the areas of launch and control aircraft survivability, immunity to countermeasures, probability of kill against hardened targets and improved user interfaces for both mission planning and launch aircraft integration. The SLAM ER consists of both hardware and software upgrades to the missile. SLAM ER incorporates many non-development items i.e., the Embedded Global Positioning System/Integrated Navigation System (GPS/INS) (EGI), modified Tomahawk wings and warhead, and the existing advanced mode of the AWW-13 data link pod.

(U) E1341/ADVANCED ROCKET SYSTEM (ARS) Description: The ARS is an ACAT III joint service program with the Navy, Army, and Air Force (Navy lead) that will "neck down" existing 2.75-inch and 5-inch Zuni rocket systems to one that can satisfy both helicopter and fixed wing requirements. It will provide enhance survivability through increased standoff delivery capability and improved lethality. It will also satisfy fleet safety requirements by integrating Insensitive Munitions (IM). This program terminates in FY 1995.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604603N

PROGRAM ELEMENT TITLE: Air-to-Surface Munitions

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
SLAM ER A2183	16,972	62,927	40,517	35,729	27,991	5,371	0	0	0	189,507

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Standoff Land Attack Missile (SLAM) is designed to provide an intermediate range day/night air-to-surface weapon for use against land and in-port surface targets. The SLAM ER program upgrades the hardware increasing hardened target penetration capability with a modified Tomahawk Block III warhead; adding a derivative of the Joint Service's Embedded GPS/INS (EGI) set which adds reprogrammable memory enabling missile software updates at O and I level maintenance sites curtailing future recurring retrofit costs; enhancing software to provide a retargeting capability before launch against pop up targets and upgrading terrain following capability; making man-in-the-loop improvements. Navy has integrated SLAM mission planning into the Tactical Aircraft Mission Planning System (TAMPS) to reduce mission planning time and eliminate SLAM unique mission planning hardware; increasing stability and seeker dome rain protection using the aero nose; and increased anti-jam performance with the EGI and advanced mode of AWW-13 pod. This improved weapon will ultimately be compatible with the F/A-18, with potential for application/integration with other aircraft.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604603N

PROJECT NUMBER: A2183

PROGRAM ELEMENT TITLE: Air-to-Surface Munitions

PROJECT TITLE: SLAM ER

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$ 1,500) Commenced F/A-18 aircraft integration.
- (U) (\$ 3,671) Supported preparation of Milestone (MS) IV/II Decision. Commenced Warhead, Government and Contractor support.
- (U) (\$ 5,500) Initiated Engineering and Manufacturing Design (E&MD) Risk Reduction efforts.
- (U) (\$ 801) Commenced Test and Evaluation planning.

### 2. (U) FY 1995 PLAN:

- (U) (\$ 5,500) (FY 94 funds) Continue E&MD Risk Reduction efforts.
- (U) (\$29,000) Continue E&MD efforts and commence support of Preliminary Design Review (PDR) and Critical Design Review (CDR).
- (U) (\$ 5,050) Continue F/A-18 aircraft integration efforts and commence flight clearance and software efforts.
- (U) (\$ 5,100) Commence Osprey Jaywalker efforts.
- (U) (\$ 7,777) Attain MS IV/II. Continue Warhead, Government and Contractor support.
- (U) (\$ 1,000) Continue Test and Evaluation.

### 3. (U) FY 1996 PLAN:

- (U) (\$15,000) (FY 95 funds) Continue support of E&MD, PDR, and CDR.
- (U) (\$21,017) Continue E&MD efforts and complete CDR.

### 3. (U) FY 1996 PLAN (Cont'd):

- (U) (\$ 6,500) Continue F/A-18 aircraft integration, flight clearance and software efforts.
- (U) (\$ 3,000) Continue Osprey Jaywalker efforts.
- (U) (\$ 2,000) Continue Test and Evaluation.
- (U) (\$ 8,000) Continue Warhead, Government and Contractor support.

### 4. (U) FY 1997 PLAN:

- (U) (\$16,729) Continue E&MD efforts.
- (U) (\$ 4,000) Complete F/A-18 aircraft integration, flight clearance and software efforts.
- (U) (\$ 3,500) Continue Osprey Jaywalker efforts.
- (U) (\$ 5,500) Continue Warhead, Government and Contractor support.
- (U) (\$ 6,000) Continue Test and Evaluation.

FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604610N  
PROGRAM ELEMENT TITLE: LIGHTWEIGHT HYBRID TORPEDO

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
------------------------------	-------------------	---------------------	---------------------	---------------------	---------------------	---------------------	---------------------	---------------------	----------------	------------------

V2234 LIGHTWEIGHT HYBRID TORPEDO	8,899	10,876	22,027	16,688	10,149	12,570	5,049	5,854	0	92,112
----------------------------------	-------	--------	--------	--------	--------	--------	-------	-------	---	--------

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The funding is to design, integrate and test a Lightweight Hybrid Torpedo by taking advantage of current USN investments in torpedo hardware and torpedo technology. The torpedo will be comprised of components from the MK46 Torpedo, MK50 Torpedo and MK48 ADCAP Torpedo. The Lightweight Hybrid Torpedo will incorporate improvements in the shallow water, littoral warfare counter-measure environment.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$4,000) Conducted risk reduction/preliminary studies and analysis on MK50, MK46 and MK48 components to be integrated into the Lightweight Hybrid Torpedo.

2. (U) FY 1995 PLAN:

- (U) (\$4,000) Initiate configuration definition and integration efforts which include refinement of usability and modification requirements of hybrid components. This effort is being funded with FY 1994 budget authority made possible by release of funds by Congress in December 1994.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604610N

PROGRAM ELEMENT TITLE: LIGHTWEIGHT HYBRID TORPEDO

PROJECT NUMBER: V2234

PROJECT TITLE: LIGHTWEIGHT HYBRID TORPEDO

- (U) (\$ 899) Conduct digital and hybrid simulations to develop and evaluate hardware integration, and develop predictions in conjunction with preparation of test & evaluation scenarios. This effort is being funded with FY 1994 budget authority made possible by release of funds by Congress in December 1994.
  - (U) (\$6,900) Develop and procure Engineering Development Models (EDMs) to demonstrate capability.
  - (U) (\$1,076) Develop processes and documentation to allow transition from R&D to production.
  - (U) (\$1,900) Improve tactical software for countermeasures and terminal homing improvements for short ranges.
  - (U) (\$1,000) Stored Chemical Energy Propulsion System boiler redesign effort and the completion of the JP-5/Compressed Oxygen alternate fuels demonstration (FY95 Congressional Add).
3. (U) FY 1996 PLAN:
- (U) (\$3,853) Continue system integration efforts.
  - (U) (\$5,455) Continue development of tactical software.
  - (U) (\$11,519) Procurement and test of Pre-Production Models.
  - (U) (\$1,200) Conduct initial in-water developmental testing.
4. (U) FY 1997 PLAN:
- (U) (\$6,640) Continue system integration efforts and tactical software development.
  - (U) (\$1,500) Continue in-water developmental testing.
  - (U) (\$8,548) Continue procurement and test of Pre-Production Models.

C2106 Advanced Countermeasures System (ACS) <sup>2</sup>	0	0	0	2,791	3,130	3,473	6,285	1,913	CONT.	CONT.
TOTAL	2,659	420	263	2,914	3,136	3,473	11,258	6,886	CONT.	CONT.

1. This program was formerly titled Wide Area Mine Clearing (WAMC) System. The current title is Off/Route Smart Mine Clearance (ORSMC). FY 1994 through FY 1996 funding is contained in Program Element (PE) 0603640M, Marine Corps Advanced Technology Demonstrations (ATD), Project C2223, the consolidated Marine Corps ATD project. FY 1997 through FY 1999 funding is contained in PE 0603612M, Marine Corps Mine Countermeasures, Project C2104. FY 2000 through FY 2001 funding is contained in this PE.

2. This program was formerly titled Distributed Explosive Mine Neutralization System (DEMNS). The current title is Advanced Countermeasures System (ACS). FY 1994 funding is split between two PEs: \$645 in PE 0603612M, Marine Corps Mine Countermeasures, Project C2106, ACS and \$1,413 in PE 0603640M, Project C2223. FY 1995 and FY 1996 funding is contained in PE 0603612M, Project C2106. FY 1997 through FY 2001 funding is contained in this PE.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This PE covers a wide variety of present and emerging technologies which are projected to contribute to the Marine Corps mine/countermine capability. Largely focused on countermine efforts, this PE will specifically develop systems which will neutralize mines. The dynamic nature and complexity of the countermine problem and its relative urgency necessitates the advanced development of a variety of systems which will each contribute to achieving overall countermine effectiveness.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604612M

PROGRAM ELEMENT TITLE: Marine Corps Mine/Countermeasures (Engineering and Manufacturing Development)

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
C1969 Mine Neutralization Equipment	2,659	420	263	123	6	0	0	0	0	24,991

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program contains the Marine Corps' mine neutralization equipment for countermine systems in the Engineering and Manufacturing Development (EMD) phase. This program will test and evaluate existing mine neutralization systems for both individuals and vehicles. The project includes the Anti-personnel Obstacle Breaching System (APOBS) which neutralizes both anti-personnel mines and light obstacles. In addition, the project includes the development of the Magnetic Countermine System (MACS) for neutralizing magnetically influenced anti-tank (AT) mines which are emerging as the mine of choice, particularly in the scatterable mine arena. Finally, the project includes the development of a Full Width Mine Rake (FWMR) for the Assault Amphibious Vehicle (AAV), to clear AT mines in the vehicle path.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$2,217) Completed the APOBS Reliability Enhancement Program. Prepared Milestone III documentation.
- (U) (\$251) Finalized the development of the AAV/FWMR system, to include final Level II drawing package and Developmental Testing (DT) II.
- (U) (\$131) Finalized the development of the armored coil for MACS.
- (U) (\$35) Completed Level III drawings for the armored coil and drafted purchase description for the main coil and armor of MACS.
- (U) (\$25) Conducted evaluation of the armored coil interface and survivability against live AT mines.

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604612M

PROGRAM ELEMENT TITLE: Marine Corps Mine Counter-measures (Engineering)

PROJECT NUMBER: C1969

PROJECT TITLE: Mine Neutralization Equipment

### 2. (U) FY 1995 PLAN:

- (U) (\$370) Conduct final system flight testing. Obtain final APOBS Weapons System Safety Explosive Review Board approval. Complete final APOBS Milestone III documentation. Achieve APOBS Milestone III decision.
- (U) (\$50) Finalize MACS Milestone III documentation. Conduct combined Operational and Developmental II Testing for the MACS system.

### 3. (U) FY 1996 PLAN:

- (U) (\$30) Provide program and logistic support for MACS.
- (U) (\$138) Complete Contract Specifications and Statement of Work for MACS.
- (U) (\$95) Complete documentation of APOBS to transition to Production.

### 4. (U) FY 1997 PLAN:

- (U) (\$53) Conduct configuration analysis for follow-on vehicle configurations for MACS.
- (U) (\$30) Prepare documentation and support of program.
- (U) (\$40) Perform modification to production specifications drawings and Statement of Work.

## FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604612M PROJECT NUMBER: C1969  
 PROGRAM ELEMENT TITLE: Marine Corps Mine Counter- measures (Engineering) PROJECT TITLE: Mine Neutralization Equipment

### B. (U) PROGRAM CHANGE SUMMARY:

	FY 1994	FY 1995	FY 1996	FY 1997
(U) FY 1995 President's Budget:	2,204	440	N/A	N/A
(U) FY 1995 Appropriated:	N/A	440	N/A	N/A
(U) Adjustments from Appropriated/ FY 1995 PRESBUD:	+455	-20	N/A	N/A
(U) FY 1996/97 PRESBUDG Submit:	2,659	420	263	123

### (U) CHANGE SUMMARY EXPLANATION:

- (U) Funding: FY 1994 funding was increased by \$455 to complete the APOBS reliability and enhancement program. FY 1995 funding was decreased by a total of \$20 for the following undistributed Congressional reductions: Consulting Services, Small Business Innovative Research, and University Research. MACS FY 1995 funding decreased due to an update in pricing; making funding available to conduct APOBS final system flight testing.
- (U) Schedule: The APOBS final system flight was delayed to FY 1995 due to a delay in contractor delivery of fuzes. This delay caused the final prototype to slip to FY 1995; Milestone III to move to the fourth quarter of FY 1995; and the production baseline to move to the fourth quarter of FY 1995 vice the second quarter of FY 1995.
- (U) Technical: Not applicable.
- C. (U) OTHER PROGRAM FUNDING SUMMARY: Not applicable.
- (U) RELATED RDT&E: Not applicable.

PROGRAM ELEMENT: 0604612M

PROGRAM ELEMENT TITLE: Marine Corps Mine/Countermeasures (Engineering and Manufacturing Development)

(U) COST: (Dollars in Thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
C2106 Advanced Countermeasures System (ACS)	0	0	0	2,791	3,130	3,473	6,285	1,913	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This project was formerly titled Distributed Explosive Mine Neutralization System (DEMNS). This program centers on neutralization of blast-hardened and complex-fuzed mines, and unexploded munitions (current and future threat) that defeat the effectiveness of current minefield breaching systems. Primary goals are: neutralization in-stride from a standoff position; very high neutralization percentages against all types of mines; and joint applicability for use with primary assault platforms to include land and amphibious assaults. This is a joint Army/Marine Corps program with the Army as the lead service satisfying their Standoff Minefield Breacher requirement.

(U) The ACS program researches and develops assault minefield breaching capabilities that will neutralize current and future blast-hardened and complex-fuzed mines from a standoff position. ACS will alleviate a critical deficiency in breaching minefields during amphibious operations. Current breaching assets are 1950s technology that do not meet breaching mission requirements.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS: FY 1994 funding is contained in two PES: \$1,413 is contained in PE 0603640M, Marine Corps Advanced Technology Demonstrations (ATD), Project C2223, the consolidated Marine Corps ATD project and \$645 in PE 0603612M, Marine Corps Mine Countermeasures, Project C2106.
2. (U) FY 1995 PLAN: FY 1995 funding (\$6,434) is contained in PE 0603612M, Project C2106.
3. (U) FY 1996 PLAN: FY 1996 funding (\$2,470) is contained in PE 0603612M, Project C2106.

## 4. (U) FY 1997 PLAN:

- (U) (\$1,985) Complete the Demonstration/Validation (DEM/VAL) contract to include contractor testing of prototype systems and ammunition. Support government developmental and operational tests and delivery of three systems and fifteen rounds of ammunition.
- (U) (\$230) Update all program documentation for the milestone decision and provide management support analysis of contractor results using a management support contract.
- (U) (\$576) Continue to provide Army, Navy, and government laboratory salaries. Continue to provide travel support in preparation of milestone documentation and contract deliverables. Execute government testing and final reports to support Milestone II.

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604618N

PROGRAM ELEMENT TITLE: Joint Direct Attack Munitions (JDAM)

(U) COST: (Dollars in Thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
E2137 JDAM	8,394	25,860	37,832	36,576	12,806	7,759	9,318	15,356	0	177,098

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: JDAM is a joint acquisition program combining Department of Navy and Air Force requirements for upgrading existing General Purpose Bomb capabilities in adverse weather and medium to high altitude releases. The Air Force is the executive service. The Navy's participation in JDAM involves joint development of JDAM components and support of Navy-Marine Corps unique requirements such as aircraft integration on the F/A-18. JDAM will provide an accurate (defined as not more than 13 meters) adverse weather capability. The program will incorporate commonality with the Joint Standoff Weapon where feasible. The JDAM Product Improvement Program (PIP) will field improvements to the JDAM system with initial emphasis on attaining precision (3 meters or less) accuracy through non-seeker and seeker initiatives.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENT:

- (U) (\$ 3,053) Supported two JDAM-1 Demonstration and Validation (DEMVAl) contracts.
- (U) (\$ 3,100) Performed systems engineering to develop JDAM F/A-18 Operational Flight Program (OFF) software.
- (U) (\$ 1,741) Conducted JDAM-1 F/A-18 wind tunnel tests, and airworthiness analysis.
- (U) (\$ 500) Supported USAF Engineering and Manufacturing Development (E&MD) contract for Joint Programmable Fuze (JPF).

## FY1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604618N

PROJECT NUMBER: E2137

PROGRAM ELEMENT TITLE: Joint Direct Attack Munitions (JDAM)

PROJECT TITLE: JDAM

### 2. (U) FY 1995 PLAN:

- (U) (\$10,811) Continue to support two JDAM-1 DEMVAL contracts and prepare for joint MS II decision.
- (U) (\$11,473) Continue systems engineering for F/A-18 integration, OFP software development, and airworthiness certification.
- (U) (\$ 1,480) Initiated Tactical Air Mission Planning System (TAMPS) software development.
- (U) (\$ 596) Continue to support USAF E&MD contract for JPF.
- (U) (\$ 1,500) FMU-143 Fuze Improvement.

### 3. (U) FY 1996 PLAN:

- (U) (\$10,490) Perform DT-IIA Testing and engineering support.
- (U) (\$ 3,000) Continue F/A-18 OFP software development for DT-IIB testing.
- (U) (\$12,845) Procure JDAM Test Assets and continue TAMPS software development.
- (U) (\$ 9,227) Perform systems engineering and support EMD Phase II contract.
- (U) (\$ 2,270) Support JPF Testing.

### 4. (U) FY 1997 PLAN:

- (U) (\$13,662) Perform system engineering for DT-IIA/B, OFP software development, and OT-IIA/B.
- (U) (\$10,083) Continue to procure JDAM Test Assets and TAMPS software development.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This is a Joint Service Program. DOD assigned development responsibility for Explosive Ordnance Disposal (EOD) procedures and equipment to the Navy in support of the Joint Services. This program provides for the technical development, validation, preparation, joint service verification and approval of EOD render-safe procedures for all known domestic and foreign conventional and nuclear ordnance. This program also provides for the implementation of the

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$4,746) Obtained foreign ordnance and developed EOD render-safe procedures for new sophisticated domestic and foreign ordnance.
- (U) (\$1,305) Continued development of specialized tools and equipment and countermeasures procedures to access and disable
- (U) (\$145) Coordinated and participated in exercises to prove concepts and procedures.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program applies advanced technologies to operational requirements in manpower, personnel, training, and human factors, and transitions into operation those projects demonstrated in advanced development. Enabling technologies include adaptive testing, math optimization, statistical and econometric forecasting, computer-based simulation, and decision support systems.

C. (U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under RDT&E OPERATIONAL SYSTEMS DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$150) Completed KORA prototype validation on USS Coronado.
- (U) (\$288) Completed transition of Officer Community Management System to LAN operation.
- (U) (\$300) Expanded the Navy "O" School Planning System to permit feasibility analyses based on school capacities and to estimate permanent change of station costs of training plans.
- (U) (\$150) Began development of the Enlisted Loss Incentive Planning System.

PROGRAM ELEMENT TITLE: Manpower, Personnel, and Training,  
Simulation and Human Factors

PROJECT NUMBER: L1822  
PROJECT TITLE: Manpower, Personnel, and Training,  
Simulation and Human Factors

- (U) (\$169) Refined the Job Performance Equations for the Personnel Quality Requirements System, to permit cost/performance tradeoff analyses.

## 2. (U) FY 1995 PLANS:

- (U) (\$300) Transition prototype version of unrestricted line officer career management model to other officer communities and integrate with officer strength planning and promotion planning systems.
- (U) (\$381) Extend "O" School Planning System to "A" Schools and expand both to estimate effects of training on fleet readiness.
- (U) (\$170) Begin evaluation and expansion of the Brig Retraining System.
- (U) (\$266) Transition to officer communities the Target System, for defining loss incentive populations.

## 3. (U) FY 1996 PLANS:

- (U) (\$350) Implement the O and A School Planning Systems to permit feasibility analyses based on school capacities and to estimate PCS moves costs of training plans.
- (U) (\$143) Test and refine the QOL socioeconomic model to predict increases/decreases in retention and readiness in response to varying levels of QOL support.
- (U) (\$250) Transition the Future Generation Decision Support System for detailers to operation by completing an intelligent interface for accessing multiple assignment information systems.
- (U) (\$100) Begin conversion of demonstration manpower allocation model to an all-Navy model.
- (U) (\$100) Complete implementation of the Enlisted Community Managers' Integrated modeling system, developed in advanced technology demonstration.

## FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1996

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604703N

PROGRAM ELEMENT TITLE: Manpower, Personnel, and Training, Simulation and Human Factors

PROJECT NUMBER: L1822

PROJECT TITLE: Manpower, Personnel, and Training, Simulation and Human Factors

- (U) (\$100) Develop common strength plan costing system for Pers-2 and Pers-7 to ensure personnel policies implemented are consistent with dollars available.
- 4. (U) FY 1997 PLANS:
  - (U) (\$320) Enhance Future Generation Decision Support System for Detailers with integrated information display in Windows-like environment, to improve detailer response to constituents.
  - (U) (\$300) Expand the Assignment Policy Management System to allow the advertisement of job vacancies to the fleet. Transition the Assignment Policy Execution System into operational status--measures policy compliance and suggests corrective actions.
  - (U) (\$220) Complete conversion of demonstration manpower allocation model to an all-Navy model and transition to implementation at NAVHAG, N932 and BUMED.
  - (U) (\$200) Implement the Accession Management Decision Support System that integrates the management of recruiting, delayed entry program, enlistment incentives, initial skill training and enlisted strength planning.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Develop energy-efficient systems and practices for ships, facilities, and aircraft. Resulting energy efficiency gains contribute to fleet sustainability, combat capability (e.g., greater range, time on station), and reduced operating costs. Efforts include fuel use optimization aids for aircraft; anti-fouling paints, air conditioning and lighting for ships; adaption of commercially available energy conservation and renewable energy technologies to Navy facility needs. Provide test and evaluation support to the companion PE 0603724N Project R0829. As currently funded, annual savings for the combined 6.3/6.4 program are projected to be \$130M by FY 1995 and \$155M by FY 2000 compared to FY 1985 cost.

This program, and the companion PE 0603724N Navy Energy Program (ADV), support the achievement of Executive Department, DoD, and Navy Energy Management Goals enunciated in the Defense Energy Policy Memorandum 91-2 of May 91, OPNAV Instruction 4100.5D of Apr 94, the 1992 Energy Policy Act, Executive Order 12902 of March 94. Navy is TRISERVICE lead for the implementation of renewable/alternative energy systems across DoD.

Joint Mission Areas/Support Areas (JMA/SA): This program directly supports the Readiness, Support, and Infrastructure SA. It also supports the following JMA's: Forward Presence, Joint Surveillance, Strategic Sealift, and Joint Strike.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:
  - (U) (\$748) Aircraft: Tested and evaluated (T&E) enhanced Flight Optimization Routines for Energy Management (FOREM) for F/A-18 (-400 engine), F-14A, A-6E, EA-6B and distributed to fleet. Developed FOREM for F/A-18 (-402 engine), F-14B/D, and TA-4J. T&E Pocket-Sized Aircraft Performance Advisory Computer (P-S APAC) for C-9B and

PROJECT TITLE: Energy Conservation (ENG)

- distributed to fleet. Enhanced P-S APAC for C-2A and KC-130 as requested by fleet. T&E Flight Performance Advisory System (FPAS) for F/A-18C/D (-402 engine).
- (U) (\$1,317) Ships: Completed SHIPEVAL of alternating current lighting system with integral emergency ballasts. Optimized design of centrifugal compressor for HFC-134a refrigerant; completed evaluation of HCFC-124 and initiated equipment modifications to allow retrofit. Expanded anti-fouling (AF) coating ship trials to include silicone "easy release" products.
  - (U) (\$1,035) Facilities: T&E photovoltaic (PV)/hybrid power systems at four large sites. Provided technical support to 10 MILCON PV power system projects. Field tested pierside power metering/power demand control techniques applications.

## 2. FY 1995 PLAN:

- (U) (\$750) Aircraft: T&E FOREM for F/A-18 (-402 engine), F-14B/D, and T-45; distribute to fleet. Develop FOREM for P-3C and T-45, T&E P-S APAC for C-2A and KC-130 and distribute.
- (U) (\$1,277) Ships: Assess relative merits of ozone safe refrigerants and select candidates for forward fit airconditioning. Prepare detailed design packages for back-fit of ozone-safe refrigerant. Complete MILSPEC for high efficiency lighting with integral emergency ballast. Continue full-scale ship trials of promising non-toxic AF coatings.
- (U) (\$1,129) Facilities: T&E PV systems for peak shedding and distributed load center applications. Continue technical support to 10 Renewable Energy MILCON installations as lead service. Field test geothermal heat pumps and electrical conservation technologies identified in category 6.4 project. Issue design guidance and guide specifications for large PV hybrid and PV grid support/island grid systems.

## 3. FY 1996 PLAN:

- (U) (\$700) Aircraft: Develop FOREM for KC-130; transition to fleet for P-3C and AVT-8B; incorporate fleet requested enhancements for other aircraft. Extend FPAS to F/A-18E/F. Upgrade P-S APAC with new DOS compatible palm-top computer capable of using FOREM flight optimization coding.
- (U) (\$1,284) Ships: T&E energy efficient air conditioning (with ozone-safe refrigerants) for new construction. Continue ship trials of "easy release" and biodegradable AF coatings.
- (U) (\$644) Facilities: Complete clean steam operational testing. Complete geothermal resource assessments at China Lake and Fallon. T&E integrated wind/PV hybrid power system.

## 4. (U) FY 1997 PLAN:

- (U) (\$700) Aircraft: Deliver FOREM for KC-130 to fleet, complete extension to additional aircraft. Complete upgrade of P-S APAC system via computer replacement and use of FOREM software. Retain P-S APAC unique capabilities: weight/balance calculations, real-time update for fuel quantity, dropped stores, engine out, and wind changes.
- (U) (\$1,277) Ships: T&E stern wedge/flap for DDG-993/CG-47. SHIPEVAL direct current fluorescent lighting. Continue air conditioning T&E and advanced AF coating ship trials. T&E efficiency improvement for LM 2500 engine and power train.
- (U) (\$580) Facilities: T&E advanced PV systems incorporating thin film receptors and ganged, parallel, processors/controllers. Demonstrate centralized ground source heat pumps for heating/cooling base housing. T&E solar thermal electric system.

## B. (U) PROGRAM CHANGE SUMMARY

1. FY 1994 through FY 1995 funding is contained in Program Element (PE) 0603640M, Marine Corps Advanced Technology Demonstrations (ATD), Project C2223, the consolidated Marine Corps ATD project. FY 1996 funding is split between two PEs: \$1,935 is contained in Project C2223 under PE 0603640M and \$3,819 is contained in PE 0603635M, Marine Corps Ground Combat/Support System, Project C2247, COBRA. FY 1997 through FY 1998 funding is contained in PE 0603635M, Project C2247. FY 1999 through FY 2001 funding is contained in this PE, Project C2254.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This PE provides funds for the engineering development of Marine Corps Command, Control, and Communications Systems which include Marine Tactical Command and Control Systems development and improvements. The projects are aimed toward more effective command and control of tactical forces during both amphibious and expeditionary land operations. This concept envisions an integrated air/ground tactical command and control system oriented towards amphibious expeditionary environments to meet unique command, control and interoperability requirements of the Landing Force Commanders.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: JTIDS integrates the high capacity, jam resistant, secure, digital communications capability provided by the JTIDS Class 2/2H terminal into the Radio Terminal Set AN/TSC-131 (JTIDS Module). The JTIDS Module (JM) will in turn be used as part of the AN/TYQ-23 Tactical Air Operations Module (TAOM) Joint Tactical Information Distribution System/Tactical Air Data Information Link-Joint (JTIDS/TADIL-J) integration program. JTIDS also provides engineering and technical assistance to the JTIDS/TADIL-J integration programs for the AN/TYQ-51 Advanced Tactical Air Command Central (ATACC) and Air Defense Communications Platform.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$3,959) Continued development of the JM.
- (U) (\$1,698) Began integration of JTIDS/TADIL-J into the TAOM.
- (U) (\$120) Provided interim JTIDS capability to the fleet.
- (U) (\$50) Provided support for Class 2H Full Scale Development Terminals which will be used in JM and JTIDS interface box (JIB) integration into TAOM.

Communications Systems

## 2. (U) FY 1995 PLAN:

- (U) (\$100) Provide pre-operations support of Class 2H Full Scale Development Terminals which will be used in JM/JIB integration into TAOM.
- (U) (\$300) Provide pre-operations support for the Class 2 Terminals used in the development of the Shelterized JTIDS System (SJS).
- (U) (\$2,193) Continue testing of JM Engineering and Manufacturing Development (EMD) Models #1-4. Perform Test Readiness Review (TRR) in anticipation of Formal Qualifications Testing (FQT). Perform JM Maintainability Demonstration.
- (U) (\$838) Continue integration of JTIDS/TADIL-J into TAOM.

## 3. (U) FY 1996 PLAN:

- (U) (\$2,021) Complete first article testing of JM EMD Models and commence delivery of product improvements to the JM EMD Models #1-4. Anticipate MS III approval.
- (U) (\$200) Continue EMD shelter, software testing and integration of the SJS.
- (U) (\$100) Provide pre-operations support for the Class 2H Full Scale Development Terminals which will be used in JM/JIB integration into TAOM.
- (U) (\$100) Provide pre-operations support for the Class 2 Terminals used in the development of the SJS.
- (U) (\$1,191) Continue integration of JTIDS/TADIL-J into TAOM and the ATACC.

PROGRAM ELEMENT TITLE: Marine Corps Command/Control/Communications Systems

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
C1929 Advanced Tactical Air Command Central (ATACC)	6,486	2,081	8,088	5,378	9,615	4,843	2,510	3,759	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The ATACC will integrate hardware and software into a replacement system, capable of overcoming the current operational deficiencies of the AN/TYQ-1 Tactical Air Command Central (TACC), and the AN/TYQ-3A Tactical Data Communications Central. The system will automate and enhance the now manual decision support/mission planning functions of the TACC. Additionally, the ATACC will provide increased interoperability through the integration of Joint Tactical Information Distribution System/Tactical Air Data Link-Joint (JTIDS/TADIL-J), and automate Joint Interoperability of Tactical Communications Systems (JINTACCS) message receipt and origination.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$720) Commenced development of shelter reconfiguration necessary due to the results of Operational Test and Evaluation (OT&E) (Phase I).
- (U) (\$2,663) Commenced development of Performance Enhancements due to new (March 94) Operational Requirements Document (ORD).
- (U) (\$1,489) Commenced extensive evaluation of Air Force Contingency Theater Automated Planning System (CTAPS) for use in ATACC (Phase I).
- (U) (\$904) Provided updates and enhancements to ATACC software to address OT&E Results and enhanced functionality required by the new (March 94) ATACC ORD (Phase I).
- (U) (\$710) Management and contract support services (Phase I and II).

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604719M

PROGRAM ELEMENT TITLE: Marine Corps Command/Control/  
Communications Systems

PROJECT NUMBER: C1929

PROJECT TITLE: Advanced Tactical Air  
Command Central (ATACC)

### 2. (U) FY 1995 PLAN:

- (U) (\$441) Continue development of Performance enhancements defined in March 94 ORD (Phase II).
- (U) (\$250) Provide updates and enhancements to Software to address OT&E results and enhanced functionality required by new ORD (Phase I).
- (U) (\$729) Complete extensive evaluation of Air Force Contingency Theater Automated Planning System (Phase I).
- (U) (\$661) Management and contract support services (Phase I and II).

### 3. (U) FY 1996 PLAN:

- (U) (\$1,288) Migration of TADIL A, B, and NATO Link-1 to Global Command and Control System (GCCS) direction for open systems conversion (Phase II).
- (U) (\$2,000) Award contract for voice communications distribution system development.
- (U) (\$4,000) Initiate efforts for development of JTIDS software integration required to maintain joint interoperability for Marine aviation command and control (Phase II).
- (U) (\$800) Management and contract support services required to reduce risk of managing diverse efforts (Phase I and II).

### 4. (U) FY 1997 PLAN:

- (U) (\$578) Complete TADIL A, B, and NATO Link-1 conversion to GCCS midterm by joint direction for open systems conversion (Phase II).
- (U) (\$2,000) Continue efforts for development of receive-only TADIL-J software integration required to maintain joint interoperability for Marine aviation command and control (Phase II).
- (U) (\$2,000) Complete development of voice communication upgrade, including construction and test.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604719M  
PROGRAM ELEMENT TITLE: Marine Corps Command/Control/  
Communications Systems

PROJECT NUMBER: C1929  
PROJECT TITLE: Advanced Tactical Air  
Command Central (ATACC)

- (U) (\$800) Management and contract support services required to reduce risk of managing diverse efforts (Phase II).

### B. (U) PROGRAM CHANGE SUMMARY:

	FY 1994	FY 1995	FY 1996	FY 1997
(U) FY 1995 President's Budget:	8,349	2,314	N/A	N/A
(U) FY 1995 Appropriated	N/A	2,341	N/A	N/A
(U) Adjustments from Appropriated/ FY 1995 PRESBUDG:	-1,863	-233	N/A	N/A
(U) FY 1996/97 PRESBUDG Submit:	6,486	2,081	8,088	5,378

### (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: FY 1994 funding was decreased for end-of-year execution adjustments. FY 1995 funding was decreased by a total of \$233 for the following undistributed Congressional reductions: Consulting Services, Small Business Innovative Research, University Research, and Travel.

(U) Schedule: As a result of the restructuring noted above, the ATACC program is now following an evolutionary acquisition approach which will progressively field the required capabilities in three phases. Significant revisions in the Phase II ATACC schedule profile reflect the decision of the Command and Control Program Manager to exploit opportunities to use the ATACC program as a vehicle for development of a common voice communications system and a joint-compliant, open systems software implementation which can be re-used in the planned common air command and control system. Additionally, changes in the ATACC Phase I FOT&E schedule have been driven by the Air Force delay in releasing CTAPS software version 5.1.

(U) Technical: The restructured program resolves former deficiencies in performance (identified during IOT&E), and incorporates new joint-directed standards, i.e. CTAPS, open architecture software systems, and TADIL-J/JTIDS.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: AFATDS will consist of digital fire support Command and Control automated software, fielded on Marine Corps common hardware. AFATDS will automate for the Marine commander the integration and coordination of supporting arms. AFATDS development is in three versions, each adding new capabilities and refining existing capabilities. The Marine Corps plans to field version 2 software baselined on the Lightweight Computer Unit. The Marine Corps is also working with the Army on the Initial Fire Support Automation System (IFSAS) as a limited initial software capability to be fielded on the same Marine Corps common hardware.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$1,157) Began alternate communication architecture research and integration of IFSAS with the Marine Air-Ground Task Force (MAGTF) Tactical Net Server (TNS).
- (U) (\$3,469) Completed Version 1 software code and conducted Developmental Test and Evaluation (DT&E)/Experimentation of Version 1 software.
- (U) (\$4,217) Started Preliminary Design Review of Version 2 software.

2. (U) FY 1995 PLAN:

- (U) (\$1,985) Prepare for and conduct AFATDS Version 1 Initial Operational Test and Evaluation (IOT&E) and Version 2 software design review.
- (U) (\$1,950) Conduct alternate hardware (platform) exploration, especially for the Assault Amphibious Vehicle/Light Armored Vehicle (AAV/LAV).
- (U) (\$803) Continue alternate communication architecture research and integration of IFSAS with MAGTF Tactical Net Server.

3. (U) FY 1996 PLAN:

- (U) (\$1,100) Complete AFATDS Version 2 software code.
- (U) (\$1,500) Participate in IFSAS Version II operational testing.
- (U) (\$1,080) Complete IFSAS integration with MAGTF TNS and migration to new hardware.

4. (U) FY 1997 PLAN:

- (U) (\$1,666) Prepare for and conduct AFATDS Version 2 operational testing.
- (U) (\$600) Transition software development to Fire Support Software Engineering (FSSE).
- (U) (\$1,075) Start Preliminary Design Review of Version 3 software.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Battle Group Passive Horizon Extension System Surface Terminal (BGPHEs-ST) extends the Battle Group's line-of-sight radio horizon by using remote receivers in the ES-3A's sensor payload, via the Common High Bandwidth Data Link Shipboard Terminal (CHBDL-ST). BGPHEs-ST will be located in LHD, LHA and CV/CVN Ships Signal Exploitation Space (SSES). The BGPHEs-ST 5-position, 5-rack cryptologic control, analysis and reporting center uses Navy-standard DTC/TAC-N series workstations and integral local intercept receivers. The design downsizes and corrects deficiencies from the 14-rack AN/SLQ-50 (XN-1) model tested on USS EISENHOWER (CVN-69) during FY87 (factory verification completion in fall 1989). Development will proceed in two stages, first reducing risk by demonstrating operation with the ship's local receivers (the Ship's Signals Exploitation Equipment (SSEE) Upgrade)), then (timed to meet CHBDL-ST development) adding control and use of the remote airborne payload (the AN/SLQ-50 (XN-3)).

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

## 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$5,973) Developed, fabricated, and integrated the hardware and software to control BGPHEs' airborne payload segment via the BGPHEs data link. Started formal factory test program.
- (U) (\$729) Developed and tested software to be uploaded to the Navy airborne receiver segment.
- (U) (\$250) Defined software interfaces to host ships' Command, Control, Communication, Computers, and Intelligence (C<sup>4</sup>I) systems.
- (U) (\$750) Initiated rehost of software to TAC-N computer.
- (U) (\$250) Initiated software interfaces for Pre-planned Product Improvement (P<sup>3</sup>I) and USAF interoperability.
- (U) (\$450) Completed planning for integration and test of the (XN-3) with the BGPHEs data link and aircraft sensors.

PROJECT TITLE: BGPHEs-ST

HORIZON EXTENSION SYSTEM

2. (U) FY 1995 PLAN:

- (U) (\$2,392) Complete factory integration and qualification testing with remoted receiver payload. Demonstrate access to ES-3A prime mission equipment (PME) direction-finding system. Conduct FCA/PCA.
- (U) (\$1,068) Conduct integration and test of the BGPHEs-ST with the BGPHEs data link (CHBDL) and ES-3A remoted sensor payload at the Land Based Test Site (LBTS).
- (U) (\$900) Perform DT and IOT&E on overall BGPHEs at the LBTS (i.e., BGPHEs-ST with CHBDL and Navy airborne segments), followed by completion of at-sea TECHEVAL on CVN; initiation of OPEVAL.
- (U) (\$300) Complete definition of software interfaces for P'I and USAF interoperability; conduct U-2 interoperability demonstration of RS-6B, RAS-1/COMINT.
- (U) (\$681) Continue rehost of software to TAC-N computer and definition of software interfaces to host ship's C'I system.
- (U) (\$250) Initiate P'I access to other ES-3A PME, including special signals.
- (U) (\$250) Initiate hardware design for LHD and LHA ship configurations.

3. (U) FY 1996 PLAN:

- (U) (\$450) Perform at-sea OPEVAL on overall BGPHEs; obtain MS-III decision.
- (U) (\$3,094) Continue rehost of software to TAC-N computer and definition of software interfaces to host ship's C'I system.
- (U) (\$600) Continue P'I access to other ES-3A Prime Mission Equipment (PME), including special signals.
- (U) (\$600) Complete hardware design for LHD and LHA ship configurations.
- (U) (\$500) Initiate P'I access to other USAF U-2R PME, including special signals.

4. (U) FY 1997 PLAN:

- (U) (\$1,107) Complete rehost of software to TAC-N computer and definition of software interfaces to host ship's C'I system.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Common High Bandwidth Data Link-Ship Terminal (CHBDL-ST) equipment will provide a common high bandwidth data link shipboard terminal for the receipt of signal and imagery intelligence data from remote airborne sensors and the transmission of link and sensor control data to airborne platforms. Signal intelligence data is received from the Battle Group Passive Horizon Extension System (BGPHERS) Airborne Component (AC) and delivered to the BGPHERS Shipboard Terminal. Imagery intelligence data is received from various tactical airborne reconnaissance system and delivered to the Joint Service Imagery Processing System - Navy (JSIPS-N).

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

## 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$11,783) Completed prime equipment fabrication, integration and acceptance tests for Developmental Test/Operational Test (DT/OT)-II. Initiating prime equipment fabrication for factory environmental and qualification testing.
- (U) (\$3,500) Completed preparation of the Land Based Test Site (LBTS) at Patuxent River, MD.
- (U) (\$150) Completed DT/OT-II CV/CVN installation design, obtain design approval and initiate work planning.
- (U) (\$200) Initiated LHD installation design planning.

## 2. (U) FY 1995 PLAN:

- (U) (\$5,021) Complete prime equipment fabrication for factory qualification testing.
- (U) (\$3,066) Deliver DT/OT-II equipment to LBTS for Navy acceptance testing; integrate and begin DT/OT-II.
- (U) (\$500) Complete CVN installation work plans for DT/OT-II equipment and initiate DT/OT-II.
- (U) (\$250) Initiate LHA installation design planning.
- (U) (\$2,000) Rehost of TAC-N computer, initiate design for Solid State Power Amplifier, initiate design capability to handle two data links simultaneously.
- (U) (\$1,400) Start Factory Environmental and Qualification testing.

## 3. (U) FY 1996 PLAN:

- (U) (\$200) Complete rehost to TAC-N computer, complete design for solid rate power amplifier, complete design for two data links simultaneously.
- (U) (\$256) Complete factory environmental and qualification testing.
- (U) (\$800) Install equipment aboard candidate DT/OT platform.
- (U) (\$250) Complete Technical Evaluation (TECHEVAL) and Operational Evaluation (OPEVAL) of the CHBDL-ST system.
- (U) (\$250) Complete LHA installation design planning.
- (U) (\$600) Develop Technical Data Package for Production Contract.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Joint Standoff Weapon (JSOW) is an air-to-ground weapon designed to attack a variety of targets during day, night and adverse weather conditions. JSOW will enhance aircraft survivability as compared to current interdiction weapon systems by providing the capability for launch aircraft to standoff outside the range of most target area surface-to-air threat systems. The JSOW launch-and-leave capability will allow several target kills per aircraft sortie.

(U) The JSOW program will first develop a baseline weapon for use against fixed area targets. The baseline JSOW variant will include a kinematically efficient airframe, and integrated Inertial/Global Positioning System (INS/GPS) navigation capability, and a BLU-97/B submunition payload. This weapon will be designed upfront for pre-planned product improvements. The Unitary Warhead variant will add a terminal seeker, a man-in-the-loop data link, and a unitary warhead to enable the attack of blast/frag sensitive or moving point targets. The JSOW Unitary will provide increased accuracy and lethality, and the capability for aimpoint selection, target discrimination, and bomb impact assessment. The JSOW/BLU-108 variant incorporates the Sensor Fuze Weapon submunition (BLU-108) into the baseline vehicle. The JSOW/BLU-108 variant will provide a standoff delivery capability against massed armor and land combat vehicles.

(U) Through adherence to international standards for weapons interfaces and minimized weight and dimension considerations, JSOW will be compatible with Air Force and NATO aircraft. JSOW BLU-108 is a joint Navy/Air Force program.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING AND MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

- (U) (\$60,698) Continued Engineering & Manufacturing Development (E&MD) efforts
- (U) (\$ 8,378) Systems Engineering Technical efforts
- (U) (\$ 3,900) Began Developmental Test and Evaluation (DT-IIA) and completed airworthiness testing.
- (U) (\$ 6,700) Conducted F/A-18 Integration efforts

#### (U) UNITARY:

- (U) (\$ 1,318) Prepared for P3I Milestone (MS-I), continued Cost Operational Effectiveness Analysis (COEA), and Defense Acquisition Board (DAB) documentation effort in support of MS-I decision.

- (U) (\$ 1,100) Continued Pre-Demonstration Validation (DEM/VAL) efforts

#### (U) Navy BLU-108:

- (U) (\$474) Continued Pre-Engineering & Manufacturing Development (E&MD) DAB documentation efforts
- (U) (\$786) Conducted Systems Design Review

### 2. (U) FY 1995 PLAN:

#### (U) BASELINE:

- (U) (\$74,302) Continue Engineering & Manufacturing Development (E&MD) efforts
- (U) (\$13,091) Systems Engineering and conduct Critical Design Review (CDR)
- (U) (\$ 4,873) Complete DT-IIA testing, conduct DT-IIB testing and commence qualification testing.
- (U) (\$ 2,185) F/A-18 Integration

FY 1996 RDT&E,N Budget Item Justification Sheet

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604727N

PROJECT NUMBER: E2068

PROGRAM ELEMENT TITLE: Joint Standoff Weapon System

PROJECT TITLE: JSOW

(U) CHANGE SUMMARY EXPLANATION:

(U) Funding: FY 1994 was increased by \$1,499K reprogramming from JDAM-to-JSOW. FY 1995 decrease of \$2,759K reflects the allocation of undistributed adjustments.

(U) Schedule: Baseline DT-IIB changed from 4Q/94 to 2Q/95 to accommodate extension of additional DT-IIA testing. DT-IIA testing restructured due to uncertainty of JSOW BLU-108 program during POM-96. Unitary (MSI) and BLU-108 (MS-JI) schedule changed from 4Q/94 to 2Q/95 to accommodate OSD direction for POM-96. Unitary (D/V option) contract award dates changed from 1Q/95 to 3Q/95 and BLU-108 (EMD) contract award date from 1Q/95 to 2Q/95. As a result of Secretary of Defense streamlining initiatives and OSD initiated program issues, Unitary and BLU-108 program milestones were reworked. The additional requirements imposed above resulted in extension of the program.

(U) Technical: Not Applicable

# UNCLASSIFIED

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604755N

PROGRAM ELEMENT TITLE: Ship Self Defense

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program element, effective for FY 1994, consolidates currently ongoing and planned programmatic efforts related to Ship Self Defense (SSD). The consolidation facilitates effective planning and management of these efforts, exploiting the synergistic relationship inherent in each. These projects are directed by a single program manager in Program Executive Office for Theater Air Defense. Analysis and demonstration have established that surface SSD based on single-sensor detection, point-to-point control architecture performs marginally against current and projected Anti-Ship Cruise Missile (ASCM) threats. The supersonic seaskimming ASCM reduces the effective battle space to the horizon and the available reaction time-line to less than 30 seconds, from first opportunity to detect until the ASCM impacts its target ship. Against such a threat: multi-sensor integration is required for effective detection; parallel processing is essential to reduce reaction time to acceptable levels and to provide vital coordination/integration of hardkill and softkill assets; and improvements in terminal gun system effectiveness and in missile kinematics, control and homing accuracy are required for successful hardkill engagement. These SSD projects address and coordinate the detect, control, and engage functions necessary to meet the rigorous SSD requirements within a development structure dedicated to systems engineering.

(U) DETECTION: Improved coordinated sensor performance to increase the probability of detecting low altitude, low observable targets is to be achieved through the synergism gained from the integration of dissimilar sensor sources. Multi-sensor integration is being addressed through the efforts of Quick Reaction Combat Capability (QRCC) (U2178), while sensor improvements are addressed through the SPS Improvements (U0166), Infrared Search and Track (U0665), and Shipboard Electronic Warfare Improvements (U0954) projects. These improvements to both active and passive detection capabilities are complementary to the ship signature reduction technology also being pursued through project U0954.

(U) CONTROL: Multi-sensor integration, parallel processing and the coordination of hardkill/softkill capabilities in an automated response to the ASCM threat are the cornerstones of Ship Self Defense System (SSDS) being developed through QRCC (U2178) efforts. In addition, that project provides for the central system engineering management of SSD developments, including efforts required to integrate SSDs with the Advanced Combat Direction System (CDS) for those ships having a CDS.

(U) ENGAGEMENT: Both missile and terminal gun system improvements necessary to meet their requirements are being addressed via NATO Seasparrow Missile System (NSSMS) (U0173), 5" Rolling Airframe Missile (RAM) (U0167), and CIWS PHALANX (U0172). Missile improvements are to include improved kinematic performance plus advanced seeker and low elevation fuzing/warhead capabilities.

Page 119-2 of 119-68 Pages

616

# UNCLASSIFIED

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604755N

PROGRAM ELEMENT TITLE: Ship Self Defense

Gun system improvements address system detection, rate-of-fire, number of rounds on target, first round accuracy, and reliability and maintenance. The Fuze improvement will provide Evolved SeaSparrow Missile (ESSM) and possibly other missiles with improvements to accurately discriminate targets in high clutter/chaff environments and will provide increased capability in high closing rate engagements.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program develops and tests performance and reliability upgrades for search radar equipment to meet the evolving threat.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$200) Supported continuing analysis/trade-off studies and implementation of functional and performance allocations among elements comprising integrated Ship Self Defense System (SSDS), including system interface adaptations and preparation/conduct of associated tests and demonstrations.
- (U) (\$1,989) Evaluated proposals for the AN/SPQ-9B Radar. Continued development of acquisition documentation (Cost & Operational Effectiveness Analysis (COEA), Operational Requirement Document (ORD), Test & Evaluation Master Plan (TEMP), etc.) for the AN/SPQ-9B Radar. Continued radar integration task to MK 86 Gun Fire Control System.
- (U) (\$5,450) Awarded the development contract for two AN/SPQ-9B Radars in the first quarter of FY 1995. Contract execution will be accomplished from FY 95 and through FY 97 due to FY 96 mark up of \$5,238.
- (U) (\$2,045) Continued AN/SPQ-9(I) Advanced Development Model (ADM) Radar testing at Naval Research Laboratory's Land Based Test Site (LBTS) and at-sea test/operational assessment with the ADM Radar.
- (U) (\$100) Continued SSDS integration studies.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604755N  
PROGRAM ELEMENT TITLE: Ship Self Defense

PROJECT NUMBER: U0166  
PROJECT TITLE: SPS Improvement Program

### 2. (U) FY 1995 PLAN:

- (U) (\$100) Continue SSDS integration engineering.
- (U) (\$4,348) Fund ongoing AN/SPQ-9B Radar development contract.
- (U) (\$1,132) Manage the AN/SPQ-9B Radar development contract including conduct of Preliminary Design Review (PDR). Continue radar integration task to MK 86 Gun Fire Control System.
- (U) (\$800) Continue at-sea-test of the AN/SPQ-9(I) ADM Radar. Analyze and demonstrate the addition of Digital Sidelobe Cancellation to the AN/SPQ-9B Radar as a Product Improvement.

### 3. (U) FY 1996 PLAN:

- (U) (\$150) Continue SSDS integration engineering.
- (U) (\$5,367) Continue to fund ongoing AN/SPQ-9B Radar development contract.
- (U) (\$3,111) Continue managing the AN/SPQ-9B Radar development contract including conduct of a Critical Design Review (CDR) and a Production Readiness Review (PRR). Continue radar integration task to MK 86 Gun Fire Control System.

- (U) (\$183) Continue Digital Sidelobe Cancellation development as a product improvement to the AN/SPQ-9B Radar.

### 4. (U) FY 1997 PLAN:

- (U) (\$150) Continue SSDS integration engineering.
- (U) (\$5,894) Continue to fund ongoing AN/SPQ-9B Radar development contract. Conduct First Article Testing (FAT) on two production proof kits. Support integration into MK 86 system.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604755N

PROGRAM ELEMENT TITLE: Ship Self Defense

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE PROGRAM	TOTAL
U0167 5" ROLLING AIRFRAME MISSILE	8,960	18,148	26,098	24,533	18,868	9,172	8,997	9,278	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The purpose of this program is to develop a surface-to-air self-defense system utilizing a dual mode, passive Radio Frequency/Infrared 5" Rolling Airframe Missile. The baseline system provided a self-defense capability against active radar-guided anti-ship missiles and was developed on an equal cost share basis with the Government of the Federal Republic of Germany. This effort will provide a capability against passive anti-ship missiles, very low altitude missiles, and maneuvering missiles through the incorporation of an infrared all-the-way mode seeker and improved fuze. This system is designed to counter anti-ship cruise missile raids and provide for ship survivability with accurate terminal guidance, proven lethality, and no shipboard fire control dependence.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$6,364) Initiated engineering and manufacturing development on Block I Upgrade, including Infrared (IR) electronics and software, simulation/Engineering Module (EM) testing, critical experiments, and fabrication of test rounds.
- (U) (\$2,500) Initiated engineering and manufacturing development effort for improved fuze design.
- (U) (\$96) Continued to support analysis/trade-off studies to coordinate and refine element roles within ship self-defense (SSD) strategy. Supported development of system interface adaptations as necessary to provide effective SSD integration.

DATE: February 1995

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604755N

PROJECT NUMBER: U0167

PROGRAM ELEMENT TITLE: Ship Self Defense

PROJECT TITLE: 5" Rolling Airframe Missile

## 2. (U) FY 1995 PLAN:

- (U) (\$15,000) Complete Preliminary Design Review (PDR) of INFRARED (IR) seeker design and integration into the current missile. Complete design models. Conduct Integrated Seeker/IR Processor Experiment. Continue development of Algorithms for IR Processor.
- (U) (\$3,148) Continue to support analysis/trade-off studies to coordinate and refine element roles with SSD strategy. Support development of system interface adaptations as necessary to provide effective SSD integration.

## 3. (U) FY 1996 PLAN:

- (U) (\$3,000) Continue Algorithm and Electronics Development.
- (U) (\$2,000) Prepare technical data and conduct Critical Design Review (CDR).
- (U) (\$2,000) Prepare for at-sea testing phase.
- (U) (\$6,000) Continue Seeker Hardware Development.
- (U) (\$7,000) Assemble Engineering Development Models (EDM) and conduct flight testing.
- (U) (\$2,000) Conduct Aircraft Captive Carry Seeker Testing.
- (U) (\$2,500) Conduct Government Simulation Testing.
- (U) (\$1,598) Continue to support development of system interface adaptations as necessary to provide effective SSD integration.

## 4. (U) FY 1997 PLAN:

- (U) (\$2,000) Conduct Government Electromagnetic Compatibility (EMC) testing.

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
U0172 Close-In Weapons System (Phalanx)	32,431	25,756	5,703	14,916	15,306	15,442	15,518	15,984	CONT.	CONT.

## A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

The Phalanx mission is to be a fast reaction terminal defense against low and high-flying, high speed maneuvering anti-ship missiles penetrating outer fleet defenses and to counter small surface threats and low, slow-flying air threats. The Phalanx Improvement Program is designed to upgrade Phalanx Block 0 systems to a Block I system configuration and to provide improvements to Block I systems for performance, reliability and maintainability enhancements. The Block I improvements solve safety, reliability and maintainability problems. Performance improvements in development include: (1) Phalanx Surface Mode (PSUM) which will satisfy the operational requirement to counter small surface threats and low, slow-flying air threats; (2) AAW improvements directed towards improving systems susceptibility to EMI and jamming; and (3) integration within SSDS.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$18,855) Continued development of Phalanx Surface Mode (PSUM) to include: (1) Selection of Non-Developmental Item (NDI) automatic acquisition video tracker and advanced electro-optic equipments; and (2) Integration of these equipment capabilities to improve overall system operation in AAW.
- (U) (\$7,075) Continued development of Baseline 3 to include design and development of a Low Noise Signal Generator and Digital Signal Processor.
- (U) (\$3,758) Started development of AAW improvements and SSDS integration to include: (1) Development of receiver modification to reduce electro-magnetic interference; (2) Integration of the electro-optic system into the AAW fire control algorithms; and (3) Developed the hardware/software interfaces to allow integration into the SSDS.

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604755N

PROGRAM ELEMENT TITLE: Ship Self Defense

PROJECT NUMBER: U0172

PROJECT TITLE: Close-In Weapon System

- (U) (\$2,743) Continued Phalanx EMI mitigation testing to define the interference mechanism and determine software and hardware fixes.
- 2. (U) FY 1995 PLAN:
  - (U) (\$15,280) Continue development and begin testing of PSUM to include: development of software, integration of NDI electro-optic hardware, and preliminary contractor testing.
  - (U) (\$3,775) Continue development of AAW improvements to include: Design engineering and documentation of AAW subsystems, component qualification, integration of hardware modifications and EO/RF Fire Control Integration.
  - (U) (\$3,375) Complete development of initial SSDS integration with Baseline 2 to include: development of initial DT/OT software delivery and support of preliminary testing.
  - (U) (\$3,326) Complete DT/OT on the High Order Language Computer and operational program.
- 3. (U) FY 1996 PLAN:
  - (U) (\$5,703) Complete development and contractor evaluation testing of PSUM and the AAW improvements to include: finalize hardware and software development and prepare for Navy testing.
- 4. (U) FY 1997 PLAN:
  - (U) (\$6,116) Complete Navy test and evaluation and DT/OT testing on the Phalanx Improvement Program (PSUM and AAW).
  - (U) (\$8,800) Start design and development of the next upgrade to Phalanx to satisfy SSDS flowdown requirements which include: (1) Search through Track; (2) Full SSDS functional interface; (3) Mount alignment; and (4) Multi-Sensor Enhancements. Continue system engineering and integration efforts for baseline 3 and future SSDS configurations.

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604755N

PROGRAM ELEMENT TITLE: Ship Self Defense

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
U0173 NATO Seasparrow	18,029	48,865	65,390	59,978	46,228	15,106	6,383	4,508	CONT	CONT

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This program encompasses two (2) primary efforts to enhance ship self defense:

- (U) Improving the capability of the SEASPARROW Missile to counter the low altitude, maneuvering Anti-Ship Cruise Missile (ASCM) threat. This program will be a cooperative effort by 10 NATO Seasparrow Nations, including the U.S., and will consist of evolving the Seasparrow missile through development of a new rocket motor (10" diameter) with tail control and ordnance (warhead) upgrade. The program also includes associated modification to the MK-41 Vertical Launch System (VLS) to provide the capability to store four (4) modified missiles in a single VLS cell ("quad-pack") and test and evaluation.
- (U) Improvements to the Self Defense Surface Missile System (SDSMS), SWY-1 (NATO Seasparrow/Target Acquisition System (TAS)), and SWY-2 (TAS and Rolling Airframe Missile (RAM)) weapon systems to sustain effective capability. This program focuses primarily on modifications to the TAS Operational Computer Program (OCP) to support SWY-1/2 integration on multiple ship classes and design/develop hardware and software modifications to integrate NATO Seasparrow into the Ship Self Defense System and to provide for remote operation of the NATO Seasparrow system in the Self Defense Test Ship (SDTS).

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS AND PLANS:

- (U) KINEMATIC MISSILE (ESSM) PROGRAM [\$11,130]
  - (U) (\$5,800) Completed Evolved Seasparrow Missile (ESSM) Cost and Operational Effectiveness Analysis (COEA) and Milestone IV documentation, which was initiated in FY 1993 under PE 0603755N Project U2192. (\$1,000 for transition to Engineering and Manufacturing Development (EMD)).

FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 604755N

PROJECT NUMBER: U0173

PROGRAM ELEMENT TITLE: Ship Self Defense

PROJECT TITLE: NATO SeaSparrow

- (U) (Not Separately Price (NSP)) Achieve ESSM Milestone IV decision and release ESSM Request for Proposal. Congressional direction restricted obligation of FY94 ESSM funds in excess of \$5.8M, until the Assistant Secretary of the Navy for RD&A reports back to Congress on various program matters (conclusions of the COEA; results of the Independent Cost Estimates (ICE) and technical risk assessment; and report on Milestone decision).
- (U) (\$5,330) Funding for the ESSM Engineering & Manufacturing Development (EMD) Contract. Combined FYs 1994/1995 funding required for EMD contract to allow prime contractor award of subcontracts to foreign vendors as part of cooperative development of ESSM. This amount is part of the International Cooperative Agreement for development.
- (b) (U) OTHER SDSMS (SWY-1/2)
  - (U) (\$3,677) Continued integration of TAS common Computer Program for SWY-1 for CV/CVN, LHD-1, DD, AOR and AOE classes; SWY-2 (LHA-1) ships and the SDTS coincident with RIM-7P Follow-on Test and Evaluation (FOT&E). Supported Combat System Integration Testing (CSIT) on CV/CVN, LHD and DD SWY-1 type ships for TAS common Computer Programs & NSSMS computer programs with Combat Direction System (CDS) and Advanced CDS (ACDS).
  - (c) (U) MK 91 REARCHITECTURE
    - (U) (\$3,222) Commenced integration of MK 91 NSSMS into the SSDS. Conducted critical studies and developed top-level requirements for the use of Advanced Display System (AN/UYQ-70) common display work stations and distributed computer processing. Commenced developing a system remote operating capability for the NATO SEASPARROW Missile System (NSSMS) installed in the Self Defense Test Ship (SDTS).
- 2. (U) FY 1995 PLAN:
  - (a) (U) KINEMATIC MISSILE (ESSM) PROGRAM (40,270)
    - (U) (\$32,470) FY 95 Funding Required for ESSM EMD contract award.
    - (U) (\$1,500) Initiate effort associated with ESSM and AEGIS System integration.
    - (U) (\$6,300) Continue efforts associated with MK 41 Quad Pack.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604755N

PROJECT NUMBER: U0173

PROGRAM ELEMENT TITLE: Ship Self Defense

PROJECT TITLE: NATO Seasparrow

- (b) (U) OTHER SDSMS (SWY-1/2)
- (U) (\$2,545) Complete SDSMS Computer Program integration program with at-sea testing on LHD-5.

- (c) (U) MK 91 Rearchitecture
- (U) (\$6,050) Continue implementation of a remote operating capability for the NATO Seasparrow system installation in the SDTS consistent with Ship Self Defense System integration requirements.

### 3. (U) FY 1996 PLAN:

- (a) (U) KINEMATIC MISSILE (ESSM) PROGRAM [50,875]
- (U) (\$33,875) Continue efforts associated with ESSM EMD.

- (U) (\$14,000) Continue efforts associated with MK 41 Quad Pack and system integration mods.

- (U) (\$3,000) Commence AEGIS "S" Band Uplink Development.

- (U) (NSP) Conduct Preliminary Design Review (PDR) and Critical Design Review (CDR) on ESSM/system modifications.

### (b) (U) OTHER SDSMS (SWY-1/2)

- (U) (\$3,767) Continue Support for Combat System Integration Testing (CSIT) on CV/CVN, LHD and DD SWY-1 type ships for TAS common Computer Program & NSSMS computer programs with Combat Direction System (CDS) and Advanced CDS (ACDS).

### (c) (U) MK 91 Rearchitecture

- (U) (\$10,748) Continue implementation of a remote operating capability for the NATO Seasparrow system installation in the SDTS consistent with Ship Self Defense System (SSDS) integration requirements; and, in parallel, transition engineering into definition of NATO Seasparrow system modification to integrate NATO Seasparrow into SSDS.

### 4. (U) FY 1997 PLAN:

- (a) (U) KINEMATIC MISSILE (ESSM) PROGRAM [48,318]
- (U) (\$29,318) Continue efforts associated with ESSM EMD.
- (U) (\$14,000) Continue efforts associated with MK 41 Quad Pack and system integration mods.

PROGRAM ELEMENT TITLE: Ship Self Defense

PROJECT TITLE: NATO SeaSparrow

- (U) (NSP) Commence DT IIB and OT IIA Test and Evaluation in support of LRIP CA milestone.

- (U) (5,000) Continue AEGIS "S" Band Uplink Development.

- (b) (U) OTHER SDSMS (SWY-1/2)

- (U) (\$2,238) Continue support for Combat System Integration Testing (CSIT) on CV/CVN, LHD and DD SWY-1 type ships for TAS common Computer Program and NSSMS computer programs with CDS and ACDS.

- (c) (U) MK 91 Reachitecture

- (U) (\$9,422) Continue implementation of a remote operating capability for the NATO SeaSparrow system installation in the SDTs and parallel modification of NATO SeaSparrow for integration into Ship Self-Defense System.

B. (U) PROGRAM CHANGE SUMMARY: Adjustments for undistributed reductions.

(U) FY 1995 President's Budget:	<u>FY 1994</u> 27,729	<u>FY 1995</u> 50,354	<u>FY 1996</u> XXX	<u>FY 1997</u> XXX
---------------------------------	--------------------------	--------------------------	-----------------------	-----------------------

(U) FY 1995 APPROPRIATED:	XXX	50,354	XXX	XXX
---------------------------	-----	--------	-----	-----

(U) Adjustments from APPROPRIATED/ FY 1995 PRESBUDG:	-9,700	-1,489	XXX	XXX
---	--------	--------	-----	-----

(U) FY 1996/97 PRESBUDG Submit:	18,029	48,865	65,390	59,978
---------------------------------	--------	--------	--------	--------

(U) CHANGE SUMMARY EXPLANATION:

- (U) Funding: FY 1994 Navy identified \$9.7M to Congress for SCN SCA adjustment. FY 95 funding changes due to undistributed Congressional reductions for University Research (-218), Consulting Services (-360), Travel (-71), and Small Business Innovative Research reduction (-840).

- (U) Schedule: Milestone IV/II decision was received 22 November 1994, with the Acquisition Program Baseline Agreement for ESSM approved by ASN(RD&A) on 19 December 1994, contract award is scheduled for 4/95 to accommodate the report to Congress on the Milestone IV decision; and the 4/95 scheduled conclusion of the international governing agreement negotiations for the ESSM Cooperative Development effort.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The sophistication and diversity of threats facing naval surface combatants is increasing with respect to lower radar cross-section, use of passive anti-radiation missile (ARM), increased speed, and lower altitudes. This program element provides funding for acquisition of two infrared sensors-the Infrared Search & Track (IRST) and Thermal Imaging Sensor System (TISS). The IRST provides passive augmentation to complement radar, electronic support measures (ESM) and visual surveillance systems for air targets. It will declare those air targets to the ships' combat system. The TISS provides surface ships with a day/night high resolution surveillance capability for small cross-section targets. It supports anti-surface warfare (ASUW), mine warfare (MIW) and anti-submarine warfare (ASW) missions. The system will be a non-development item (NDI) procurement.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS: Cost and Operational Effectiveness Analysis (COEA) completed.

- (U) (\$2,765) Developed system specifications for TISS and IRST system.
- (U) (\$1,333) Prepared request for proposal (RFP).
- (U) (\$2,834) Prepared acquisition plans and progressed towards obtaining Milestone (MS) II decision to enter Engineering and Manufacturing Development (E&MD) phase.

PROJECT TITLE: I/R Search & Track

## (U) CHANGE SUMMARY EXPLANATION:

(U) Funding: Changes in FY 94 funding due to End-Of-Year execution update reduction (-4,002). Changes in FY 95 funding due to undistributed Congressional reductions for University Research (-111), Consulting Services (-87), Federally Funded Research Development Centers (-58), Travel (-31), and Small Business Innovative Research reduction (-392).

(U) Schedule: IRST development delayed one year due to FY 94 reprogramming and delay in requirements formulation. Follow-on Engineering Development slipped two years to accommodate a 2-phase development approach.

(U) Technical: Not applicable.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Shipboard Electronic Warfare (EW) Improvements Program major efforts are: Advanced Capability (ADCAP) Improves Active Countermeasure capability; AN/SLQ-32(V) Phase E - Improves threat detection capability; DECM/Decoy Integration (DDI) - Integration of MK36 Decoy Launching System with AN/SLQ-32(V) Shipboard Electronic Countermeasures System (ECM). The Advanced Torch Decoys program develops Ship Launched Decoys capable of seduction and distraction of Infrared (IR) homing Anti-Ship Missiles. The MK 186 MOD 2 Torch provides improved flame characteristics. OUTLAW BANDIT Ship Signature management includes development of Radar Cross Section (RCS) reduction treatments for FFG 7, DD 963, DDG 993, CG 47 class ships and also covers RCS and IR measurement and control techniques. Advanced Integrated Electronic Warfare Systems (AIWS) will provide the EW capability to support ship defense and introduces the next generation of EW technology, MMI, SSDS Integration, Improved Electronic Support, Improved Electronic Attack.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$8,474) Performed Phase E Critical Design Review (CDR) and Factory tests.
- (U) (\$3,181) Conducted ADCAP/DDI testing. Final Developmental Testing/Operational Testing (DT/OT).
- (U) (\$5,378) Continued Signature Management Program. Completed radar cross section control (RCSC) design package for CG 47 and DD 963. Completed SPG antenna reflectivity improvements. Conducted COMOPTEVFOR V&V efforts on EW effectiveness modeling and simulation as part of Follow-on Test and Evaluation (FOT&E) preparations.

## FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604755N

PROJECT NUMBER: U0954

PROGRAM ELEMENT TITLE: Ship Self Defense

PROJECT TITLE: Shipboard EW Improvements

- (U) (\$2,500) AIEWS restructured Phase I of AIEWS - includes SLQ-32 Phase E.
- (U) (\$1,800) Conducted AIEWS multiple concept Exploration and Definition Studies.
- (U) (\$4,705) NULKA.
- (U) (1,900) AIEWS - Prepared restructured program logistics, and AIEWS technical and program documentation.
- (U) (\$450) Completion of TORCH developmental/operational testing.
- (U) (\$500) Special project systems test.

### 2. (U) FY 1995 PLANS:

- (U) (\$1,779) Complete ADCAP. Conduct ADCAP MS III 2Q/95.
- (U) (\$16,513) Initiate AIEWS Phase I Development. (Includes Phase E)
- (U) (\$5,800) Signature Measurement - Conduct DT-III on CG 47 and DD963 classes. OT-III element of DT/OT cancelled. DT-III expanded to include Multi-Ship. Fleet applications and additional threat representative systems. Conduct DT-III on USS WADSWORTH (FFG9) (R&D installation). Conduct hardkill/softkill integration effectiveness modeling and simulation.

### 3. (U) FY 1996 PLANS:

- (U) (\$6,613) Continue AIEWS Phase I Development and initiate AIEWS Phase II.
- (U) (\$3,972) Complete RCSR design package for DD993 class. RAM Improvement program, including maintenance and reduced installation costs initiatives. Continue measurement testing. Continue Hardkill/Softkill integration effectiveness modeling and simulation.

FY 1996 RDT&E,N BUDGET ITEM JUSTIFICATION SHEET

PROGRAM ELEMENT: 0604755N  
PROGRAM ELEMENT TITLE: Ship Self Defense

BUDGET ACTIVITY: 5

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
U2178 Quick Reaction Combat Capability (QRCC)	4,291	39,245	40,362	30,505	31,436	30,012	14,566	14,751	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The QRCC program provides ships with an integrated self defense capability to defend themselves from aircraft and missile attack. The capability will shorten reaction time, increase ship's fire power and automate previously manpower intensive functions. In the present and projected littoral warfare environment, non-AEGIS ships which have manual or unintegrated ship defense systems are unable to protect themselves sufficiently to perform their intended missions. The QRCC concept converts manual control of several different ship self defense systems into a single integrated capability under the computer aided control of ship operators. It does this through the implementation of the Ship Self Defense System (SSDS) and improvements to other self defense system elements to integrate multiple sensors, coordinate and integrate weapon systems, provide hardkill and softkill integration, and automate the detection through engagement sequence under the control of flexible embedded doctrine. The current focus of this project is the development of the SSDS which leverages recent critical experiments, the Rapid Anti-Ship Missile Integrated Defense System (RAIDS) program efforts, and the SSDS demonstration on USS WHIDBEY ISLAND (LSD 41) in June 1993. Improvements to current system performance with respect to short range anti-air ship self defense will apply multi-sensor integration to existing sensors, improve ship defense local command and control functions, integrate and coordinate weapon systems, and provide hardkill/softkill integration. System architecture centers on a distributed processing concept which uses a fiber optic local area network (LAN), LAN access units, Advanced Display System workstation, and software to integrate existing sensors and weapons. The initial effort will focus on the LSD 41 class of ships to integrate existing LSD 41 class sensors, the Rolling Airframe Missile (RAM), Phalanx Close-in Weapon System (CIWS), and Electronic Countermeasures System (SLQ-32). Other ship systems such as ship support, navigation, and interrogation Friend or Foe will also be integrated into the system via the LAN. The distributed architecture allows the incremental evolution and implementation of follow-on modification to the SSDS which will integrate other ship self defense elements, such as the NATO Seasparrow missile system, Target Acquisition System (TAS), and other sensors, as well as the RAM, CIWS, and SLQ-32 installations on other ship classes. Ships with a Combat Direction System (CDS) or the Advanced CDS will also have those systems integrated with SSDS to optimize the use of offboard track data in ship self defense and transmit SSDS track data to other ships.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$3,091) Continued risk reduction engineering efforts of SSDS MK 1 for the LSD 41 (Dock Landing Ship) class.
- (U) (\$1,000) Conducted system requirements review and system design review. Completed system specification.
- (U) (\$100) Initiated design and engineering of modifications to the MK 1 system for installation aboard LHD, LHA (Amphibious Assault Ship), and Aircraft Carriers.
- (U) (\$100) Initiated Integrated Logistic Support and other programmatic efforts to prepare for fleet support requirements.

### 2. (U) FY 1995 PLAN:

- (U) (\$9,100) Continue risk reduction efforts for SSDS MK 1 system for LSD 41 class ship.
- (U) (\$10,500) Conduct MS II review and begin Engineering and Manufacturing Development (E&MD) for SSDS MK 1 system for LSD 41 class ship.
- (U) (\$10,000) Initiate Land Based Test Site (LBTS) development for SSDS MK 1.
- (U) (\$5,645) Continue design and engineering efforts for SSDS MK 1 system onboard follow-on class ships.
- (U) (\$4,000) NATO Sea Sparrow Missile System rearchitecture for follow-on class ships.

3. (U) FY 1996 PLAN:
  - (U) (\$17,000) Continue E&MD development of SSDS MK 1 for LSD 41 class.
  - (U) (\$10,550) Commence DT on LSD 41 class ship.
  - (U) (\$1,000) Complete programmatic documentation to support Milestone III deployment decision.
  - (U) (\$4,362) Complete logistics requirements to support DT/OT and MS III.
  - (U) (\$4,450) Complete milestone III and transition to production of SSDS MK 1 LSD 41 class ships.
  - (U) (\$3,000) Continue engineering development of SSDS MK 1 for follow-on class ships.
4. (U) FY 1997 PLAN:
  - (U) (\$14,500) Continue E&MD development and commence DT of SSDS MK 1 for LHD class ship.
  - (U) (\$3,900) Continue E&MD of SSDS MK 1 for follow-on class ships.
  - (U) (\$750) Support programmatic documentation changes.
  - (U) (\$3,855) Support logistics requirements due to ship class adaptations.
  - (U) (7,500) Complete DT and conduct OT on LSD 41 class ship.

FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604755N

PROGRAM ELEMENT TITLE: Ship Self Defense

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE	TOTAL PROGRAM
U2190 NULKA Decoy	8,100	12,873	0	995	973	1,018	995	995	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Offboard Active Decoy (NULKA) is a joint cooperative program between the United States and Australia to develop an active offboard decoy which utilizes a broadband radio frequency repeater mounted atop a hovering rocket. The Decoy is designed to counter a wide variety of present and future radar guided Anti-Ship Missile (ASM) threats by radiating a large radar cross section signal while flying a shiplike trajectory. The United States developed the Electronic Payload and Fire Control System. Currently the United States is modifying the payload to incorporate cost savings improvements and improve reliability. The Fire Control System components are being consolidated and modified. The MK 36 Decoy Launching System (DLS) is being modified to support NULKA Launches. Australia developed the hovering rocket, launcher, and launcher interface unit.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:
  - (U) (\$8,100) Continued NULKA development, Payload Improvement Program (PIP)/cost reductions leading to limited production.
2. (U) FY 1995 PLAN:
  - (U) (\$12,873) RDT&E funds to continue NULKA development. Commence launch system integration testing, continue rocket motor qualification program, and commence fabrication and delivery of test rounds.
3. (U) FY 1996 PLAN: Not Applicable

U2256 SEMI-ACTIVE FUZE IMPROVEMENT	0	0	4,576	7,618	4,751	1,093	0	0	0	18,038

## A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

(U) Selected Semi-Active Fuze technology development efforts have become available for transition into an engineering and manufacturing development program; this emergent technologies can provide improved capabilities for one or more Ship Self Defense programs.

(U) While development of the Evolved SeaSparrow Missile (ESSM) under project U0173 will provide enhanced ship survivability against current and emerging threat, additional capability is required to pace the evolving threat. Maneuverable, low radar cross section anti-ship missiles can be countered by near term fuzing system improvements and mid-term improvements including dual mode seekers and even greater kinematic performance. This is a "NEW START PROGRAM".

(U) This near term fuze improvement will provide improved data processing to accurately discriminate targets in high clutter/ECM environments and provide increased capability in high angle of attack/high closing rate engagements. The fuze design is based on an upgrade of existing AIM/RIM-7 DSU-34B Fuze; accordingly, the improved fuze will be form and function compatible with ESSM and existing AIM/RIM-7P missiles.

M0933 Medical/Dental Equipment Development	3731	1681	3402	3236	3626	4429	4461	4590	CONT.	CONT.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The purpose is to develop biomedical equipment to reduce morbidity, to enhance the logistic feasibility of modern medical care for combat casualties, to speed return to duty, and to ensure that personnel are medically qualified for military duty. Each work unit undertaken in this project has a documented, authenticated military requirement. Efforts are justified based upon military payoff and cost benefit. There is a strong potential for dual use, technology transfer and industrial participation in the project.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

### 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$821) Developed prototype clinical tests for aviator spatial disorientation (SD) susceptibility. Potential benefit is avoidance of \$300 million DOD aircraft losses yearly attributed to SD, and mission failures such as the Iran hostage rescue. Seven of 14 Navy aircraft lost in Gulf War due to SD.
- (U) (\$1057) Developed "Good Manufacturing Practices" for Liposome Encapsulated Hemoglobin, an artificial red blood cell. Potential benefit is sterile blood substitute with long shelf life and no immune reaction.
- (U) (\$545) Developed sound attenuating material for passive hearing protection. This material will increase effectiveness of hearing protector "ear muffs" without increased cost. Potential benefit is tens of millions of dollars in hearing loss claims annually.
- (U) (\$120) Test and verification that industrial production of Farnsworth Lantern color vision test is within specifications, and that the new lantern is a valid test of military color vision.

PROGRAM ELEMENT: 0604771N

PROGRAM ELEMENT TITLE: Medical Engineering Development

- (U) (\$283) Close out costs of contract for development of Resuscitation Fluids Production System. Joint Army-Navy Milestone III decision to terminate because FDA approval could not be obtained without inordinate costs for more data on sterility.
- (U) (\$340) Two small business contracts to explore technologies for washing cryoprotectant from thawed frozen banked blood. Gulf War lesson learned: we need 4X the throughput available from existing technologies.
- 2. (U) FY 1995 PLAN:
  - (U) (\$400) Field test of new sound attenuating material in standard "ear muffs" and new design including vacuum barrier to sound.
  - (U) (\$577) Large animal test of Liposome Encapsulated Hemoglobin (LEH) to obtain data for FDA approval
  - (U) (\$110) Completion of manufacturing standards for Farnsworth Lantern color vision test, and validation of the test as a predictor of operational color vision performance.
  - (U) (\$594) Contract for development of device to wash cryoprotectant from frozen banked blood. An additional \$565 deferred to FY 1995 will be applied to this task.
- 3. (U) FY 1996 PLAN:
  - (U) (\$266) Continue development of low-cost, high efficiency hearing protection. Potential benefit is \$48M/yr Navy Dept VA claims, \$8M/yr Navy civilian claims.
  - (U) (\$824) Continue development of Good Manufacturing Practices for Liposome Encapsulated Hemoglobin blood substitute, including safety and efficacy tests.
  - (U) (\$430) Development of clinical tests to screen aviators most susceptible to spatial disorientation. Potential benefit is 30 aircraft and 40 lives per year in Navy, \$300M per year in DOD aircraft costs.
  - (U) (\$1882) Continue development of washer to clear cryoprotectant from thawed frozen banked blood. Gulf War lesson learned: need for greater throughput. Joint Army/Navy.

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Reliable and secure Navigation and positive identification (ID) systems are essential elements of battle management in the naval environment. NAVSTAR Global Positioning System (GPS) is a space-based radio positioning and navigation system that provides users with worldwide, all weather, three dimensional position, velocity and precise time data based on a constellation of 21 or more satellites. In addition to distinguishing friend from foe for weapons employment, the Navy requires secure, jam resistant Identification Friend or Foe (IFF) systems for battle group air defense management and air traffic control. Identification is multifaceted and includes information received from several sensors (both cooperative and non-cooperative systems). The Combat Identification System (CIS) project (W1253) covers the Navy development aspects of a Cooperative Aircraft Identification (CAI) system which is the next generation replacement for the aging MK XII IFF and canceled Air Force MK XV IFF. CAI was directed to perform additional Cost and Operational Effectiveness Analysis (COEA) studies before a Milestone I Defense Acquisition Board (DAB). The All Service Combat Identification (ASCID) project (W2212) covers the Navy portion of a new joint service sponsored test and evaluation program, formerly the OSD sponsored Joint Air Defense Organization-Joint Engagement Zone (JADO-JEZ) program. The program is designed to test cooperative and non-cooperative combat identification systems and tactics, as well as serve as a conduit for evaluating research and development in promising combat identification technologies. The Improved Identification Developments project (W0676) develops Non-Cooperative Target Recognition (NCTR) and integration techniques.

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604777N

PROGRAM ELEMENT TITLE: Navigation/ID System

The Photonics Mast is a non-hull penetrating replacement for existing optical periscopes. The Photonics Mast exploits a wide portion of the electro-magnetic spectrum utilizing advanced Electro-Optic/thermal imaging and communications reception/Electronic Warfare Support Measures.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING AND MANUFACTURING DEVELOPMENT because it encompasses engineering and manufacturing development of new end-items prior to production approval decision.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Photonics Mast will replace existing penetrating periscopes and exploit a wide portion of the electro-magnetic spectrum through advanced E-O/thermal imaging and ESM/Communications reception. It will provide major improvements in submarine stealth and infrared imaging capabilities and make extensive use of image enhancement techniques for target identification and classification. The non-hull penetrating design provides freedom in ship construction as well as space savings for future design submarines. The system will be designed to satisfy Operational Requirement #168-02-88. The Photonics Mast, mounted on the Modular Mast, is planned for installation on the New Attack Submarine, SSN-688 and SEAWOLF class submarines.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

## 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$1,074) Issued Photonics Mast Program (PMP) Engineering and Manufacturing Development (EMD) Request for Proposal.
- (U) (\$850) Obtained PMP Milestone II approval.
- (U) (\$200) Conducted explosive shock, radar cross section and Infra-Red tests.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This provides for the development and integration of NCTR techniques and multi-sensor information integration systems for improved identification (ID). The current major effort is rapid prototype deployment of the Shipboard Advanced Radar Target Identification System (SARTIS), an NCTR device. A secondary effort involves deployed AUTO-ID prototypes which take IFF track, link data, and kinematics/doctrine information to better ID/display targets; these features/displays are being integrated into a restructured Centralized Identification Friend or Foe (CIFF) development. Project is also developing an upgraded AN/SLQ-20.

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$2,600)
- (U) (\$14,524) Realigned CIFF to rearrange ship class priorities via contract mod; completed Preliminary Design Review (PDR) and prepared for Critical Design Review (CDR) of the AN/SLQ-20 Upgrade processor.

## FY 1996 RDT&amp;E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604777N

PROGRAM ELEMENT TITLE: Navigation/ID Systems

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMPLETE PROGRAM	TOTAL
W1253 Combat ID System	7,180	7,453	5,368	5,689	67,720	120,248	105,481	73,842	Cont.	Cont.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: USN has the requirement for a Cooperative Aircraft Identification (CAI) system that would replace aging Identification, Friend or Foe equipments. The Joint Chiefs of Staff/Joint Requirements Oversight Council Mission Needs Statement (JCS/JROC MNS) for Combat Identification was validated 4/92. OSD had a Milestone/Defense Acquisition Board (DAB) 0 in Aug 92 which directed "Combat ID to enter into Phase 0 for Joint Concept Exploration and Definition studies on Battlefield ID (Army lead) and CAI (Navy) with Navy as overall lead for coordination of both Phase 0 efforts." A Cost and Operational Effectiveness Analysis (COEA) is underway to investigate options to be presented at DAB I. The Naval Research Lab (NRL) is directing COEA studies.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

## 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$7,180) Supported COEA study and prepared DOD I 5000 series Documentation for DAB I.

## 2. (U) FY 1995 PLAN:

- (U) (\$3,453) Continue COEA study. Support OSD led Combat ID Task Force. Continue Allied interoperability discussions. Commence planning for risk reduction studies.
- (U) (\$4,000) Fund Joint Combat ID Office (OPNAV-662) led ASCIET Program (\$1,000). Fund OSD led Combat ID Task Force (\$1,000). Fund OSD led Combat ID Task Force directed Advanced Concept Technology Demonstration (ACTD) Systems/Test designs (\$2,000).

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: W2212 ALL SERVICES COMBAT IDENTIFICATION EVALUATION TEAM (ASCIET) PROGRAM. Formerly, the Office of the Secretary of Defense (OSD) sponsored Joint Air Defense Organization-Joint Engagement Zone (JADO-JEZ) testing. This is a new, joint services test program whose operations have been proportionally assumed by the four Services under oversight of the General Officer Steering Committee for Combat Identification (GOSC-CI) and the Joint Combat Identification Office (JCIDO). The program is designed to conduct periodic, joint exercises to evaluate and assess cooperative and non-cooperative, direct and indirect, passive and active combat identification systems, platforms, and tactics, as well as serving as the primary test bed for evaluating research and development in promising combat identification technologies in a joint, tactical environment. This is a fiscal year 1996 DON new start.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

1. (U) FY 1994 ACCOMPLISHMENTS: Not applicable.
2. (U) FY 1995 PLAN: Not applicable.
3. (U) FY 1996 PLAN:

- (U) (\$2,889) Conduct test and evaluation of combat identification platforms and systems in the air-to-ground and ground-to-ground mission areas.

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The NAVSTAR Global Positioning System (GPS) is a space-based radio positioning and navigation system that provides users with worldwide, all-weather, three-dimensional position, velocity and precise time data based on a constellation of 24 satellites. Navy's portion of the GPS program develops User Equipment (UE) and provides new/increased capability to each type platform through the integration and testing of this equipment. GPS increases the "performance envelope" of each testing of this aircraft by enhancing the aircraft's mission capability. GPS integrations involve development of ancillary hardware and software and testing of prototype avionics suites to validate enhancement of mission systems, emulation of Tactical Air Navigation (TACAN) in aircraft and system performance characteristics suitable for operational testing.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

## 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$39,973) Continued integration engineering on AH-1W, AV-8 (day attack), AV-8 (Radar), T-44, S-3B, E-2C(UD), E-6B, ES-3A, SH-60B(UD), A-6E, UH-3H, T-45, F-14D, C-2A, F/A-18, CH-46, MH-53E, UH-1N, VH-3D, and H/KC-130 aircraft.
- (U) (\$75) Continued systems integration in the Electrostatically Supported Gyro Navigator (ESGN).
- (U) (\$115) Completed development of TAMPs software.
- (U) (\$251) Continued integration with shipboard command control systems.

DATE: Feb 1995

BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604777N

PROJECT TITLE: Navigation/ID Systems

PROJECT NUMBER: X0921

PROJECT TITLE: NAVSTAR GPS

- (U) (\$2,503) Continued effort in the areas of integration design support, data reduction, platform test deficiency resolution and user equipment (UE) design analysis.
- (U) (\$4,515) Completed design and testing of GPS Inertial Navigation Assembly (GINA).
- (U) (\$2,106) Continued NAVSSI software and integration engineering with shipboard command and control.

2. (U) FY 1995 PLAN:

- (U) (\$24,496) Continue integration engineering on C-9B, UH-12M, TH-57, E-2C(UD), T-44B, AV-8B(day attack), E-2C, F/A-18A, F/A-18B, AH-1W, CH-53E, H/KC-130, RP-3A, T-2C, T-39D, AV-8B(radar), EA-6B, EA-3A, UH-3H, E-6A, C-2A, EP-3A, EP-3E, EP-3J, P-3B, P-3C, RP-3D, TP-3B, TP-3C, UP-3A, UP-3B, VP-3B, VP-3A, DC-9, RC-12M, RC-12U, VC-20, UC-12U, F-14A, F-14B, F/A-18C, F/A-18D, V-22A, T-45A, CH-53D, MH-53E, SH-60B and S-3B aircraft.
- (U) (\$50) Complete systems integration in the ESGN.
- (U) (\$5,455) Continue NAVSSI integration engineering with shipboard command and control.
- (U) (\$3,256) Continue effort in areas of integration design support, data reduction, platform test support, deficiency resolution and user equipment design analysis.

3. (U) FY 1996 PLAN:

- (U) (\$25,850) Continue integration engineering on E-2C, CH-53D/E, P-3C, VP-3A, TP-3, VC-4, VC-11, C-9B, DC-9, RC-12M, VC-12M, F-14A/B, F-14D, HH-1N, V-22A, S-3B, US-3A, F-5, T-38, F/A-18A, F/A-18B, F/A-18E, F/A-18F, AH-1W, C-20D, C-20G, T-2C, CT-29, T-44A, TH-57B, UH-3H, EP-3A, EP-3B, EP-3J, P-3B, RP-3A, RP-3E, TP-3A, TP-3B, UP-B, EA-6B, E-6A, AV-8B, RC-12U, VC-20, T-44B aircraft.
- (U) (\$4,560) Continue NAVSSI integration engineering with shipboard command and control.
- (U) (\$2,276) Continue effort in areas of integration design support, data reduction, platform test support, deficiency resolution and user equipment design analysis.

4. (U) FY 1997 PLAN:

- (U) (\$29,647) Continue integration engineering on RP-3UD, RC-12M, UC-12M, F-14A/B, HH-1N, VH-3D, VH-60, S-3B, US-3A, EA-6B, T-45, F/A-18A, F-5, T-38, EA-6B, AH-1W, EP-3A, EP-3B, EP-3J, P-3B, RP-3A, RP-3D, TP-3A, UP-3A, UP-B, VP-3A, VC-4, VC-11, RC-12U, UC-12U, C-20D, C-20G, V-22A, CT-29, T-39A, T-33A, T-44B, CH-53D, RH-53D, TH-57B, TH-57C aircraft.
- (U) (\$4,027) Continue efforts in areas of integration design support, data reduction, platform test support, deficiency resolution and user equipment design analysis.
- (U) (\$3,750) Continue NAVSSI integration engineering with shipboard command and control.

B. (U) PROGRAM CHANGE SUMMARY:

(U) FY 1995 President's Budget:	<u>FY 1994</u>	<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>
	49,084	33,801		
(U) FY 1995 Appropriated		33,801		
(U) Adjustments from Appropriated/FY95 PRESBUDG:	+454	-544		
(U) FY 1996/97 President's Budget Submit:	49,538	33,257	32,686	37,424

(U) CHANGE SUMMARY EXPLANATION:

(U) Funding: Additional FY 94 funding of \$454 is to identify and investigate means of enhancing GPS system integrity as directed by CNO in RAPDD #330-633C. FY-95 was decreased by \$544K, 322K for small business innovative research and \$222K to reflect indistributed reductions for travel, consulting services and university research.

(U) Schedule: All aircraft integrations have been scheduled within the FYDP to meet Congressional requirement to have GPS on all aircraft by the year 2000.

(U) Technical: None.

## FY 1996 RDT&amp;E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

## BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604784N

PROGRAM ELEMENT TITLE: Distributed Surveillance System

## (U) COST: (Dollars in Thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMP PROGRAM	TOTAL
Fixed Distributed System X1312	103,660	85,338	63,525	2,069	3,702	3,667	2,687	2,687		18,117 1,244,352
Advanced Deployable System X1300	20,095	21,592	29,982	38,441	37,490	40,671	43,054	44,334		CONT. CONT.
TOTAL	123,755	106,930	93,507	40,510	41,192	44,338	45,741	47,021		18,117 1,244,352

(U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Distributed Systems is part of the Integrated Undersea Surveillance System (IUSS). IUSS provides the majority of the U.S. Navy's open ocean detection capability against quiet submarines, including rest of world diesels. The Distributed Systems program element (PE) 0604784N consists of two projects, X1312 Fixed Distributed System (FDS) and X1300 Advanced Deployable Systems (ADS), designed to improve the effectiveness and flexibility of Undersea Surveillance.

(U) The Advanced Deployable System (ADS) funds provide for the concept study, development and installation of ADS. ADS will provide a rapidly (7 to 10 days) and covertly deployable undersea surveillance capability to operational forces involved in Regional Conflicts. ADS will provide timely response to tactical requirements and uses proven technology to detect very quiet submarines in the most difficult shallow water environments with very high target position accuracy. The system will include sensors, processing and an interface to the Surveillance Direction System (SDS) for reporting of submarine and mining activity to Joint Task Force Commanders (JTFC) and tactical assets. The program uses and expands on technology developed under the Fixed Distributed System (FDS) program, the Advanced Deployable Array (ADDA) Program, the Port Area Surveillance (PAS) Program, Sonobuoy and Office of Naval Research (ONR) programs and the ARIADNE Program.

(U) JUSTIFICATION FOR BUDGET ACTIVITY: This program is funded under ENGINEERING & MANUFACTURING DEVELOPMENT because FDS project X1312 encompasses engineering and manufacturing development of new end item prior to production approval. FDS passed MS II in FY 89. MS III has been deleted. Concept study funds for ADS were broken out in FY 92 and NAVCOMPT established project X1300 in FY 93 for ADS. ADS entered the demonstration and validation phase in 1ST QTR FY95.

## FY 1996 RDT&amp;E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

## BUDGET ACTIVITY: 5

PROGRAM ELEMENT: 0604784N

PROGRAM ELEMENT TITLE: Distributed Surveillance System

(U) COST (Dollars in thousands)

PROJECT NUMBER & TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMP	TOTAL PROGRAM CONT
Advanced Deployable System X1300	20,095	21,592	29,982	38,441	37,490	40,671	43,054	44,334		

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Distributed systems are part of the Integrated Undersea Surveillance System (IUSS). IUSS provides the majority of the US Navy's open ocean detection capability against quiet submarines, including third world diesels. These submarines pose a significant threat to US forces as documented in the Mission Needs Statement for Undersea Surveillance in Littoral Waters dated 3 Mar 93.

(U) ADS will be a deployable undersea surveillance system composed of distributed fields of sensors that can be rapidly and unobtrusively deployed in shallow water against enemy submarines during regional contingencies. It will be deployed prior to or during regional conflicts. ADS will build on the FDS-D test experience with distributed fields in shallow noisy water and use collected data for processing verification. It will use FDS developed processing technologies and will also incorporate advanced sensors and technology from other related programs. ADS is a system designed to detect and track modern diesel electric submarines, and it should provide capability for tracking surface ships and detecting mine laying activity as well.

## (U) PROGRAM ACCOMPLISHMENTS AND PLANS:

## 1. (U) FY 1994 ACCOMPLISHMENTS:

- (U) (\$7,647) Completed concept studies of the ADS.
- (U) (\$541) Conducted an independent Cost and Operational Effectiveness Analysis (COEA) study.
- (U) (\$4,574) Developed documentation to support Milestone I decision.
- (U) (\$1,000) Post Milestone I, began prototyping.

PROGRAM ELEMENT: 0604784N

PROJECT NUMBER: X1300

PROGRAM ELEMENT TITLE: Distributed Surveillance System PROJECT TITLE: Advanced Deployable System

- (U) (\$6,333) Executed sea test(s) and analyzed test data from sensors appropriate to demonstrate ADS concept. Incorporated results into prototype developments.

2. (U) FY 1995 PLAN:

- (U) (\$10,350) Design prototype system, perform subsystem development and validation, and integrate three node system for risk management. The ADS prototype will be configured to meet the Operational Requirements Document (ORD) thresholds. Tests will also be conducted to reduce risks of more rapid/more unobserved deployment capability indicated by the ORD goals.
- (U) (\$1,784) Execute sea test(s) and analyze test data from data collection sensors similar to ADS. Incorporate results into prototype developments.
- (U) (\$2,500) Design and begin prototype development of the All Optical Deployable System (AODS).
- (U) (\$3,616) Support contractor design effort through continued system engineering and testing support.
- (U) (\$3,342) Manage ADS program development and monitor contractor efforts.

3. (U) FY 1996 PLAN:

- (U) (\$19,429) Provide three node system for testing, order long lead parts for multinode tests and continue design, development and integration of prototype.
- (U) (\$1,916) Plan and execute sea test of three node network provided by contractor.
- (U) (\$1,900) Continue to design, develop, and assemble prototype AODS.
- (U) (\$3,427) Support contractor design effort through continued system engineering and testing support.
- (U) (\$3,310) Manage ADS program development and monitor contractor efforts.

4. (U) FY 1997 PLAN:
- (U) (\$25,850) Complete ordering of parts, assemble nodes for multinode test and complete integration of system.
  - (U) (\$2,138) Analyze data collected at sea and plan multinode test(s) leading to Fleet Demonstration.
  - (U) (\$3,500) Continue to develop and test prototype AODS to demonstrate system performance.
  - (U) (\$3,032) Support the prime contractor design effort through continued system engineering and testing support.
  - (U) (\$3,921) Manage ADS program development and monitor contractor efforts.

B. (U) PROGRAM CHANGE SUMMARY:

	<u>FY 1994</u>	<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>
(U) FY 1995 President's Budget:	22,888	32,440		
(U) FY 1995 Appropriated:		32,440		
(U) Adjustments from Appropriated/	-2,793	-10,848		
FY 1995 PRESBUDG:				
(U) FY 1996/97 Budget Submit:	20,095	21,592	29,982	38,441

(U) CHANGE SUMMARY EXPLANATION:

(U) Funding: FY94 decreased by \$121k end of year execution update and \$2,672k reprogramming to FDS. FY95 was decreased by \$513K to accommodate Small Business Innovative Research, and decreased by \$1,047K to reflect undistributed reductions for travel, consulting services, federally funded research centers, and university research. \$8,928K reprogrammed to FDS.

(U) Schedule: A delay in reaching Milestone I and subsequent delay in award of DEM/VAL contract freed up funds in FY 94 and FY 95.

PROJECT NUMBER& TITLE	FY 1994 ACTUAL	FY 1995 ESTIMATE	FY 1996 ESTIMATE	FY 1997 ESTIMATE	FY 1998 ESTIMATE	FY 1999 ESTIMATE	FY 2000 ESTIMATE	FY 2001 ESTIMATE	TO COMP PROGRAM	TOTAL
X1312 Fixed Distributed System	103,660	85,338	63,525	2,069	3,702	3,667	2,687	2,687	18,117	1,244,352

A. (U) MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The Fixed Distributed System (FDS) is part of the Integrated Undersea Surveillance System (IUSS). IUSS provides the majority of the U.S. Navy's open ocean detection capability against quiet submarines, including rest of world diesels. FDS is a passive acoustic surveillance system for detecting these quieter submarines using hydrophones

FDS will be vital to their mission success as well as long term strategic indications and warning for fleet and national command authorities. FDS technology is the only hardware available for new bottom mounted undersea surveillance systems. FDS is modular and can be used

FDS can be rapidly deployed in support of regional conflicts or permanently installed in areas requiring long term coverage (estimated 24 year life). Increasing emphasis is being placed on the deployable, relocatable mission which would allow the U.S. the capability to set up, on short notice, surveillance coverage in regional conflict scenarios. Because of this emphasis, the Navy developed a rapidly deployable demonstration of the FDS hardware, FDS-Deployable (FDS-D), that proved the capability to respond to regional conflict scenarios in a short time period. The FDS underwater system builds on commercial fiber-optic technology to achieve high data capacities, long trunk cable lengths and extremely high reliability. FDS components are designed to be low power, small in diameter and flexible, allowing deployment of systems from non-traditional or covert platforms. Signal and information processing is accomplished ashore or in deployable vans. Signal processing uses adaptive beam forming, spectrum analysis, broadband correlation and full spectrum. Processing can accommodate distributed clusters or large arrays. Shore processing is workstation based using Non-Development Item (NDI) hardware throughout. This FDS processing system forms the framework and architecture for all IUSS processing requirements to be procured in the future.

FY 1996 RDT&E, N BUDGET ITEM JUSTIFICATION SHEET

DATE: February 1995

BUDGET ACTIVITY: 5 PROGRAM ELEMENT: 0604784N PROJECT NUMBER: X1312  
 PROGRAM ELEMENT TITLE: Distributed Surveillance System PROJECT TITLE: Fixed Distributed System

B. (U) PROGRAM CHANGE SUMMARY:

	<u>FY 1994</u>	<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>
(U) FY 1995 President's Budget:	100,878	81,866		
(U) FY 1995 Appropriated:		81,866		
(U) Adjustments from Appropriated/ FY 1995 PRESBDG:	2,782	3,472		
(U) FY 1996/97 PRESBDG Submit:	103,660	85,338	63,525	2,069

(U) CHANGE SUMMARY EXPLANATION:

(U) Funding: FY94 (\$2,672K) and FY95 (\$8,928K) plus up is due to a funds shift from the Advanced Deployable System (X1300). In addition FY94 reflects an End-of-Year execution update increase of \$110K. FY 95 reductions reflect \$1,323K to accommodate Small Business Innovative Research, \$1,400K due to cancellation of OPEVAL and \$2,733K to reflect FDS share of congressionally mandated reductions for travel, consulting services, Federally Funded Research Centers and University Research.

(U) Schedule: FY 96/97 Dept of Navy adjustment due to cancellation of OPEVAL.

(U) Technical: Not applicable.
